KAR Auction Services, Inc.

(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

20-8744739
(I.R.S. Employer
Identification No.)

**13085 Hamilton Crossing Boulevard
Carmel, Indiana 46032**
(Address of principal executive offices, including zip code)

Registrant's telephone number, including area code: **(800) 923-3725**

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, par value \$0.01 per share	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.
Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the registrant's common stock held by stockholders who were not affiliates (as defined by regulations of the Securities and Exchange Commission) of the registrant was \$537,185,768 at June 30, 2011.

As of February 17, 2012, 136,278,613 shares of the registrant's common stock, par value \$0.01 per share, were outstanding.

Documents Incorporated by Reference

Certain information required by Part III of this Annual Report on Form 10-K is incorporated by reference herein from the registrant's Definitive Proxy Statement for its 2012 Annual Meeting of Stockholders to be filed with the SEC within 120 days after the end of the registrant's fiscal year ended December 31, 2011.

DEFINED TERMS

Unless otherwise indicated, the following terms used in this Annual Report on Form 10-K have the following meanings:

- “we,” “us,” “our” and “the Company” refer, collectively, to KAR Auction Services, Inc. (formerly known as KAR Holdings, Inc.) and all of its subsidiaries unless the context otherwise requires;
- “2007 Transactions” refers to the following events: On December 22, 2006, KAR LLC entered into a definitive merger agreement to acquire ADESA. The merger occurred on April 20, 2007. Concurrently with the merger, IAA, a leading provider of automotive salvage auction and claims processing services in the United States, was contributed by affiliates of Kelso & Company and Parthenon Capital and IAA’s management to KAR Auction Services. Both ADESA and IAA became wholly owned subsidiaries of KAR Auction Services, which was wholly-owned by KAR LLC prior to the initial public offering. KAR Auction Services is the accounting acquirer, and the assets and liabilities of both ADESA and IAA were recorded at fair value as of April 20, 2007;
- “ADESA” refers, collectively, to ADESA, Inc., a wholly owned subsidiary of KAR Auction Services, and its subsidiaries, including OPENLANE, Inc. (“OPENLANE”, a wholly owned subsidiary of ADESA and its subsidiaries);
- “AFC” refers, collectively, to Automotive Finance Corporation, a wholly owned subsidiary of ADESA and its subsidiaries;
- “ALLETE” refers to ALLETE, Inc. the former parent company of ADESA;
- “AutoVIN” refers to AutoVIN, Inc., our wholly owned subsidiary;
- “Axle LLC” refers to Axle Holdings, II, LLC, which is owned by affiliates of certain of the Equity Sponsors (Kelso & Company and Parthenon), certain members or former members of IAA management and certain co-investors in connection with the acquisition of IAA in 2005. Axle LLC is the former ultimate parent company of IAA and is a holder of common equity interests in KAR LLC;
- “Credit Agreement” refers to the Credit Agreement, dated May 19, 2011, among KAR Auction Services, as the borrower, the several banks and other financial institutions or entities from time to time parties thereto and the administrative agent;
- “2007 Credit Agreement” refers to the Credit Agreement, dated April 20, 2007, among KAR Auction Services, as the borrower, KAR LLC, as guarantor, the several lenders from time to time parties thereto and the administrative agent, the joint bookrunners, the co-documentation agents, the syndication agent and the joint lead arrangers named therein, as amended on June 10, 2009, October 23, 2009 and November 11, 2010. The 2007 Credit Agreement was terminated concurrently with our entry into the Credit Agreement described above;
- “Credit Facility” refers, collectively, to the \$1.7 billion, six-year senior secured term loan facility and the \$250 million, five-year senior secured revolving credit facility, the terms of which are set forth in the Credit Agreement;
- “Equity Sponsors” refers, collectively, to Kelso Investment Associates VII, L.P., GS Capital Partners VI, L.P., ValueAct Capital Master Fund, L.P. and Parthenon Investors II, L.P., which collectively own through their respective affiliates a majority of the equity of KAR Auction Services;

- “fixed senior notes” refers to KAR Auction Services’ 8¾% Senior Notes due May 1, 2014. In June 2011, we prepaid the \$450.0 million aggregate principal amount outstanding on the fixed senior notes;
- “floating senior notes” refers to KAR Auction Services’ Floating Rate Senior Notes due May 1, 2014 (\$150.0 million aggregate principal amount outstanding at December 31, 2011);
- “IAA” refers, collectively, to Insurance Auto Auctions, Inc., a wholly owned subsidiary of KAR Auction Services, and its subsidiaries;
- “KAR Auction Services” refers to KAR Auction Services, Inc., and not to its subsidiaries;
- “KAR LLC” refers to KAR Holdings II, LLC, which is owned by affiliates of the Equity Sponsors and management of the Company;
- “LAI” refers, collectively, to LiveBlock Auctions International, Inc., a wholly owned subsidiary of ADESA and its subsidiaries;
- “notes” refers, collectively, to our senior notes and senior subordinated notes;
- “senior notes” refers, collectively, to the fixed senior notes and floating senior notes; and
- “senior subordinated notes” refers to KAR Auction Services’ 10% Senior Subordinated Notes due May 1, 2015. In June 2011, we prepaid the \$131.1 million aggregate principal amount outstanding on the senior subordinated notes.

PART I

Item 1. Business

Overview

We are a leading provider of vehicle auction services in North America. We facilitate an efficient marketplace providing auction services for sellers of used, or “whole car,” vehicles and salvage vehicles through our 228 physical auction locations at December 31, 2011, and multiple proprietary internet venues. In 2011, we facilitated the sale of over 3.1 million used and salvage vehicles. Our revenues are generated through auction fees from both vehicle buyers and sellers as well as by providing value-added ancillary services, including inspections, storage, transportation, reconditioning, salvage recovery, titling, and floorplan financing. We facilitate the transfer of ownership directly from seller to buyer and generally we do not take title or ownership to vehicles sold at our auctions.

ADESA, our whole car auction services business, is the second largest provider of used vehicle auction services in North America. Vehicles at ADESA’s auctions are typically sold by commercial fleet operators, financial institutions, rental car companies, used vehicle dealers and vehicle manufacturers and their captive finance companies to franchised and independent used vehicle dealers. IAA, our salvage auction services business, is one of the two largest providers of salvage auction services in North America. Vehicles at our salvage auctions are typically damaged or low value vehicles that are predominantly sold by automobile insurance companies, non-profit organizations, automobile dealers, vehicle leasing companies and rental car companies to licensed dismantlers, rebuilders, scrap dealers or qualified public buyers. An important component of ADESA’s and, to a lesser extent, IAA’s services to its buyers is providing short-term inventory-secured financing, known as floorplan financing, primarily to independent used vehicle dealers through our wholly owned subsidiary, AFC.

At December 31, 2011, we had a network of 69 whole car auction locations and 159 salvage auction locations. Our auction locations are primarily stand-alone facilities dedicated to either whole car or salvage auctions. However, some of our sites are utilized to service both whole car and salvage customers at the same location. We believe our extensive geographic network and diverse product offerings enable us to leverage relationships with North American providers and buyers of used and salvage vehicles.

Our Corporate History

KAR Auction Services (formerly KAR Holdings, Inc.) was incorporated in 2006 and commenced operations in April 2007 upon the consummation of the 2007 Transactions. On November 3, 2009, we changed our name from KAR Holdings, Inc. to KAR Auction Services, Inc. ADESA entered the vehicle remarketing industry in 1989 and first became a public company in 1992. In 1994, ADESA acquired AFC. ADESA remained a public company until 1995 when ALLETE purchased a majority of its outstanding equity interests. In June 2004, ALLETE sold 20% of ADESA to the public and then spun off their remaining 80% interest to shareholders in September 2004. ADESA was acquired by the Company in April 2007. IAA entered the vehicle salvage business in 1982, and first became a public company in 1991. After growing through a series of acquisitions, IAA was acquired by affiliates of Kelso & Company and Parthenon Capital in 2005. Affiliates of Kelso & Company and Parthenon Capital and certain members of IAA management contributed IAA to KAR Auction Services in connection with the 2007 Transactions. On December 16, 2009, we sold 25,000,000 shares of common stock in an initial public offering. In addition, on December 23, 2009, the underwriters' of the initial public offering exercised a portion of their option to purchase additional shares, resulting in an additional 2,656,050 shares of common stock being sold.

Our Industry

Auctions are the hub of the remarketing system for used and salvage vehicles, bringing professional sellers and buyers together and creating a marketplace for the sale of these vehicles. Whole car auction vehicles include vehicles from dealers turning their inventory, off-lease vehicles, vehicles repossessed by financial institutions and rental and other program fleet vehicles that have reached a predetermined age or mileage. The salvage vehicle auction industry provides a venue for sellers, primarily automobile insurance companies, to dispose or liquidate damaged or low value vehicles to dismantlers, rebuilders, scrap dealers or qualified public buyers. The following are key industry highlights:

Whole Car Industry Volumes

During the period from 1999 to 2009, approximately 9 to 10 million used vehicles per year were sold in North America through whole car auctions, and this number declined to 8.4 million in 2010. The reported number of used vehicles sold from 1999 to 2010 excludes OPENLANE and all other online-only auctions. We estimate that used vehicle auction volumes in North America will be approximately 7.7 million units (excluding approximately 0.3 million units sold by OPENLANE) in 2011. We also expect 2012 used vehicle auction volumes to be consistent with 2011 volumes. The reduction in auction volumes is attributable to supply shortages in the North American whole car auction industry, as a result of the impacts felt by the automotive industry over the last three years, including volatility in new vehicle sales, lease originations and repossessions. Positive trends which should influence future demand for used vehicles include increases in the number of households with more than one vehicle, improvements by manufacturers that have extended vehicle lifespan and the affordability of used vehicles relative to new vehicles.

Stable Salvage Auction Industry Volumes

We believe that the North American salvage vehicle auction industry volumes are affected primarily by accident rates, miles driven and the increasing complexity of vehicles in operation. Vehicles deemed a total loss by automobile insurance companies represent the largest category of vehicles sold in the salvage vehicle auction industry. While miles driven declined slightly in 2011, as vehicle design becomes more complex with additional enhancements, such as airbags and electrical components, vehicles are more costly to repair following an accident and insurance companies are more likely to declare a damaged vehicle a total loss. The longer term trends in miles driven lead us to believe that salvage volumes will continue to grow over time.

Whole Car and Salvage Auction Markets

The North American used vehicle auction market is largely consolidated. We estimate that Manheim, a subsidiary of Cox Enterprises represents approximately 45% - 50% of the North American whole car auction market, and that ADESA, excluding OPENLANE, represents approximately 22%. Including OPENLANE, we estimate that ADESA represents approximately 25% of the North American whole car auction market. We also estimate that no other whole car auction, or auction group, represents more than 3% of the market.

The North American salvage vehicle auction market is also largely consolidated with the top two competitors, IAA and Copart, each representing an estimated 35% to 40% of the market, and no other competitor representing more than 10%.

High Barriers to Entry

High barriers to entry make it difficult for new entrants to capture significant market share. The required investment in technology and related infrastructure in addition to ongoing maintenance costs required to meet customers' demands present challenges for new entrants. Large tracts of land and a significant investment in facilities and land improvements are required to build new auctions. In addition, the need to comply with regulatory requirements would pose a challenge for new entrants to build a scale operation. Larger participants are also able to better develop relationships with many of the major whole car and salvage sellers and buyers, which increases the sellers' flexibility to redistribute vehicles to markets where demand best matches supply in order to maximize proceeds, while also reducing the cost of disposition.

Our Business Strategy

We continue to focus on growing our revenues and profitability through the execution of the following key operating strategies:

Grow Our Dealer Consignment Business

The dealer consignment business is a highly market-specific business that requires local auction sales representatives who have experience in the used vehicle business and an intimate knowledge of their local market. We have augmented our local auction teams with the addition of corporate-level resources focused on growing the number of dealer vehicles sold at our physical and online auctions. The corporate team assists the local sales representatives in developing and implementing standard best practices for building and maintaining relationships with dealers to increase our market share. Our sales representatives also utilize proprietary technology solutions to maintain and grow the dealer consignment business by strategically matching the supply of vehicles with prospective buyers at auction. We believe this combination of a standard centralized approach with decentralized resources close to large populations of dealers will enhance our relationships with the dealer community and increase dealer volumes at our whole car auctions. On a same store basis, our dealer consignment sales volumes were up approximately 13% and 7% for the years ended December 31, 2011 and 2010, respectively, compared with the same periods in prior years.

Expand Opportunities for Customers to Buy and Sell Online

In October 2011, we acquired OPENLANE, Inc. ("OPENLANE") in order to better capitalize on the increasing use of the internet as a means to purchase wholesale vehicles. OPENLANE offers comprehensive remarketing solutions to auto manufacturers, captive finance companies, lease and daily rental companies, financial institutions and wholesale auto auctions throughout the United States and Canada. Online vehicle remarketing solutions provide the opportunity to improve the customer experience, expand our volume of transactions and potentially increase proceeds for sellers through

greater buyer participation at auctions. IAA is the only national salvage auction company that offers buyers both live and internet purchasing opportunities. ADESA provides online solutions to sell vehicles directly from a dealership or other interim storage location (upstream selling), online solutions to offer vehicles for sale while in transit to auction locations (midstream selling) and broadcasting video and audio of the physical auctions to online bidders (simulcast). We are focused on enhancing our internet solutions in all of the key channels (upstream, midstream and at auction) and we will continue to invest in our technology platforms to ensure that we can capitalize on new opportunities and attract new customers.

Grow Our Non-Insurance Salvage Auction Customer Base

More than 12 million vehicles are de-registered annually, but only approximately 3.5 million are sold through salvage auctions, mostly by automobile insurance companies. In order to capture a greater portion of the total unit volume, we are increasingly focused on growing our vehicle supplier base, with a particular focus on non-insurance company customers, which includes charitable organizations, rental car, captive finance and fleet companies, as well as the general public. ADESA's strong customer relationships with used vehicle dealers as well as rental car, captive finance and fleet companies provide an advantage in accessing these segments as these customers already use ADESA's whole car auction services.

Leverage AFC's Products and Services at ADESA and IAA

We intend to selectively grow AFC while using enhanced credit analysis and risk management techniques to mitigate risk. We will continue to focus on expanding dealer coverage and improving coordination with ADESA and IAA to capitalize on cross-selling opportunities with AFC. By encouraging a collaborative marketing effort between AFC, ADESA and IAA, we believe we can market an enterprise solution more effectively to used vehicle dealers and tailor AFC's financing products to individual dealer needs. We will maintain our focus on generating additional revenues by expanding our suite of floorplan financing and related products and services and leveraging our market position, broad infrastructure and diversified business relationships to capitalize on current market opportunities.

Use Excess Cash Flow to Reduce Debt

We generate strong cash flows as a result of our attractive gross margins, the ability to leverage our corporate infrastructure across our multiple auction locations, low maintenance capital expenditures and limited working capital requirements. We generated \$305.8 million and \$467.6 million (\$318.7 million excluding the impact of the change in accounting for the securitization) of cash flow from operations for the years ended December 31, 2011 and 2010, respectively. Management plans to utilize a significant portion of excess cash generated by the business for debt reduction for the foreseeable future.

Continue to Grow Revenue per Vehicle

From 2007 through 2011, our whole car and salvage revenue per vehicle grew at compound annual growth rates of 2.9% and 3.8%, respectively. Whole car revenue per vehicle generally consists of auction fees and fees from ancillary services. Increased utilization of ancillary services, selective fee increases, higher used vehicle prices and the introduction of new product offerings were key components of this growth. We believe these services provide economic benefits to our customers who are willing to utilize our products and services that improve their ability to manage their remarketing efforts and increase their returns. We plan to grow revenue by increasing customer utilization of these existing products and by enhancing our core auction services through such initiatives as increasing the number of vehicles offered both online and at physical auctions.

Continue to Improve Operating Efficiency

We continue to focus on reducing costs by optimizing efficiency at each of our auction locations and consolidating certain management functions. Since 2007, a number of initiatives have been implemented, which have streamlined operations and improved operating efficiencies. More recently, we introduced a management operating system to actively monitor and manage staffing levels and, as a result, have realized additional labor efficiency gains.

In 2011 we began implementing the AuctionTrac vehicle tracking system at ADESA. AuctionTrac uses GPS technology to pinpoint a vehicle's location at an auction. Streamlining vehicle locating and tracking has led to a reduction in labor costs and an increase in overall operating efficiency.

In addition, ADESA has begun integrating its physical auction locations with CarsArrive, OPENLANE's transportation solution. Customers can use the CarsArrive internet-based system to instantly review price quotes and delivery times, check available transportation loads and also receive instant notification of available shipments. The system is also able to consolidate shipments and optimize both full and partial loads in real time, which also benefits vehicle transporters.

Selective Acquisitions and Greenfield Expansion

Increased demand for single source solutions by our customers and other factors may increase our opportunities to acquire smaller, less geographically diverse competitors. Both ADESA and IAA have a strong record of acquiring and integrating independent auction operations and improving profitability. We will continue to evaluate opportunities to open and acquire new sites in selected markets in order to effectively leverage our sales and marketing capabilities and expand our geographic presence for both ADESA and IAA.

Our Business Segments

We operate as three reportable business segments: ADESA Auctions, IAA and AFC. Our revenues for the year ended December 31, 2011 were distributed as follows: ADESA 54%, IAA 37% and AFC 9%. Geographic information as well as comparative segment revenues and related financial information pertaining to ADESA, IAA and AFC for the years ended December 31, 2011, 2010 and 2009 are presented in the tables in Note 20, *Segment Information*, to the Consolidated Financial Statements for KAR Auction Services, Inc., which are included under Item 8 in this Annual Report on Form 10-K.

ADESA

Overview

We are the second largest provider of whole car auctions and related services to the vehicle remarketing industry in North America. We serve our international customer base through online auctions and auction facilities that are developed and strategically located to draw professional sellers and buyers together and allow the buyers to inspect and compare vehicles remotely or in person. Our online service offerings include OPENLANE, a leader in internet-based remarketing solutions, and allow us to offer vehicles for sale from any location.

Vehicles available at our auctions include vehicles from institutional customers such as off-lease vehicles, repossessed vehicles, rental vehicles and other program fleet vehicles that have reached a predetermined age or mileage and have been repurchased by the manufacturers, as well as vehicles from used vehicle dealers turning their inventory. The number of vehicles offered for sale at auction is the key driver of our costs incurred in the whole car auction process, and the number of vehicles sold is the key driver of the related fees generated by the remarketing process.

We offer both online and physical auctions as well as value-enhancing ancillary services in an effective and efficient manner to maximize returns for the sellers of used vehicles. We quickly transfer the vehicles and ownership to the buyer and the net funds to the seller. Vehicles are typically offered for sale at the physical auctions on at least a weekly basis at most locations and the auctions are broadcast over the internet with streaming audio and video so that remote bidders can participate via our online capabilities. Our online auctions function 24 hours a day, 7 days a week, providing our customers with maximum exposure for their vehicles and the flexibility to offer vehicles in auctions that last for a few hours, days or even weeks. As a result of our auctions, we provide real-time wholesale market prices for the used vehicle remarketing industry as large populations of dealers seek to fill their inventory for resale to their retail customers.

We generate revenue primarily from auction fees paid by vehicle buyers and sellers. Generally, we do not take title to or bear the risk of loss for vehicles sold at whole car auctions. Our buyer fees and dealer seller fees are typically based on a tiered structure with fees increasing with the sale price of the vehicle, while institutional seller fees are typically fixed. We add buyer fees to the gross sales price paid by buyers for each vehicle, and generally customers do not receive title or possession of vehicles after purchase until payment is received, proof of floorplan financing is provided or credit is approved. We generally deduct seller fees and other ancillary service fees to sellers from the gross sales price of each vehicle before remitting the net amount to the seller.

Customers

Suppliers of vehicles to our whole car auctions primarily include (i) large institutions, such as vehicle manufacturers and their captive finance arms, vehicle rental companies, financial institutions, and commercial fleets and fleet management companies (collectively “institutional customers”); and (ii) franchised and independent used vehicle dealers (collectively “dealer customers”). For the year ended December 31, 2011, no single supplier accounted for more than 5% of ADESA’s revenues.

Buyers of vehicles at our whole car auctions primarily include franchised and independent used vehicle dealers. For the year ended December 31, 2011, no single buyer accounted for more than 1% of ADESA’s revenues.

Services

Our whole car auctions also provide a full range of innovative and value-added services to sellers and buyers that enable us to serve as a “one-stop shop.” Many of these services may be provided or purchased independently from the auction process, including:

<u>Services</u>	<u>Description</u>
<i>Auction Related Services</i>	ADESA provides marketing and advertising for the vehicles to be auctioned, dealer registration, storage of consigned and purchased inventory, clearing of funds, arbitration of disputes, auction vehicle registration, condition report processing, post-sale inspections, security for consigned inventory, title processing, sales results reports, pre-sale lineups and auctioning of vehicles by licensed auctioneers.

Services

Description

<i>Transportation Services</i>	We provide both inbound (pickup) and outbound (delivery) transportation services utilizing our own equipment and personnel as well as licensed and insured third party carriers. Through the CarsArrive internet-based system, customers can instantly review price quotes and delivery times, and vehicle transporters can check available loads and also receive instant notification of available shipments. CarsArrive is an OPENLANE company that functions as an outsource provider of automated vehicle shipping services.
<i>Reconditioning Services</i>	Our ADESA auctions provide detailing, body work, paintless dent repair (“PDR”), light mechanical work, glass repair, tire and key replacement and upholstery repair.
<i>Inspection Services Provided By AutoVIN</i>	AutoVIN provides vehicle condition reporting, inventory verification auditing, program compliance auditing and facility inspections. Field managers are equipped with handheld computers and digital cameras to record all inspection and audit data on-site. The same technology is utilized at our whole car auction locations and we believe that the expanded utilization of comprehensive vehicle condition reports with pictures will significantly increase the penetration of the internet as a method of sourcing vehicles for buying dealers.
<i>Title and Repossession Administration and Remarketing Services Provided By PAR</i>	PAR provides end-to-end management of the remarketing process including titling, repossession administration, inventory management, auction selection, pricing and representation of the vehicles at auction for those customers seeking to outsource all or just a portion of their remarketing needs.
<i>ADESA Analytical Services</i>	ADESA Analytical Services provides value-added market analysis to our customers and the media. These services include access to publications and custom analysis of wholesale market trends for ADESA’s customers, including peer group and market benchmarking studies, analysis of the benefits of reconditioning, site selection for optimized remarketing of vehicles, portfolio analysis of auction sales and computer-generated mapping and buyer analysis.

Sales and Marketing

Our sales and marketing approach at ADESA is to develop strong relationships and interactive dialogue with our customers. We have relationship managers for the various categories of institutional customers, including vehicle manufacturers, rental car companies, finance companies and others. These relationship managers focus on current trends and customer needs for their respective seller group in order to better coordinate our sales effort and service offerings.

Managers of individual auction locations are ultimately responsible for providing services to the institutional customers whose vehicles are directed to the auctions by the corporate sales team. Developing and servicing the largest possible population of buying dealers for the vehicles consigned for sale at each auction is integral to maximizing value for our vehicle suppliers. We also provide

market analysis to our customers through our ADESA Analytical Services department. We market this service to institutional customers as they use analytical techniques in making their remarketing decisions.

We have local auction sales representatives who have experience in the used vehicle business and an intimate knowledge of local markets. These local representatives are complemented by local telesales representatives and are managed by a corporate-level team focused on developing and implementing standard best practices. We believe this combination of a centralized structure with decentralized resources enhances relationships with the dealer community and may further increase dealer consignment business at our auctions.

Online Solutions

Our current ADESA online solutions include:

<u>Proprietary ADESA Technology</u>	<u>Description</u>
<i>OPENLANE / DealerBlock®</i>	These platforms provide for either real-time or “bulletin-board” online auctions of consigned inventory not scheduled for physical auction. These platforms are also utilized for upstream and midstream selling, which facilitate the sale of vehicles prior to their arrival at a physical auction site. Auctions can be either closed (restricted to certain eligible dealers) or open (available to all eligible dealers) and inventory feeds of vehicles are automated with many customers’ systems as well as third party providers that are integrated with various dealer management systems. The Company expects ADESA DealerBlock® to be replaced with OPENLANE in 2012.
<i>ADESA LiveBlock™</i>	Our live auction internet bidding solution, ADESA LiveBlock™, operates in concert with our physical auctions and provides registered buyers with the opportunity to participate in live auctions. Potential buyers bid online in real time along with the live local bidders and other internet bidders via a simple, web-based interface. ADESA LiveBlock™ provides real-time streaming audio and video from the live auction and still images of vehicles and other data. Buyers inspect and evaluate the vehicle and listen to the live call of the auctioneer while viewing the physical auction that is underway.
<i>ADESA Run List®</i>	Provides a summary of consigned vehicles offered for auction sale, allowing dealers to preview inventory and vehicle condition reports prior to an auction event.
<i>ADESA Market Guide®</i>	Provides wholesale auction prices, auction sales results, market data and vehicle condition information.
<i>ADESA Virtual Inventory</i>	Subscription-based service to allow dealers to embed ADESA’s search technology into a dealer’s Web site to increase the number of vehicles advertised by the dealer.
<i>ADESA Notify Me</i>	E-mail notification service for dealers looking for particular vehicles being run at physical or online auctions.

Competition

In the whole car auction industry, we compete with Manheim, a subsidiary of Cox Enterprises, Inc., OVE.com (Manheim's "Online Vehicle Exchange"), SmartAuction, as well as several smaller chains of auctions and independent auctions, some of which are affiliated through their membership in industry associations. Due to our national presence, competition is strongest with Manheim for the supply of used vehicles from national institutional customers. The supply of vehicles from dealers is dispersed among all of the auctions in the used vehicle market.

Due to the increased viability of the internet as a marketing and distribution channel, new competition has arisen from internet-based companies and our own customers who have historically remarketed vehicles through various channels, including auctions. Direct sales of vehicles by institutional customers and large dealer groups through internally developed or third-party online platforms have largely replaced telephonic and other non-auction methods, becoming a significant portion of overall used vehicle remarketing. The extent of use of direct, online systems varies by customer. In addition, we and some of our competitors offer online auctions in connection with physical auctions, and other online companies now include used vehicles among the products offered at their auctions.

In Canada, we are the largest provider of whole car vehicle auction services. Our competitors include Manheim, independent vehicle auctions, brokers, online companies and vehicle recyclers and dismantlers.

IAA

Overview

We are one of the two leading providers of salvage vehicle auctions and related services in North America. We operate as Insurance Auto Auctions in the U.S. and Impact Auto Auctions in Canada and serve our customer base through salvage auction locations throughout North America. We facilitate the remarketing of damaged vehicles that are designated as total-losses by insurance companies, recovered stolen vehicles for which an insurance settlement with the vehicle owner has already been made and older model vehicles donated to charity or sold by dealers in salvage auctions. Our auctions provide buyers with the salvage vehicles they need to fulfill their scrap demand, replacement part inventory or vehicle rebuild requirements. We earn fees for our services from both suppliers and buyers of salvage vehicles.

We process salvage vehicles primarily on a consignment basis. In return for agreed upon fees, we sell vehicles on behalf of our suppliers, which continue to own the vehicles until they are sold to buyers at auction. In addition to auction fees, we generally charge fees to vehicle suppliers for various services, including towing, title processing and other administrative services. Under all methods of sale, we also charge the buyer of each vehicle fees based on a tiered structure that increase with the sale price of the vehicle as well as fixed fees for other services.

Auctions are typically held weekly at most locations. Vehicles are marketed at each respective auction site as well as via an online auction list that allows prospective bidders to preview and bid on vehicles prior to the actual auction event. IAA's Auction Center feature provides internet buyers with an open, competitive bidding environment that reflects the dynamics of the live salvage auction. In late 2011, we also introduced mobile device applications that provide even greater flexibility for our buyers to interact in our auctions. The Auction Center includes such services as comprehensive auction lists featuring links to digital images of vehicles available for sale, an "Auto Locator" function that promotes the search for specific vehicles within the auction system and special "Flood" or other catastrophe auction notifications. Higher prices at auction are generally driven by broader market exposure and increased competitive bidding.

We have developed online tools to assist customers in remarketing their vehicles and establishing salvage vehicle values, in addition to offering an alternative to physically attending an auction. Through our auction model, vehicles are offered simultaneously to live and online buyers in a live auction format utilizing i-Bid LIVESM. We believe our auction models' capabilities maximize auction proceeds and returns to our customers. First, our physical auctions allow buyers to inspect and compare the vehicles, thus enabling them to make fully-informed bidding decisions. These physical auction abilities are an important part of the bidding process. Second, our internet auction capabilities allow buyers to participate in a greater number of auctions than if physical attendance was required. Online inventory browsing and e-mail-based inventory alerts reduce the time required to acquire vehicles.

Services

We also offer a comprehensive suite of auction, logistics and claims services, which aim to maximize salvage returns, lower administrative costs, shorten the claims process and increase the predictability of returns to vehicle suppliers, while simultaneously expanding our ability to handle an increasing proportion of the total salvage and claims-processing function as a “one-stop shop” for insurers. Some of the services provided by IAA include:

<u>Services</u>	<u>Description</u>
<i>Auction Model</i>	Through our auction model vehicles are offered simultaneously to live and online buyers in a live auction format utilizing i-Bid LIVE SM . We believe this exposes the vehicles to the maximum number of potential buyers.
<i>IAA Title Management</i>	After a totaled vehicle is received at one of our facilities, it remains in storage but cannot be auctioned until transferable title has been submitted to and processed by us. We process title documents in order to comply with the Department of Motor Vehicles (“DMV”) requirements for all vehicles. Wherever possible, we interface electronically with the DMV. In addition, we customarily offer the insurance companies’ staff training for each state’s DMV document processing procedures. IAA Title Management services range from reports on aging inventory to complete oversight of the entire title process from claim settlement for the insurance company. Our titling expertise results in reduced cycle time from assignment to proceeds and decreased administrative expenses for the supplier.
<i>Vehicle Inspection Centers</i>	We maintain vehicle inspection centers, or “VICs,” at many of our facilities. A VIC is a temporary storage and inspection facility located at one of our sites that is operated by the insurance company. Some of these VIC sites are formalized through temporary license agreements with the insurance companies that supply the vehicles. VICs minimize vehicle storage charges incurred by insurance company suppliers at the temporary storage facility or repair shop and also improve service time for the policyholder.
<i>Transportation and Towing</i>	Inbound and outbound logistics administration with actual services typically provided by third party carriers.

Services

Description

<i>Remarketing Division</i>	Focuses on vehicles, rental sellers, fleet and leasing companies, banks and dealer trade-in inventory.
<i>Donation Division</i>	Processes vehicle donations to charities across the United States to help turn vehicles into money for a variety of charitable organizations.

Customers

We obtain IAA's supply of vehicles from insurance companies, non-profit organizations, automobile dealers and vehicle leasing and rental car companies, as well as the general public. We have long-term relationships with substantially all of the major automobile insurance companies. For the year ended December 31, 2011, no single supplier accounted for more than 4% of IAA's revenues.

Buyers of salvage vehicles include automotive body shops, rebuilders, used car dealers, automotive wholesalers, exporters, dismantlers, recyclers, brokers, and where allowed, non-licensed (public) buyers. For the year ended December 31, 2011, no single buyer accounted for more than 3% of IAA's revenues.

Sales and Marketing

We solicit prospective vehicle providers at the national, regional and local levels through our IAA sales force. Branch managers execute customer service requests and address customer needs at the local level. We also participate in a number of local, regional and national trade show events that further promote the benefits of our products and services.

In addition to providing insurance companies and certain non-insurance company suppliers with a means of disposing of salvage vehicles, we offer a comprehensive suite of services which aim to maximize salvage returns and shorten the claims processing time. We seek to become integrated within our suppliers' salvage processes, and we view such mutually beneficial relationships as an essential component of our effort to attract and retain suppliers.

By analyzing historical industry and customer data, we provide suppliers with a detailed analysis of their current salvage returns and a proposal detailing methods to improve salvage returns, reduce administrative costs and provide proprietary turn-key claims processing services.

We also seek to expand our supplier relationships through recommendations from individual insurance company branch offices to other offices of the same insurance company. We believe that our existing relationships and the recommendations of branch offices play a significant role in our marketing of services within national insurance companies. As we have expanded our geographic coverage, we have been able to market our services to insurance company suppliers on a national basis or within an expanded geographic area.

Online Solutions

Our current IAA online solutions include:

<u>Proprietary IAA Technology</u>	<u>Description</u>
<i>i-Bid LIVESM</i>	Our live auction internet bidding solution, i-Bid LIVE, operates in concert with our physical auctions and provides registered buyers with the opportunity to participate in live auctions. Potential buyers bid online in real time along with the live local bidders and other internet bidders via a simple, web-based interface. i-Bid LIVE provides real-time streaming audio from the live auction and images of salvage vehicles and other data. Buyers inspect and evaluate the salvage vehicle and listen to the auction while it is underway.
<i>I-Buy FastSM</i>	I-Buy Fast is an immediate buying option that allows qualified buyers to purchase vehicles between auctions for a fixed price. I-Buy Fast vehicles include those that ran in a previous auction but were not sold.
<i>CSAToday[®]</i>	<p>The process of salvage disposition through our system begins at the first report of loss or when a stolen vehicle has been subsequently recovered. An insurance company representative consigns the vehicle to us, either by phone, facsimile or electronically through our online proprietary data management system, CSAToday.</p> <p>CSAToday enables insurance company suppliers to enter vehicle data electronically and then track and manage the progress of salvage vehicles in terms of both time and salvage recovery dollars. With this tool, vehicle providers have 24-hour access to their total-loss data. The information provided through this system ranges from the details associated with a specific total-loss vehicle, to comprehensive management reports for an entire claims center or geographic region. Additional features of this system include inventory management tools and a powerful new “Average Salvage Calculator” that helps customers determine the approximate salvage value of a potential total-loss vehicle. This tool is helpful to adjusters when evaluating the “repair vs. total” decision. The management tools provided by CSAToday enable claims personnel to monitor and manage total-loss salvage more effectively. Insurance company suppliers can also use CSAToday to view original garage receipts, verify ignition key availability, view settlement documents and images of the vehicles and receive updates of other current meaningful data.</p>

Automated Salvage Auction Processing

(ASAP)

We have developed a proprietary web-based information system, Automated Salvage Auction Processing system, or ASAP, to streamline all aspects of our operations and centralize operational data collection. ASAP provides salvage vehicle suppliers with 24-hour online access to powerful tools to manage the salvage disposition process, including inventory management, salvage returns analysis and electronic data interchange of titling information.

Our other information systems, including our i-Bid LIVE and CSAToday systems, are integrated with our ASAP product, facilitating seamless auction processes and information flow with internal operational systems. Our technology platform is a significant competitive advantage that allows us to efficiently manage our business, improve customer returns, shorten customers' claims processing cycle and lower our customers' administration costs.

Competition

In the salvage sector, we compete with Copart, Total Resource Auctions (a Manheim company), independent auctions, some of which are affiliated through their membership in industry organizations to provide broader coverage through network relationships, and a limited number of used vehicle auctions that regularly remarket salvage vehicles. Additionally, some dismantlers of salvage vehicles such as Greenleaf and LKQ Corporation and internet-based companies have entered the market, thus providing alternate avenues for sellers to remarket salvage vehicles. While most insurance companies have abandoned or reduced efforts to sell salvage vehicles without the use of service providers such as us, they may in the future decide to dispose of their salvage vehicles directly to end users.

In Canada, we are the largest provider of salvage vehicle auction services. Our competitors include Copart, independent vehicle auctions, brokers, online auction companies, and vehicle recyclers and dismantlers.

AFC

Overview

We are a leading provider of floorplan financing to independent used vehicle dealers. We provide short-term inventory-secured financing, known as floorplan financing, to independent used vehicle dealers through branches throughout North America. In 2011, AFC serviced over 1 million loan transactions, which includes both loans paid off and loans extended, or curtailed. We sell the majority of our U.S. dollar-denominated finance receivables without recourse to a wholly owned bankruptcy remote special purpose entity, which sells an undivided participation interest in such finance receivables to a bank conduit facility on a revolving basis. We also securitize the majority of our Canadian dollar denominated finance receivables through a separate third-party bank conduit facility. We generate a significant portion of our revenues from fees. These fees include origination, floorplan, curtailment and other related program fees. When the loan is extended or paid in full, AFC collects all accrued fees and interest.

Customers and Locations

Floorplan financing supports independent used vehicle dealers in North America who purchase vehicles from our auctions, other auctions and non-auction purchases. In 2011, approximately 80% of the vehicles floorplanned by AFC were vehicles purchased by dealers at auction. Our ability to provide floorplan financing facilitates the growth of vehicle sales at auction. As of December 31, 2011, we serviced auctions through 103 locations which are conveniently located at or within close proximity of auctions held by ADESA and other auctions, which allows dealers to reduce transaction time by providing immediate payment for vehicles purchased at auction. We provide availability lists on behalf of our customers to auction representatives regarding the financing capacity of our customers, thereby increasing the purchasing potential at auctions. In addition, we have the ability to send finance representatives on-site to most approved independent auctions during auction sale-days. Geographic proximity to the customers gives our employees the ability to stay in close contact with outstanding accounts, thereby better enabling them to manage credit risk.

As of December 31, 2011, AFC had over 7,900 active dealers with an average line of credit of approximately \$170,000 and no one dealer representing greater than 1.5% of our portfolio. An average of approximately 14 vehicles per active dealer was floorplanned with an approximate average value of \$8,000 per vehicle at the end of 2011.

Sales and Marketing

AFC approaches and seeks to expand its share of the independent dealer floorplan market through a number of methods and channels. We target and solicit new dealers through both direct sales efforts at the dealer's place of business as well as auction-based sales and customer service representatives, who service our dealers at auctions where they replenish and rotate vehicle inventory. These largely local efforts are handled by AFC branch managers or AFC branch personnel. AFC's corporate-level team also provides sales and marketing support to AFC field personnel by helping to identify target dealers and coordinating promotional activity with auctions and other vehicle supply sources.

Credit

Our procedures and proprietary computer-based system enable us to manage our credit risk by tracking each vehicle from origination to payoff, while expediting services through our branch network. Typically, we assess a floorplan fee at the inception of a loan and we collect all accrued fees and interest when the loan is extended or repaid in full. In addition, AFC generally holds the title or other evidence of ownership to all vehicles which are floorplanned. Typical loan terms are 30 to 60 days, each with a possible loan extension. For an additional fee, this loan extension allows the dealer to extend the duration of the loan beyond the original term for another 30 to 60 days if the dealer makes payment towards principal and pays accrued interest and fees.

The extension of a credit line to a dealer starts with the underwriting process. Credit lines up to \$300,000 are extended using a proprietary scoring model developed internally by AFC. Credit lines in excess of \$300,000 may be extended using underwriting guidelines which require dealership and personal financial statements and tax returns. The underwriting of each line of credit requires an analysis, write-up and recommendation by the credit department and, in case of credit lines in excess of \$300,000, final review by a credit committee.

Collateral Management

Collateral management is an integral part of daily operations at each AFC branch and our corporate headquarters. AFC's proprietary computer-based system facilitates this daily collateral management by providing real-time access to dealer information and enables branch and corporate personnel to assess and manage potential collection issues. Restrictions are automatically placed on

customer accounts in the event of a delinquency, insufficient funds received or poor audit results. Branch personnel are proactive in managing collateral by monitoring loans and notifying dealers that payments are coming due. In addition, routine audits, or lot checks, are performed on the dealers' lots through our AutoVIN subsidiary. Poor results from lot checks typically require branch personnel to take actions to determine the status of missing collateral, including visiting the dealer personally, verifying units held off-site and collecting payments for units sold. Audits also identify troubled accounts, triggering the involvement of AFC's collections department.

AFC operates two divisions which are organized into eleven regions in North America. Each division and region is monitored by managers who oversee daily operations. At the corporate level, AFC employs full-time collection specialists and collection attorneys who are assigned to specific regions and monitor collection activity for these areas. Collection specialists work closely with the branches to track trends before an account becomes a troubled account and to determine, together with collection attorneys, the best strategy to secure the collateral once a troubled account is identified.

Securitization

AFC sells the majority of its U.S. dollar denominated finance receivables on a revolving basis and without recourse to a wholly owned, bankruptcy remote, consolidated, special purpose subsidiary ("AFC Funding Corporation"), established for the purpose of purchasing AFC's finance receivables. A securitization agreement allows for the revolving sale by AFC Funding Corporation to a bank conduit facility of undivided interests in certain eligible finance receivables subject to committed liquidity. AFC's securitization facility has been in place since 1996. AFC Funding Corporation had committed liquidity of \$650 million from a third party conduit for U.S. finance receivables at December 31, 2011. The agreement expires on June 30, 2014.

Also, we have an agreement in place for the securitization of Automotive Finance Canada, Inc.'s ("AFCI") receivables. This securitization facility provides up to C\$100 million in financing for eligible finance receivables through another third party conduit (separate from the U.S. conduit). The agreement expires on June 30, 2014. The receivables sold pursuant to both the U.S. and Canadian securitization agreements are accounted for as secured borrowings.

Accounting Standards Update 2009-16 amended ASC 860, *Transfers and Servicing*, and we adopted the new guidance on January 1, 2010. The new guidance specifies that the finance receivable transactions on or subsequent to January 1, 2010 under our revolving sale agreement be included in our balance sheet. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Securitization Facilities."

Competition

AFC primarily provides short-term dealer floorplan financing of wholesale vehicles to independent vehicle dealers in North America. At the national level, AFC's competition includes Manheim Automotive Financial Services ("MAFS"), Dealer Services Corporation, other specialty lenders, banks and financial institutions. In January 2012, Manheim announced the signing of an agreement to acquire Dealer Services Corporation. At the local level, AFC faces competition from banks and credit unions who may offer floorplan financing to local auction customers. Such entities typically service only one or a small number of auctions.

Some of our industry competitors who operate whole car auctions on a national scale may endeavor to capture a larger portion of the floorplan financing market. AFC competes primarily on the basis of quality of service, convenience of payment, scope of services offered and historical and consistent commitment to the sector. Our long-term relationships with customers have been established over time and act as a competitive strength for us.

Seasonality

The volume of vehicles sold at our auctions generally fluctuates from quarter to quarter. This seasonality is caused by several factors including weather, the timing of used vehicles available for sale from selling customers, the availability and quality of salvage vehicles, holidays, and the seasonality of the retail market for used vehicles, which affects the demand side of the auction industry. Used vehicle auction volumes tend to decline during prolonged periods of winter weather conditions. In addition, mild weather conditions and decreases in traffic volume can each lead to a decline in the available supply of salvage vehicles because fewer traffic accidents occur, resulting in fewer damaged vehicles overall. As a result, revenues and operating expenses related to volume will fluctuate accordingly on a quarterly basis. The fourth calendar quarter typically experiences lower used vehicle auction volume as well as additional costs associated with the holidays and winter weather.

Vehicle and Lending Regulation

Our operations are subject to regulation, supervision and licensing under various U.S. and Canadian federal, state, provincial and local authorities, agencies, statutes and ordinances, which, among other things, require us to obtain and maintain certain licenses, permits and qualifications, provide certain disclosures and notices and limit interest rates, fees and other charges. Some examples of the regulations and laws that impact our company are, without limitation, described below.

- The acquisition and sale of used, leased, totaled and recovered theft vehicles are regulated by state or other local motor vehicle departments in each of the locations in which we operate.
- Some of the transport vehicles used at our auctions are regulated by the U.S. Department of Transportation or similar regulatory agencies in Canada and Mexico.
- In many states and provinces, regulations require that a salvage vehicle be forever “branded” with a salvage notice in order to notify prospective purchasers of the vehicle’s previous salvage status.
- Some state, provincial and local regulations limit who can purchase salvage vehicles, as well as determine whether a salvage vehicle can be sold as rebuildable or must be sold for parts only.
- AFC is subject to laws in certain states and in Canada which regulate commercial lending activities and interest rates and, in certain jurisdictions, require AFC or one of its subsidiaries to be licensed.
- We are subject to various local zoning requirements with regard to the location of our auction and storage facilities, which requirements vary from location to location.

Changes in law or governmental regulations or interpretations of existing law or regulations could result in increased costs, reduced vehicle prices and decreased profitability for us. In addition, failure to comply with present or future laws and regulations or changes in existing laws or regulations or in their interpretation could have a material adverse effect on our operating results and financial condition.

Environmental Regulation

Our operations are subject to various foreign, federal, state and local environmental, health and safety laws and regulations, including those governing the emission or discharge of pollutants into the air or water, the generation, treatment, storage and release of hazardous materials and wastes and the investigation and remediation of contamination. Our failure to comply with current or future environmental, health or safety laws or to obtain and comply with permits required under such laws, could subject us to significant liability or require costly investigative, remedial or corrective actions.

In the used vehicle remarketing industry, large numbers of vehicles, including wrecked vehicles at salvage auctions, are stored and/or refurbished at auction facilities and during that time minor releases of fuel, motor oil and other materials may occur. We have investigated or remediated, or are currently investigating or remediating, contamination resulting from various sources, including gasoline, fuel additives (such as methyl tertiary butyl ether, or MTBE), motor oil, petroleum products and other hazardous materials released from aboveground or underground storage tanks or in connection with current or former operations conducted at our facilities. In certain instances, contamination has migrated to nearby properties, resulting in claims from private parties. We have incurred and may in the future incur expenditures relating to releases of hazardous materials, investigative, remedial or corrective actions, claims by third parties and other environmental issues, and such expenditures, individually or in the aggregate, could be significant.

Federal and state environmental authorities are currently investigating IAA's role in contributing to contamination at the Lower Duwamish Waterway Superfund Site in Seattle, Washington. IAA's potential liability, if any, at this site cannot be estimated at this time. See Item 3, "Legal Proceedings" for a further discussion of this matter.

Management considers the likelihood of loss or the incurrence of a liability, as well as the ability to reasonably estimate the amount of loss, in determining loss contingencies. We accrue an estimated loss contingency when it is probable that a liability has been incurred and the amount of loss (or range of possible losses) can be reasonably estimated. Management regularly evaluates current information available to determine whether accrual amounts should be adjusted. Accruals for contingencies including environmental matters are included in "Other accrued expenses" at undiscounted amounts and exclude claims for recoveries from insurance or other third parties. These accruals are adjusted periodically as assessment and remediation efforts progress, or as additional technical or legal information becomes available. If the amount of an actual loss is greater than the amount accrued, this could have an adverse impact on our operating results in that period.

Employees

At December 31, 2011, we had a total of 12,215 employees, of which 9,365 were located in the U.S. and 2,850 were located in Canada and Mexico. Approximately 69% of our workforce consists of full-time employees. Currently, none of our employees participate in collective bargaining agreements.

In addition to the employee workforce, we also utilize temporary labor services to assist in handling the vehicles consigned to us and to provide certain other services. Nearly all of our auctioneers are independent contractors. Some of the services we provide are outsourced to third party providers that perform the services either on-site or off-site. The use of third party providers depends upon the resources available at each auction facility as well as peaks in the volume of vehicles offered at auction.

Available Information

Our Web address is www.karauctionservices.com. Our electronic filings with the Securities and Exchange Commission ("SEC") (including all Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and if applicable, amendments to those reports) are available free of charge on the Web site as soon as reasonably practicable after they are electronically filed with, or furnished to, the SEC. In addition, our Corporate Governance Guidelines, Code of Conduct and Ethics, Code of Ethics for Principal Executive and Senior Financial Officers and charters of the audit committee, the nominating and corporate governance committee and the compensation committee of our board of directors are available on our Web site and available in print to any shareholder who requests it. The information posted on our Web site is not incorporated into this Annual Report.

Any materials that we file with the SEC may be read and copied at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an internet Web site that contains reports, proxy statements and other information about issuers, like us, that file electronically with the SEC. The address of that site is www.sec.gov.

Item 1A. Risk Factors

Investing in our Company involves a high degree of risk. You should carefully consider the following risk factors, as well as all of the other information contained in this Annual Report on Form 10-K, before deciding to invest in our Company. The occurrence of any of the following risks could materially and adversely affect our business, financial condition, prospects, results of operations and cash flows. In such case, the trading price of our common stock could decline and you could lose all or part of your investment.

Risks Related to Our Business

Decreases in the supply of used vehicles coming to auction have and may continue to impact auction sales volumes and may adversely affect our revenues and profitability.

The number of new and used vehicles that are leased by consumers affects the supply of vehicles coming to auction in future periods as the leases mature. As manufacturers and other lenders decrease the number of new vehicle lease originations and extend the terms of some of the existing leases, the number of off-lease vehicles available at auction for the industry declines. Based on our estimates, off-lease vehicles available at auction for the industry declined slightly in 2010 and declined by over 40% in 2011, reflecting declines in lease origination volume and new vehicle sales three years earlier during the recent global economic downturn and credit crisis. During 2008 and 2009, total new vehicle sales declined year over year and a number of automobile lenders announced the modification of or discontinuance of their leasing programs, leading to a decline in new vehicle lease originations. This has and will continue to reduce the number of off-lease vehicles at auction as the leases mature. The typical lease maturity is two to four years. We believe the declines in lease originations in 2008 and 2009 will continue to negatively impact the number of off-lease vehicles sold at auction in 2012 and this trend could continue beyond 2012. If the supply of off-lease vehicles coming to auction declines significantly, our revenues and profitability may be adversely affected. Our expectation is that the decline in off-lease vehicles will disproportionately impact Canada, where we have a significant auction market presence.

Volumes of off-lease vehicles in subsequent periods will be affected by total new vehicle sales and the future leasing behavior of manufacturers and lenders and therefore we may not be able to accurately predict the volume of vehicles coming to auction. The supply of off-lease vehicles coming to auction is also affected by the market value of used vehicles compared to the residual value of those vehicles per the lease terms. In most cases, the lessee and the dealer have the ability to purchase the vehicle at the residual price at the end of the lease term. Generally, as market values of used vehicles rise, the number of vehicles purchased at residual value by the lessees and dealers increases, thus decreasing the number of off-lease vehicles available at auction.

The drop in total new vehicle sales in 2008 and 2009, coupled with a tightening of consumer credit and changing policies regarding delinquent loans by the major lenders, resulted in a decline in repossessed vehicles coming to auction. A continuation of this trend could result in fewer repossessed vehicles coming to auction.

As recently as 2009, the auction industry sales volume was over 9 million units. However, we estimate auction sales volumes declined to approximately 7.7 million units in 2011 (excluding approximately 0.3 million units sold by OPENLANE). The industry is expecting auction sales volumes to recover over the next several years, and we expect volumes to reach nearly 9 million units by 2015, including OPENLANE volumes. Our performance has been and could be adversely impacted if auction volumes do not increase and we are not able to reduce our costs permanently to compensate for the lower industry auction volumes.

A prolonged economic downturn may negatively affect our business and results of operations.

Future adverse economic conditions could increase our exposure to several risks, including:

- *Fluctuations in the supply of used vehicles.* We are dependent on the supply of used vehicles coming to auction, and our financial performance depends, in part, on conditions in the automotive industry. During the recent global economic downturn and credit crisis, there was an erosion of retail demand for new and used vehicles that led many lenders to cut back on originations of new loans and leases and led to significant manufacturing capacity reductions by automakers selling vehicles in the United States. Capacity reductions could depress the number of vehicles received at auction in the future and could lead to reduced program vehicles and rental fleet sales, negatively impacting auction volumes. In addition, weak growth in or declining new vehicle sales negatively impacts used vehicle trade-ins to dealers and auction volumes. These factors could adversely affect our revenues and profitability.
- *Decline in the demand for used vehicles.* We may experience a decrease in demand for used vehicles from buyers due to factors including the lack of availability of consumer credit and the decline in consumer spending and consumer confidence. Adverse credit conditions also affect the ability of dealers to secure financing to purchase used vehicles, which further negatively affects buyer demand. In addition, a reduction in the number of franchised and independent used car dealers negatively affects our ability to collect receivables and may reduce dealer demand for used vehicles.
- *Decrease in the supply and demand of salvage vehicles.* If number of miles driven decreases, the number of salvage vehicles received at auction may also decrease. In addition, decreases in commodity prices, such as steel and platinum, may negatively affect vehicle values and demand at salvage auctions. In addition, if consumers eliminate their automotive collision coverage, this could result in fewer vehicles being declared a total loss.
- *Volatility in the asset-backed securities market.* Volatility and disruption in the asset-backed commercial paper market could lead to a narrowing of interest rate spreads at AFC in certain periods. In addition, any volatility and disruption has affected, and could affect, AFC's cost of financing related to its securitization facility.
- *Increased counterparty credit risk.* Continued market deterioration could increase the risk of the failure of financial institutions party to our credit agreement and other counterparties with which we do business to honor their obligations to us. Our ability to replace any such obligations on the same or similar terms may be limited if challenging credit and general economic conditions persist.
- *Ability to service and refinance indebtedness.* Continued uncertainty in the financial markets may negatively affect our ability to service our existing debt, access additional financing or to refinance our existing indebtedness on favorable terms or at all. If the economic downturn continues, it may affect our cash flow from operations and results of operations, which may affect our ability to service payment obligations on our debt or to comply with our debt covenants.

Our business is dependent on information and technology systems. Failure to effectively maintain or update these systems could result in us losing customers and materially adversely affect our operating results and financial condition.

Robust information systems are critical to our operating environment and competitive position. We may not be successful in structuring our information system infrastructure or developing, acquiring or implementing information systems which are competitive and responsive to the needs of our customers and we might lack sufficient resources to continue to make the significant necessary investments in information systems to compete with our competitors. Certain information systems initiatives that management considers important to our long-term success will require capital investment, have significant risks associated with their execution, and could take several years to implement. We may not be able to develop/implement these initiatives in a cost-effective, timely manner or at all.

Our information and technology systems are vulnerable to damage or interruption from computer viruses, network failures, computer and telecommunications failures, infiltration by unauthorized persons and security breaches, usage errors by our employees, power outages and catastrophic events such as fires, tornadoes, floods, hurricanes and earthquakes. If these systems were compromised, not operable for extended periods of time or ceased to function properly, we may have to make a significant investment to fix or replace them and our ability to provide many of our electronic and online solutions to our customers may be impaired. If that were to occur, it could have a material adverse effect on our operating results and financial condition.

Aspects of our operations and business are subject to privacy regulation in the United States and elsewhere. Many U.S. states have enacted data breach regulations and laws requiring varying levels of consumer notification in the event of a security breach. Increased regulation and enforcement activity throughout the world in the areas of data privacy and data security/breach may materially increase our costs, which could have a material adverse effect on our operating results. Our failure to comply with the privacy and data security/breach laws to which we are subject could also result in fines, sanctions and damage to our reputation and tradenames.

Used vehicle prices have a significant effect on fee revenue per unit at IAA and loan losses at AFC.

The volume of new vehicle production, accuracy of lease residual estimates, interest rates, customer demand and changes in regulations, among other things, all potentially affect the pricing of used vehicles. Used vehicle prices may affect the volume of vehicles entered for sale at our used vehicle auctions and the demand for those used vehicles, the fee revenue per unit at our salvage auctions, loan losses for our dealer financing business and our ability to retain customers. Throughout 2011, used vehicle prices have been high, which has contributed to supply shortages in the whole car auction industry, as used vehicle dealers chose to retail trade-in vehicles on their own rather than selling them at auction. The high used vehicle prices in 2011 also contributed to strong proceeds in the salvage auction industry. A sustained reduction in used vehicle pricing could result in lower proceeds from the sale of salvage vehicles and a related reduction in revenue per vehicle, a potential loss of customers, an increase in loan losses at AFC and decreased profitability.

Significant competition exists in our industry and we may not be able to compete successfully.

We face significant competition for the supply of used and salvage vehicles and for the buyers of those vehicles and for the floorplan financing of these vehicles. Current or potential competition comes from four primary sources: (i) direct competitors, (ii) potential entrants, (iii) potential new vehicle remarketing venues and dealer financing services and (iv) existing alternative vehicle remarketing venues. In addition, due to the increased viability of the internet as a marketing and distribution channel, new competition has evolved from internet-based companies and our own customers who have historically remarketed vehicles through various channels, including our auctions. In both the vehicle

auction and dealer financing businesses, we and our competitors are working to develop new services and technologies, or improvements and modifications to existing services and technologies. Some of these competitors may have greater financial and marketing resources than we do, and may be able to respond more quickly to new or emerging services and technologies, evolving industry trends and changes in customer requirements, and devote greater resources to the development, promotion and sale of their services. Increased competition could result in price reductions, reduced margins or loss of market share, any of which could materially and adversely affect our business and results of operations. There can be no assurance that we will be able to compete successfully against current and future competitors or that competitive pressures faced by us would not have a material adverse effect on our business and results of operations. If we are not able to compete successfully, our ability to grow and achieve or sustain profitability could be impaired. Our agreements with our largest institutional suppliers are generally subject to cancellation by either party upon 30 to 90 days' notice. There can be no assurance that our existing agreements will not be cancelled or that we will be able to enter into future agreements with these or other suppliers on similar terms, or at all.

In our salvage auction business, potential competitors include used vehicle auctions, providers of claims software to insurance companies and certain salvage buyer groups and automobile insurance companies, some of which currently supply salvage vehicles to us. Insurance companies may in the future decide to dispose of their salvage vehicles directly to end users. Increased competition could result in price reductions, reduced margins or loss of market share, any of which could materially and adversely affect our business and results of operations. There can be no assurance that we will be able to compete successfully against current and future competitors or that competitive pressures faced by us would not have a material adverse effect on our business and results of operations. We may not be able to compete successfully against current or future competitors, which could impair our ability to grow and achieve or sustain profitability.

We currently compete with online wholesale and retail vehicle selling platforms, including OVE.com, SmartAuction, eBay Motors and others. These online selling platforms generally do not have any meaningful physical presence; however, they may decrease the quantity of vehicles sold through our online and physical auctions. If the number of vehicles sold at our auctions decreases due to these competitors or other remarketing methods, our revenue and profitability may be negatively impacted.

Fluctuations in the supply of and demand for salvage vehicles impact auction sales volumes, which may adversely affect our revenues and profitability.

We are dependent upon receiving a sufficient number of total loss vehicles as well as recovered theft vehicles to sustain profit margins in our salvage auction business. Factors that can adversely affect the number of vehicles received include, but are not limited to, a decrease in the number of vehicles in operation or miles driven, mild weather conditions that cause fewer traffic accidents, reduction of policy writing by insurance providers that would affect the number of claims over a period of time, a decrease in the percentage of claims resulting in a total loss, delays or changes in state title processing, and changes in direct repair procedures that would reduce the number of newer, less damaged total loss vehicles, which tend to have higher salvage values. In addition, our salvage auction business depends on a limited number of key insurance companies to supply the salvage vehicles we sell at auction. Our agreements with these insurance company suppliers are generally subject to cancellation by either party upon 30 to 90 days notice. There can be no assurance that our existing agreements will not be cancelled or that we will be able to enter into future agreements with these suppliers. Future decreases in the quality and quantity of vehicle inventory, and in particular the availability of newer and less damaged vehicles, could have a material adverse effect on our operating results and financial condition. In addition, in the last few years there has been a slight decline in the percentage of claims resulting in total losses, as well as a declining trend in theft occurrences which reduces the number of stolen vehicles recovered by insurance companies for which a claim settlement has been made. If the

supply of salvage vehicles coming to auction declines significantly, our revenues and profitability may be adversely affected.

An increase in the number of used and salvage vehicles purchased on virtual auction platforms could materially adversely affect our operating results and financial condition.

We acquired OPENLANE in recognition of the increasing use of the internet as a means to purchase wholesale vehicles. In connection with online auctions, ADESA and IAA offer physical auctions, which allow buyers to physically inspect and compare vehicles. If sellers and buyers increase the number of vehicles transacted on virtual auction platforms, our revenue per vehicle will likely decline. In addition, our cost structure includes a significant fixed cost component, including occupancy costs, that cannot be reduced if revenue per vehicle declines. If a shift in the percentage of used and salvage vehicles sold online as compared with used and salvage vehicles sold at physical auctions occurs, and we are unable to generate new sources of revenue, our operating results and financial condition could be adversely affected.

If we are unable to successfully acquire and integrate other businesses, it could adversely affect our growth prospects.

Acquisitions have been a significant part of our historical growth and have enabled us to further broaden and diversify our service offerings. Our strategy generally involves the acquisition and integration of additional physical auction sites, technologies and personnel. Acquisition of businesses requires substantial time and attention of management personnel and may also require additional equity or debt financings. Further, integration of newly established or acquired businesses is often disruptive. Since we have acquired or in the future may acquire one or more businesses, there can be no assurance that we will identify appropriate targets, will acquire such businesses on favorable terms, or will be able to successfully integrate such organizations into our business. Failure to do so could materially adversely affect our business, financial condition and results of operations. In addition, we expect to compete against other auction groups or new industry consolidators for suitable acquisitions. If we are able to consummate acquisitions, such acquisitions could be dilutive to earnings, and we could overpay for such acquisitions.

In pursuing a strategy of acquiring other businesses, we face other risks including, but not limited to:

- incurring significantly higher capital expenditures and operating expenses;
- entering new markets with which we are unfamiliar;
- incurring potential undiscovered liabilities at acquired businesses;
- failing to maintain uniform standards, controls and policies;
- impairing relationships with employees and customers as a result of management changes; and
- increasing expenses for accounting and computer systems, as well as integration difficulties.

We may not successfully implement our business strategies or maintain gross profit margins.

We are pursuing strategic initiatives that management considers critical to our long-term success, including but not limited to growing market share and volume, increasing revenue per vehicle and improving customer experiences through internet initiatives, using excess cash flow to reduce debt, leveraging AFC's products and services at ADESA and IAA and continuing to improve operating efficiency. There are significant risks involved with the execution of these initiatives, including significant business, economic and competitive uncertainties, many of which are outside of our control. Accordingly, we cannot predict whether we will succeed in implementing these strategic initiatives. For

example, if we are unsuccessful in continuing to generate significant cash flows from operations (we generated \$305.8 million and \$467.6 million of cash flow from operations for the years ended December 31, 2011 and 2010, respectively), we may be unable to reduce our outstanding indebtedness, which could negatively affect our financial position and results of operations and our ability to execute our other strategies. It could take several years to realize any direct financial benefits from these initiatives if any direct financial benefits from these initiatives are achieved at all. Additionally, our business strategy may change from time to time, which could delay our ability to implement initiatives that we believe are important to our business.

Changes in interest rates or market conditions could adversely impact the profitability and business of AFC.

Rising interest rates may have the effect of depressing the sales of used vehicles because many consumers finance their vehicle purchases. In addition, AFC securitizes a majority of its finance receivables on a revolving basis. Volatility and/or market disruption in the asset-backed securities market in the U.S. or Canada can impact AFC's cost of financing related to, or its ability to arrange financing on acceptable terms through, its securitization facility, which could negatively affect AFC's business and our financial condition and operations.

In addition, AFC typically provides its U.S. dealer customers with financing terms of prime plus a spread, with a prime rate floor of 5%. The U.S. prime rate was 3.25% at December 31, 2011. An increase in interest rates in the near to intermediate term from 3.25% to 5% will compress AFC's margins as the variable cost of securitizing receivables will rise without a corresponding increase in the financing rate AFC charges to its U.S. dealer customers.

Increases in the value of the U.S. dollar relative to certain foreign currencies may negatively impact foreign buyer participation at our auctions.

We have a significant number of non-U.S. based buyers who participate in our auctions. Increases in the value of the U.S. dollar relative to these buyers' local currencies may reduce the prices they are willing to pay at auction, which may negatively affect our revenues.

Weather-related and other events beyond our control may adversely impact operations.

Extreme weather or other events, such as hurricanes, tornadoes, earthquakes, forest fires, floods, terrorist attacks or war, may adversely affect the overall economic environment, the markets in which we compete, our operations and profitability. These events may impact our physical auction facilities, causing a material increase in costs, or delays or cancellation of auction sales, which could have a material adverse impact on our revenues and profitability.

Mild weather conditions tend to result in a decrease in the available supply of salvage vehicles because traffic accidents decrease and fewer automobiles are damaged. Accordingly, mild weather can have an adverse effect on our salvage vehicle inventories, which would be expected to have an adverse effect on our revenue and operating results and related growth rates.

The growing political and scientific sentiment is that increased concentrations of carbon dioxide and other greenhouse gases in the atmosphere may influence the unpredictability, severity and frequency of weather patterns. Changing weather patterns could further impact our operations as described above.

High fuel prices could lead to a reduction in miles driven and may have an adverse effect on our revenues and operating results, as well as our earnings growth rates.

High fuel prices could lead to a reduction in the miles driven per vehicle, which may reduce accident rates. High fuel prices may also disproportionately affect the demand for sport utility and

full-sized vehicles which are generally not as fuel-efficient as smaller vehicles. Retail sales and accident rates are factors that affect the number of used and salvage vehicles sold at auction, wholesale prices of those vehicles and the conversion rates at used vehicle auctions. Additionally, high fuel costs increase the cost of transportation and towing of vehicles and we may not be able to pass on such higher costs to our customers.

A portion of our net income is derived from our international operations, primarily Canada, which exposes us to foreign exchange risks that may impact our financial statements.

Fluctuations between U.S. and foreign currency values may adversely affect our results of operations and financial position, particularly fluctuations with Canadian currency values. In addition, there may be tax inefficiencies in repatriating cash from Canada. For the year ended December 31, 2011, approximately 17% of our revenues were attributable to our Canadian operations. A decrease in the value of the Canadian currency relative to the U.S. dollar would reduce our profits from Canadian operations and the value of the net assets of our Canadian operations when reported in U.S. dollars in our financial statements. This could have a material adverse effect on our business, financial condition or results of operations as reported in U.S. dollars.

In addition, fluctuations in exchange rates may make it more difficult to perform period-to-period comparisons of our reported results of operations. For purposes of accounting, the assets and liabilities of our Canadian operations are translated using period-end exchange rates; such translation gains and losses are reported in “Accumulated other comprehensive income/loss” as a component of stockholders’ equity. The revenues and expenses of our Canadian operations are translated using average exchange rates during each period.

Environmental, health and safety risks could adversely affect our operating results and financial condition.

Our operations are subject to various foreign, federal, state and local environmental, health and safety laws and regulations, including those governing the emission or discharge of pollutants into the air or water, the generation, treatment, storage and release of hazardous materials and wastes and the investigation and remediation of contamination. Our failure to comply with current or future environmental, health or safety laws or to obtain and comply with permits required under such laws, could subject us to significant liability or require costly investigative, remedial or corrective actions.

In the used vehicle remarketing industry, large numbers of vehicles, including wrecked vehicles at salvage auctions, are stored and/or refurbished at auction facilities and during that time minor releases of fuel, motor oil and other materials may occur. We have investigated or remediated, or are currently investigating or remediating, contamination resulting from various sources, including gasoline, fuel additives (such as methyl tertiary butyl ether, or MTBE), motor oil, petroleum products and other hazardous materials released from aboveground or underground storage tanks or in connection with current or former operations conducted at our facilities. In certain instances, contamination has migrated to nearby properties, resulting in claims from private parties. We have incurred and may in the future incur expenditures relating to releases of hazardous materials, investigative, remedial or corrective actions, claims by third parties and other environmental issues, and such expenditures, individually or in the aggregate, could be significant.

Federal and state environmental authorities are currently investigating IAA’s role in contributing to contamination at the Lower Duwamish Waterway Superfund Site in Seattle, Washington. IAA’s potential liability at this site cannot be estimated at this time. See Item 3, “Legal Proceedings” for a further discussion of this matter.

We have a substantial amount of debt, which could impair our financial condition and adversely affect our ability to react to changes in our business.

As of December 31, 2011, our total debt was approximately \$1.9 billion, exclusive of liabilities related to our securitization facilities, and we had \$181.1 million of borrowing capacity under our senior secured credit facilities. In addition, we had related outstanding letters of credit in the aggregate amount of \$28.5 million at December 31, 2011, which reduce the amount available for borrowings under the credit facilities.

Our substantial indebtedness could have important consequences including:

- limiting our ability to borrow additional amounts to fund working capital, capital expenditures, debt service requirements, execution of our business strategy, acquisitions and other purposes;
- requiring us to dedicate a substantial portion of our cash flow from operations to pay principal and interest on debt, which would reduce the funds available for other purposes, including funding future expansion;
- making us more vulnerable to adverse changes in general economic, industry and competitive conditions, in government regulation and in our business by limiting our flexibility in planning for, and making it more difficult to react quickly to, changing conditions; and
- exposing us to risks inherent in interest rate fluctuations because some of our indebtedness is at variable rates of interest, which could result in higher interest expenses in the event of increases in interest rates.

In addition, if we are unable to generate sufficient cash from operations to service our debt and meet other cash needs, we may be forced to reduce or delay capital expenditures, sell assets or operations, seek additional capital or restructure or refinance our indebtedness. We may not be able to refinance our debt or sell additional debt or equity securities or our assets on favorable terms, if at all, particularly because of our high levels of debt and the restrictions imposed by the agreement governing our Credit Facility and the indenture governing our floating senior notes on our ability to incur additional debt and use the proceeds from asset sales. If we must sell certain of our assets, it may negatively affect our ability to generate revenue. The inability to obtain additional financing could have a material adverse effect on our financial condition.

If we cannot make scheduled payments on our debt, we would be in default and, as a result:

- our debt holders could declare all outstanding principal and interest to be due and payable;
- the lenders under our senior secured credit facilities could terminate their commitments to lend us money and foreclose against the assets securing their borrowings; and
- we could be forced into bankruptcy or liquidation.

Restrictive covenants in agreements governing our debt may adversely affect our ability to operate our business.

The indenture governing our floating senior notes and the agreement governing our Credit Facility contain, and future debt instruments may contain, various provisions that limit our ability and the ability of our subsidiaries, including ADESA and IAA, to, among other things:

- incur additional debt;
- provide guarantees in respect of obligations of other persons;
- issue redeemable stock and preferred stock;
- pay dividends or distributions or redeem or repurchase capital stock;

- prepay, redeem or repurchase certain debt;
- make loans, investments and capital expenditures;
- incur liens;
- pay dividends or make other payments by our restricted subsidiaries;
- enter into certain transactions with affiliates;
- sell assets and capital stock of our subsidiaries; and
- consolidate or merge with or into, or sell substantially all of our assets to, another person.

We assume the settlement risk for all vehicles sold through our auctions.

We do not have recourse against sellers for any buyer's failure to satisfy its payment obligations. Since revenue for most vehicles does not include the gross sales proceeds, failure to collect the receivables in full may result in a net loss up to the gross sales proceeds on a per vehicle basis in addition to any expenses incurred to collect the receivables and to provide the services associated with the vehicle. If we are unable to collect payments on a large number of vehicles, the resulting payment obligations to the seller and decreased fee revenues may have a material adverse effect on our results of operations and financial condition.

Changes in laws affecting the importation of salvage vehicles may have an adverse effect on our business and financial condition.

Our internet-based auction services have allowed us to offer our products and services to international markets and has increased our international buyer base. As a result, foreign importers of salvage vehicles now represent a significant part of our total buyer base. Changes in laws and regulations that restrict the importation of salvage vehicles into foreign countries may reduce the demand for salvage vehicles and impact our ability to maintain or increase our international buyer base. For example, in March 2008, a decree issued by the president of Mexico became effective that placed restrictions on the types of vehicles that can be imported into Mexico from the United States. The adoption of similar laws or regulations in other jurisdictions that have the effect of reducing or curtailing our activities abroad could have a material adverse effect on our results of operations and financial condition by reducing the demand for our products and services.

We are partially self-insured for certain losses.

We self-insure a portion of employee medical benefits under the terms of our employee health insurance program, as well as a portion of our automobile, general liability and workers' compensation claims. We record an accrual for the claims expense related to our employee medical benefits, automobile, general liability and workers' compensation claims based upon the expected amount of all such claims. If actual trends, including the severity of claims and medical cost inflation above expectations were to occur, our self-insured costs would increase, which could have an adverse impact on the operating results in that period.

If we fail to attract and retain key personnel, we may not be able to execute our business strategy and our financial results could be negatively affected.

Our success depends in large part on the performance of our executive management team and other key employees, including key field personnel. If we lose the services of one or more of our executive officers or key employees, or if one or more of them decides to join a competitor or otherwise compete with us, we may not be able to effectively implement our business strategies, our business could suffer and the value of our common stock could be materially adversely affected. Our auction business is directly impacted by the business relationships our employees have established with customers and suppliers and, as a result, if we lose key personnel, we may have difficulty in retaining and attracting customers, developing new services, negotiating favorable agreements with customers and providing acceptable levels of customer service. Leadership changes will occur from time to time and we cannot predict whether significant resignations will occur or whether we will be able to recruit additional qualified personnel. We do not currently expect to obtain key person insurance on any of our executive officers.

We are subject to extensive governmental regulations, including vehicle brokerage and auction laws and currency reporting obligations. Our business is subject to risks related to litigation and regulatory actions.

Our operations are subject to regulation, supervision and licensing under various U.S. and Canadian federal, state, provincial and local authorities, agencies, statutes and ordinances, which, among other things, require us to obtain and maintain certain licenses, permits and qualifications, provide certain disclosures and notices and limit interest rates, fees and other charges. The regulations and laws that impact our company include, without limitation, the following:

- The acquisition and sale of used, leased, totaled and recovered theft vehicles are regulated by state or other local motor vehicle departments in each of the locations in which we operate.
- Some of the transport vehicles used at our auctions are regulated by the U.S. Department of Transportation or similar regulatory agencies in Canada and Mexico.
- In many states and provinces, regulations require that a salvage vehicle be forever “branded” with a salvage notice in order to notify prospective purchasers of the vehicle’s previous salvage status.
- Some state, provincial and local regulations limit who can purchase salvage vehicles, as well as determine whether a salvage vehicle can be sold as rebuildable or must be sold for parts or scrap only.
- AFC is subject to laws in certain states and in Canada which regulate commercial lending activities and interest rates and, in certain jurisdictions, require AFC or one of its subsidiaries to be licensed.
- We are subject to various local zoning requirements with regard to the location of our auction and storage facilities, which requirements vary from location to location.

Changes in law or governmental regulations or interpretations of existing law or regulations could result in increased costs, reduced vehicle prices and decreased profitability for us. In addition, failure to comply with present or future laws and regulations or changes in existing laws or regulations or in their interpretation could have a material adverse effect on our operating results and financial condition.

We are also subject from time to time to a variety of legal actions relating to our current and past business operations, including litigation relating to employment-related issues, the environment and insurance claims. There is no guarantee that we will be successful in defending ourselves in legal and administrative actions or in asserting our rights under various laws. In addition we could incur substantial costs in defending ourselves or in asserting our rights in such actions. The costs and other

effects of pending litigation and administrative actions against us cannot be determined with certainty. Although we currently believe that no such proceedings will have a material adverse effect, there can be no assurance that the outcome of such proceedings will be as expected.

We may be subject to patent or other intellectual property infringement claims, which could have an impact on our business or operating results due to a disruption in our business operations, the incurrence of significant costs and other factors.

From time to time, we may receive notices from others claiming that we infringed or otherwise violated their patent or intellectual property rights, and the number of these claims could increase in the future. Claims of intellectual property infringement or other intellectual property violations could require us to enter into licensing agreements on unfavorable terms, incur substantial monetary liability or be enjoined preliminarily or permanently from further use of the intellectual property in question, which could require us to change business practices and limit our ability to compete effectively. Even if we believe that the claims are without merit, the claims can be time-consuming and costly to defend and may divert management's attention and resources away from our businesses. If we are required to take any of these actions, it could have an adverse impact on our business and operating results.

We are dependent on the continued and uninterrupted service from our workforce.

Currently, none of our employees participate in collective bargaining agreements. If we negotiate a first-time collective bargaining agreement, we could be subject to a substantial increase in labor and benefits expenses that we may be unable to pass through to customers for some period of time, if at all. The U.S. Congress could pass labor legislation, such as the proposed Employee Free Choice Act (the "EFCA," also called "card-check legislation"), that could adversely affect our operations. The EFCA would make it significantly easier for union organizing drives to be successful—for example, by eliminating employees' absolute right to a secret ballot vote in union elections—and could give third-party arbitrators the ability to impose terms of collective bargaining agreements upon us and a labor union if we and such union are unable to agree to the terms of a collective bargaining agreement. Such an arbitrated initial contract could include pay, benefit and work rules that could adversely affect our profitability and operational flexibility.

We have a material amount of goodwill which, if it becomes impaired, would result in a reduction in our net income.

Goodwill represents the amount by which the cost of an acquisition accounted for using the purchase method exceeds the fair value of the net assets acquired. Current accounting standards require that goodwill no longer be amortized but instead be periodically evaluated for impairment based on the fair value of the reporting unit. A significant percentage of our total assets represent goodwill primarily associated with the 2007 Transactions. Declines in our profitability or the value of comparable companies may impact the fair value of our reporting units, which could result in a write-down of goodwill and a reduction in net income.

New accounting pronouncements or new interpretations of existing standards could require us to make adjustments to accounting policies that could adversely affect the financial statements.

The Financial Accounting Standards Board, or the FASB, the Public Company Accounting Oversight Board, the SEC, and other accounting organizations or governmental entities from time to time issue new pronouncements or new interpretations of existing accounting standards that require changes to our accounting policies and procedures and could cause us to incur additional costs. To date, we do not believe any new pronouncements or interpretations have had a material adverse effect on our financial condition or results of operations, but future pronouncements or interpretations could require the change of policies or procedures.

Risks Related to Ownership of Our Common Stock

The market price and trading volume of our common stock may be volatile, which could result in rapid and substantial losses for our stockholders.

Before our initial public offering in December 2009, there was no public market for our common stock and an active public market for our common stock may not be sustained. The price of our common stock in any such market may be higher or lower than the price you pay. You should consider an investment in our common stock to be risky, and you should invest in our common stock only if you can withstand a significant loss and wide fluctuations in the market value of your investment. Many factors could cause the market price of our common stock to rise and fall, including the following:

- our announcements or our competitors' announcements regarding new products or services, enhancements, significant contracts, acquisitions or strategic investments;
- changes in earnings estimates or recommendations by securities analysts, if any, who cover our common stock;
- fluctuations in our quarterly financial results or the quarterly financial results of companies perceived to be similar to us;
- changes in our capital structure, such as future issuances of securities, sales of large blocks of common stock by our stockholders or our incurrence of additional debt;
- investors' general perception of us and our industry;
- changes in general economic and market conditions in North America;
- changes in industry conditions; and
- changes in regulatory and other dynamics.

In addition, if the market for stocks in our industry, or the stock market in general, experiences a loss of investor confidence, the trading price of our common stock could decline for reasons unrelated to our business, financial condition or results of operations. If any of the foregoing occurs, it could cause our stock price to fall and may expose us to lawsuits that, even if unsuccessful, could be costly to defend and be a distraction to management.

Future offerings of debt or equity securities, which would rank senior to our common stock, may adversely affect the market price of our common stock.

If, in the future, we decide to issue debt or equity securities that rank senior to our common stock, it is likely that such securities will be governed by an indenture or other instrument containing covenants restricting our operating flexibility. Additionally, any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than those of our common stock and may result in dilution to owners of our common stock. We and, indirectly, our stockholders, will bear the cost of issuing and servicing such securities. Because our decision to issue debt or equity securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings. Thus holders of our common stock will bear the risk of our future offerings reducing the market price of our common stock and diluting the value of their stock holdings in us.

The market price of our common stock could be negatively affected by sales of substantial amounts of our common stock in the public markets.

At February 17, 2012, there were 136,278,613 shares of common stock outstanding. Of our issued and outstanding shares, all of the common stock sold in the December 2009 initial public offering is

freely transferable, except for any shares held by our “affiliates,” as that term is defined in Rule 144 under the Securities Act of 1933, as amended, or the Securities Act. Approximately 78% of our outstanding common stock is held by affiliates of the Equity Sponsors and other equity co-investors (indirectly through their investment in KAR LLC) and members of our management and employees.

In addition, pursuant to a registration rights agreement entered into in connection with the 2007 Transactions, we have granted KAR LLC the right to cause us, in certain instances, at our expense, to file registration statements under the Securities Act covering resales of all shares of our common stock held by KAR LLC. These shares also may be sold pursuant to Rule 144 under the Securities Act, depending on the holding period and subject to restrictions in the case of shares held by persons deemed to be our affiliates. As restrictions on resale end or if KAR LLC exercises its registration rights, the market price of our stock could decline if KAR LLC sells the shares or is perceived by the market as intending to sell them. See Item 13, “Certain Relationships and Related Transactions, and Director Independence.”

We have also filed a registration statement registering under the Securities Act the shares of common stock reserved for issuance in respect of stock options and other incentive awards granted to our officers and certain of our employees. If any of these holders cause a large number of securities to be sold in the public market, the sales could reduce the trading price of our common stock. These sales also could impede our ability to raise future capital.

Provisions in our amended and restated certificate of incorporation and by-laws, and of Delaware law, may prevent or delay an acquisition of us, which could decrease the trading price of our common stock.

Our amended and restated certificate of incorporation and by-laws contain provisions that may be considered to have an anti-takeover effect and may delay or prevent a tender offer or other corporate transaction that a stockholder might consider to be in its best interest, including those transactions that might result in a premium over the market price for our shares. These provisions include:

- limiting the right of stockholders to call special meetings of stockholders to holders of at least 35% of our outstanding common stock;
- rules regarding how our stockholders may present proposals or nominate directors for election at stockholder meetings;
- permitting our board of directors to issue preferred stock without stockholder approval;
- granting to the board of directors, and not the stockholders, the sole power to set the number of directors; and
- authorizing vacancies on our board of directors to be filled only by a vote of the majority of the directors then in office and specifically denying our stockholders the right to fill vacancies in the board.

From and after the time that KAR LLC no longer has beneficial ownership of 35% or more of our outstanding common stock, these provisions will also include:

- authorizing the removal of directors only for cause and only upon the affirmative vote of holders of a majority of the outstanding shares of our common stock entitled to vote for the election of directors; and
- prohibiting stockholder action by written consent.

The Equity Sponsors (through KAR LLC) have a significant influence over us, including control over decisions that require the approval of shareholders, which could limit your ability to influence the outcome of key transactions, including a change of control.

We are indirectly controlled by affiliates of the Equity Sponsors. Affiliates of the Equity Sponsors and management indirectly own through their investment in KAR LLC approximately 78% of our common stock. As a result, affiliates of the Equity Sponsors have control over our decisions to enter into any corporate transaction and the ability to prevent any transaction that requires shareholder approval regardless of whether others believe that the transaction is in our best interests. So long as the Equity Sponsors continue to indirectly hold a majority of our outstanding common stock, they will have the ability to control the vote in any election of directors.

We have entered into a director designation agreement that provides for the rights of KAR LLC directly, and the Equity Sponsors indirectly, to nominate designees to our board of directors. See Item 13, "Certain Relationships and Related Transactions, and Director Independence."

The Equity Sponsors are also in the business of making investments in companies and may from time to time acquire and hold interests in businesses that compete directly or indirectly with us. The Equity Sponsors may also pursue acquisition opportunities that are complementary to our business and, as a result, those acquisition opportunities may not be available to us. So long as the Equity Sponsors, or other funds controlled by or associated with the Equity Sponsors, continue to indirectly own a significant amount of our outstanding common stock, even if such amount is less than 50%, the Equity Sponsors will continue to be able to strongly influence or effectively control our decisions. The concentration of ownership may have the effect of delaying, preventing or deterring a change of control of our company, could deprive shareholders of an opportunity to receive a premium for their common stock as part of a sale of our company and might ultimately affect the market price of our common stock.

Under our amended and restated certificate of incorporation, the Equity Sponsors and, in some circumstances, any of our directors and officers who is also a director, officer, manager, member or employee of any of our Equity Sponsors, have no obligation to offer us corporate opportunities.

Our amended and restated certificate of incorporation provides that the Equity Sponsors and their respective subsidiaries and affiliates have the right to engage or invest in, and do not have a duty to abstain from engaging or investing in, the same or similar businesses as us, do business with any of our clients, customers or vendors or employ or otherwise engage any of our officers, directors or employees. If any Equity Sponsor or any of its officers, directors, managers, members, partners or employees acquires knowledge of a potential transaction that could be a corporate opportunity for us, such person has no duty to offer that opportunity to us, our stockholders or our affiliates, even if it is one that we might reasonably have pursued. Neither the Equity Sponsors nor their officers, directors, managers, members, partners or employees will generally be liable to us or our stockholders for breach of any duty by reason of engaging in such activities. In addition, any of our directors and officers who is also a director, officer, manager, member, partner or employee of any of our Equity Sponsors and is offered or acquires knowledge of a corporate opportunity, other than solely in such person's capacity as our director or officer, will not have any liability to us if any of the Equity Sponsors pursues or acquires such corporate opportunity.

We do not currently intend to pay dividends on our common stock and, consequently, your ability to achieve a return on your investment will depend on appreciation in the price of our common stock.

We do not expect to declare or pay any cash or other dividends in the foreseeable future on our common stock. We anticipate that we will retain all of our future earnings, if any, for the repayment of our indebtedness and for general corporate purposes including the development and expansion of our

business. Any determination to pay dividends on our common stock in the future will be at the discretion of our board of directors.

We are a “controlled company” within the meaning of the NYSE rules and, as a result, will qualify for, and intend to rely on, exemptions from certain corporate governance requirements. You will not have the same protections afforded to shareholders of companies that are subject to such requirements

KAR LLC controls a majority of the voting power of our outstanding common stock. As a result, we are a “controlled company” within the meaning of the NYSE corporate governance standards. Under these rules, a company of which more than 50% of the voting power is held by an individual, group or another company is a “controlled company” and may elect not to comply with certain corporate governance requirements, including:

- the requirement that a majority of the Board of Directors consist of independent directors;
- the requirement that we have a nominating/corporate governance committee that is composed entirely of independent directors with a written charter addressing the committee’s purpose and responsibilities;
- the requirement that we have a compensation committee that is composed entirely of independent directors with a written charter addressing the committee’s purpose and responsibilities; and
- the requirement for an annual performance evaluation of the nominating/corporate governance and compensation committees.

We are utilizing these exemptions. As a result, we do not have a majority of independent directors, our nominating/corporate governance committee and compensation committee do not consist entirely of independent directors and such committees are not subject to annual performance evaluations. Accordingly, you do not have the same protections afforded to shareholders of companies that are subject to all of the corporate governance requirements of the NYSE.

Item 1b. Unresolved Staff Comments

None.

Item 2. Properties

Our corporate headquarters are located in Carmel, Indiana. Our corporate headquarters for ADESA and AFC also are located in Carmel, Indiana. Our corporate headquarters are leased properties, with office space being leased in each case through 2019. At December 31, 2011, properties utilized by the ADESA business segment include 69 used vehicle auction facilities in North America, which are either owned or leased. Each auction is generally a multi-lane, drive-through facility, and may have additional buildings for reconditioning, registration, maintenance, bodywork, and other ancillary and administrative services. Each auction also has secure parking areas to store vehicles. The ADESA auction facilities vary in size based on the market demographics and offer anywhere from 1 to 16 auction lanes, with an average of approximately 7 lanes per location.

IAA is headquartered in Westchester, Illinois, with office space being leased through 2016. At December 31, 2011, properties utilized by the IAA business segment include 159 salvage vehicle auction facilities in the U.S. and Canada, most of which are leased. Salvage auctions are generally smaller than used vehicle auctions in terms of acreage and building size and some locations share facilities with ADESA. The IAA properties are used primarily for auction and storage purposes consisting on average of approximately 27 acres of land per site.

Of AFC's 103 locations in North America at December 31, 2011, 72 are physically located at auction facilities (including 53 at ADESA). Each of the remaining AFC offices is strategically located in close proximity to at least one of the auctions that it serves. AFC generally leases its branches.

We believe our existing properties are adequate to meet current needs and that suitable additional space will be available as needed to accommodate any expansion of operations and additional offices on commercially acceptable terms.

Item 3. Legal Proceedings

We are involved in litigation and disputes arising in the ordinary course of business, such as actions related to injuries; property damage; handling, storage or disposal of vehicles; environmental laws and regulations; and other litigation incidental to the business such as employment matters and dealer disputes. Such litigation is generally not, in the opinion of management, likely to have a material adverse effect on our financial condition, results of operations or cash flows. Legal and regulatory proceedings which could be material are discussed below.

IAA—Lower Duwamish Waterway

On March 25, 2008, the United States Environmental Protection Agency, or EPA, issued a General Notice of Potential Liability (the "General Notice") pursuant to Section 107(a), and a Request for Information pursuant to Section 104(e) of the Comprehensive Environmental Response, Compensation, and Liability Act, or "CERCLA" to IAA for a Superfund site known as the Lower Duwamish Waterway ("LDW") Superfund Site in Seattle, Washington. IAA operates a branch on property it leases in Tukwila, Washington, which is located adjacent to the LDW. At this time, the EPA has not demanded that IAA pay any funds or take any action apart from responding to the Section 104(e) Information Request. The EPA has advised IAA that, to date, it has sent out approximately 60 general notice letters to other parties, and has sent Section 104(e) Requests to more than 250 other parties. A remedial investigation has been conducted for this site by some of the potentially responsible parties, who have also commenced a feasibility study pursuant to CERCLA. IAA is aware that certain authorities plan to bring Natural Resource Damage claims against potentially responsible parties. In the General Notice, the EPA informed IAA that it may be a potentially responsible party based on presently available information. At this time, the Company does not have adequate information to determine IAA's responsibility for contamination at this site, if any, or to estimate IAA's loss as a result of this potential liability.

In addition, the Washington State Department of Ecology is working with the EPA in relation to the LDW, primarily to investigate and address sources of potential contamination contributing to the LDW. IAA, the current Tukwila property owner and the former Tukwila property owner are currently in discussion with the Washington State Department of Ecology concerning possible source control obligations, including an investigation of the water and soils entering the stormwater system, an analysis of the source of any contamination identified within the system and possible repairs and upgrades to the stormwater capture and filtration system. In 2011, IAA submitted results of its stormwater system investigation to comply with the Washington State Department of Ecology source control requirements. Additional source control obligations, if any, are not expected to have a material impact on future recurring operating costs.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information and Holders of Record

KAR Auction Services' common stock is traded on the New York Stock Exchange ("NYSE") under the symbol "KAR" and has been traded on the NYSE since December 11, 2009. As of February 17, 2012, there were 3 stockholders of record. Because many shares of our common stock are held by brokers and other institutions on behalf of stockholders, we are unable to estimate the total number of stockholders represented by these holders of record.

The following table sets forth the range of high and low sales prices per share of common stock for each quarter during fiscal years 2011 and 2010:

	2011	
	High	Low
4 th Quarter (October 1 - December 31)	\$14.53	\$10.92
3 rd Quarter (July 1 - September 30)	\$19.64	\$11.92
2 nd Quarter (April 1 - June 30)	\$21.00	\$15.30
1 st Quarter (January 1 - March 31)	\$15.74	\$13.75
	2010	
	High	Low
4 th Quarter (October 1 - December 31)	\$14.37	\$11.74
3 rd Quarter (July 1 - September 30)	\$13.73	\$11.03
2 nd Quarter (April 1 - June 30)	\$15.84	\$11.52
1 st Quarter (January 1 - March 31)	\$15.56	\$13.10

Dividend Policy

We do not anticipate paying cash dividends on our common stock. We anticipate that we will retain all of our future earnings, if any, for the repayment of our indebtedness and for general corporate purposes, including the development and expansion of our business. Any determination to pay dividends in the future will be at the discretion of our board of directors and will be dependent on then-existing conditions, including our financial condition and results of operations, contractual restrictions, including restricting covenants contained in our credit facilities, capital requirements and other factors.

In addition, pursuant to certain covenants governing our senior credit facility and notes, we are subject to certain restrictions on our ability to pay dividends.

Stock Price Performance Graph

The graph below shows the cumulative total stockholder return, assuming the investment of \$100, for the period beginning on December 11, 2009, the first trading day of KAR Auction Services' common stock, and ending on December 31, 2011, on each of KAR Auction Services' common stock, the Standard & Poor's 400 Midcap Index and the Standard and Poor's Smallcap 600 Index. Our stock price performance shown in the following graph is not indicative of future stock price performance.

Comparison of Cumulative Total Return

<u>Company/Index</u>	<u>Base Period</u> <u>12/11/2009</u>	<u>12/31/2009</u>	<u>12/31/2010</u>	<u>12/31/2011</u>
KAR Auction Services, Inc.	\$100	\$114.63	\$114.71	\$112.22
S&P 400 Midcap Index	\$100	\$102.94	\$128.52	\$124.54
S&P Smallcap 600 Index	\$100	\$104.86	\$131.05	\$130.85

Item 6. Selected Financial Data

The following selected financial data should be read in conjunction with “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” the audited consolidated financial statements and related notes thereto of KAR Auction Services, Inc. and other financial information included elsewhere in this Annual Report on Form 10-K.

**Selected Financial Data of KAR Auction Services
For the Years Ended December 31, 2011, 2010, 2009, 2008 and 2007**

The following consolidated financial data for the years ended December 31, 2011, 2010, 2009, 2008 and 2007 is based on our audited financial statements. We were incorporated on November 9, 2006, but had no operations in 2006 or for the period of January 1 through April 19, 2007. On April 20, 2007, we consummated a merger agreement with ADESA, Inc. and as part of the related transactions, ADESA and IAA became, directly or indirectly, our wholly owned subsidiaries.

	Year Ended December 31,				
	2011	2010	2009	2008	2007 (1)
Operations:					
Operating revenues					
ADESA	\$1,017.4	\$1,075.9	\$1,088.5	\$1,123.4	\$ 677.7
IAA	700.1	610.4	553.1	550.3	330.1
AFC (2)	168.8	136.3	93.9	102.3	98.3
Total operating revenues	\$1,886.3	\$1,822.6	\$1,735.5	\$1,776.0	\$1,106.1
Operating expenses (exclusive of depreciation and amortization and impairment charges) (2)	1,424.6	1,382.5	1,367.8	1,441.3	873.1
Goodwill and other intangibles impairment	—	—	—	164.4	—
Operating profit (loss)	281.9	268.8	195.3	(12.5)	106.4
Interest expense	143.1	141.4	172.6	215.2	162.3
Income (loss) from continuing operations	90.0	69.6	23.2	(216.2)	(38.3)
Net income (loss)	72.2	69.6	23.2	(216.2)	(38.3)
Net income (loss) per share					
Basic	0.53	0.52	0.21	(2.02)	(0.36)
Diluted	0.52	0.51	0.21	(2.02)	(0.36)
Weighted average shares outstanding					
Basic	136.0	134.9	108.0	106.9	106.7
Diluted	137.8	135.9	108.1	106.9	106.7
	At December 31,				
	2011	2010	2009	2008	2007
Financial Position:					
Working capital (3)	\$ 177.0	\$ 287.9	\$ 299.5	\$ 304.3	\$ 442.1
Total assets	4,779.1	4,525.0	4,251.3	4,157.6	4,530.8
Total debt, net of unamortized debt discount	1,902.8	1,875.7	2,272.9	2,527.4	2,616.7
Total stockholders’ equity	1,343.2	1,244.6	1,141.5	750.7	1,013.6

	Year Ended December 31,				
	2011	2010	2009	2008	2007 (1)
Other Financial Data:					
Net cash provided by operating activities	\$305.8	\$467.6	\$250.8	\$224.9	\$ 96.8
Capital expenditures	85.8	78.9	65.6	129.6	62.7
Depreciation and amortization	179.8	171.3	172.4	182.8	126.6

- (1) We had no operations prior to the merger transactions on April 20, 2007; as such, this data represents the period from April 20, 2007 through December 31, 2007.
- (2) Prior to 2011, certain AFC fees collected from customers were netted against cost of services, as well as certain selling, general and administrative expenses. Such fees included lot check fees, filing fees and postage fees, each of which are charged to and collected from AFC's customers. Beginning in 2011, these fees were included in revenue with the corresponding costs reflected in their respective expense categories, resulting in an increase to revenue, as well as an increase to the related expenses for all periods presented. Prior year amounts have been revised to reflect these changes.
- (3) Working capital is defined as current assets less current liabilities.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with the “Selected Financial Data” and the consolidated financial statements and notes thereto included elsewhere in this Annual Report on Form 10-K.

Forward-Looking Statements

This Annual Report on Form 10-K contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and which are subject to certain risks, trends and uncertainties. In particular, statements made in this report on Form 10-K that are not historical facts (including, but not limited to, expectations, estimates, assumptions and projections regarding the industry, business, future operating results, potential acquisitions and anticipated cash requirements) may be forward-looking statements. Words such as “should,” “may,” “will,” “anticipates,” “expects,” “intends,” “plans,” “believes,” “seeks,” “estimates,” and similar expressions identify forward-looking statements. Such statements, including statements regarding our future growth; anticipated cost savings, revenue increases and capital expenditures; strategic initiatives, greenfields and acquisitions; our competitive position; and our continued investment in information technology are not guarantees of future performance and are subject to risks and uncertainties that could cause actual results to differ materially from the results projected, expressed or implied by these forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in Item 1A “Risk Factors” of this Annual Report on Form 10-K. Some of these factors include:

- fluctuations in consumer demand for and in the supply of used, leased and salvage vehicles and the resulting impact on auction sales volumes, conversion rates and loan transaction volumes;
- trends in new and used vehicle sales and incentives, including wholesale used vehicle pricing;
- the ability of consumers to lease or finance the purchase of new and/or used vehicles;
- the ability to recover or collect from delinquent or bankrupt customers;
- economic conditions including fuel prices, foreign exchange rates and interest rate fluctuations;
- trends in the vehicle remarketing industry;

- changes in the volume of vehicle production, including capacity reductions at the major original equipment manufacturers;
- increases in the number of used and salvage vehicles purchased on virtual auction platforms;
- the introduction of new competitors;
- laws, regulations and industry standards, including changes in regulations governing the sale of used vehicles, the processing of salvage vehicles and commercial lending activities;
- changes in the market value of vehicles auctioned, including changes in the actual cash value of salvage vehicles;
- competitive pricing pressures;
- costs associated with the acquisition of businesses or technologies;
- litigation developments;
- our ability to successfully implement our business strategies or realize expected cost savings and revenue enhancements;
- our ability to develop and implement information systems responsive to customer needs;
- business development activities, including acquisitions and integration of acquired businesses;
- the costs of environmental compliance and/or the imposition of liabilities under environmental laws and regulations;
- weather;
- general business conditions;
- our substantial amount of debt;
- restrictive covenants in our debt agreements;
- our assumption of the settlement risk for vehicles sold;
- any impairment to our goodwill or other intangible assets;
- our self-insurance for certain risks;
- any losses of key personnel;
- interruptions to service from our workforce;
- changes in effective tax rates;
- changes to accounting standards; and
- other risks described from time to time in our filings with the SEC, including the Quarterly Reports on Form 10-Q to be filed by us in 2012.

Many of these risk factors are outside of our control, and as such, they involve risks which are not currently known that could cause actual results to differ materially from those discussed or implied herein. The forward-looking statements in this document are made as of the date on which they are made and we do not undertake to update our forward-looking statements.

Our future growth depends on a variety of factors, including our ability to increase vehicle sold volumes and loan transaction volumes, expand our product and service offerings including information systems development, acquire and integrate additional business entities, manage expansion, control costs in our operations, introduce fee increases, and retain our executive officers and key employees.

Certain initiatives that management considers important to our long-term success include projects involving substantial capital investment in e-business, information technology, facility relocations and expansions, as well as operating initiatives designed to enhance overall efficiencies, all of which have significant risks associated with their execution, and could take several years to yield any direct monetary benefits. Accordingly, we cannot predict whether our growth strategy will be successful. In addition, we cannot predict what portion of overall sales will be conducted through online auctions or other remarketing methods in the future and what impact this may have on our auction business.

Overview

We provide whole car and salvage auction services in North America. Our business is divided into three reportable business segments, each of which is an integral part of the vehicle remarketing industry: ADESA Auctions, IAA and AFC.

- The ADESA Auctions segment serves an international customer base through online auctions and through 69 whole car auction facilities in North America, that are developed and strategically located to draw professional sellers and buyers together and allow the buyers to inspect and compare vehicles remotely or in person. Online auctions include OPENLANE, a leader in internet-based remarketing solutions, and allow the Company to offer vehicles for sale from any location. Vehicles at ADESA's auctions are typically sold by commercial fleet operators, financial institutions, rental car companies, used vehicle dealers and vehicle manufacturers and their captive finance companies to franchised and independent used vehicle dealers. ADESA also provides value-added ancillary services including inspections, storage, transportation, reconditioning and titling and other administrative services.
- The IAA segment consisted of salvage vehicle auctions and related services provided at 159 sites in North America at December 31, 2011. The salvage auctions facilitate the remarketing of damaged or low value vehicles designated as total losses by insurance companies and charity donation vehicles, as well as recovered stolen (or theft) vehicles. The salvage auction business specializes in providing services such as transportation, titling, salvage recovery and claims settlement administrative services.
- The AFC segment provides short-term, inventory-secured financing, known as floorplan financing, primarily to independent used vehicle dealers. At December 31, 2011, AFC conducted business at 103 locations in North America.

The holding company is maintained separately from the three reportable segments and includes expenses associated with the corporate office, such as salaries, benefits, and travel costs for our management team, certain human resources, information technology and accounting costs, and certain insurance, treasury, legal and risk management costs. Holding company interest expense includes the interest expense incurred on the corporate debt structure. Intercompany charges relate primarily to interest on intercompany debt or receivables and certain information technology costs allocated by the holding company.

Industry Outlook and Trends

Whole Car

In 2010 and 2011, the North American whole car auction industry experienced supply shortages as a result of the impacts felt by the automotive industry over the last three years, including volatility in new vehicle sales, lease originations and repossessions. The supply shortages resulted in a decline in whole car auction volume compared to prior years. Used vehicles sold in North America through whole car auctions were 9.1 million, 8.4 million and an estimated 7.7 million (excluding approximately 0.3 million used vehicles sold by OPENLANE in 2011) in 2009, 2010, and 2011, respectively. The supply

shortages and resulting decline in industry auction volumes reflect a reduction in units sold by institutional consignors. This reduction has been partially offset by an increase in dealer consignment units sold in 2010 and 2011.

Other reasons for the decline in industry volumes, which may also impact future volumes include:

- A decline in new car sales from 17.0 million in 2005 to 10.4 million in 2009. Although new car sales have climbed over the last two years to approximately 12.8 million units in 2011, they are not anticipated to return to 2005 levels for the foreseeable future.
- The drop in total new vehicle sales in 2008 and 2009, coupled with a tightening of consumer credit and changing policies regarding delinquent loans by the major lenders, resulted in a decline in repossessed vehicles coming to auction.
- Lease residuals are currently below wholesale vehicle values. As a result, more vehicles are purchased upstream by the consumer and the grounding dealer or by dealers in online auctions, prior to the vehicles being transported to a physical auction.
- More dealers are choosing to sell the trade-ins they receive rather than remarket them through whole car auctions. As used vehicle prices have increased over the last few years, dealers have shifted to sell more used vehicles, which can generate better margins than new car sales. These dealers can also make money on the used units by providing future maintenance as well as finance and insurance services.
- There was a reduction in the number of lease originations in 2008 and 2009. We believe this decline will continue to negatively impact the supply of off-lease vehicles available at auction in 2012 and this trend could continue beyond 2012.

Based on the factors discussed above, we estimate that used vehicle auction volumes in North America, including units sold by OPENLANE, will be approximately 8 million units in 2012, approach 8.4 million units in 2013 and are expected to reach nearly 9 million units by 2015.

Salvage

Vehicles deemed a total loss by automobile insurance companies represent the largest category of vehicles sold in the salvage vehicle auction industry. As vehicles become increasingly more complex with additional enhancements, such as airbags and electrical components, they are more costly to repair following an accident and insurance companies are more likely to declare a damaged vehicle a total loss. The percentage of claims resulting in total losses is estimated at 13.9% for 2011, down slightly from 2010. There is no central reporting system that tracks the number of total loss vehicles in any given year which makes estimating industry volumes very difficult.

Automotive Finance

In 2008 and 2009, the overall economy and in particular the automotive finance industries faced pressures, which negatively affected the used vehicle dealer base. More than 6,300 independent dealers went out of business during 2008 and 2009, representing almost a 15% reduction in the independent dealer base. Used vehicle dealers experienced a significant decline in sales which resulted in a decrease in consumer auto loan originations and an increased number of dealers defaulting on their loans, which increased credit losses. In addition, the value of recovered collateral on defaulted loans was impacted to some degree by the volatility in the vehicle pricing market. To the extent these negative trends recur, they could have a material adverse impact on AFC's results of operations.

Despite the negative factors and trends that impacted the automotive finance industry in 2008 and 2009, AFC's financial results have steadily improved since that time. AFC implemented a number of strategic initiatives in 2008 and early 2009 designed to tighten credit standards and reduce risk and

exposure in its portfolio of finance receivables. These initiatives have resulted in a substantial ongoing improvement in the aging of the managed portfolio, which was approximately 99 percent current at December 31, 2011. In addition, AFC's managed portfolio of finance receivables grew approximately 14 percent from \$771.6 million at December 31, 2010 to \$883.2 million at December 31, 2011.

Seasonality

The volume of vehicles sold at our auctions generally fluctuates from quarter to quarter. This seasonality is caused by several factors including weather, the timing of used vehicles available for sale from selling customers, the availability and quality of salvage vehicles, holidays, and the seasonality of the retail market for used vehicles, which affects the demand side of the auction industry. Used vehicle auction volumes tend to decline during prolonged periods of winter weather conditions. In addition, mild weather conditions and decreases in traffic volume can each lead to a decline in the available supply of salvage vehicles because fewer traffic accidents occur, resulting in fewer damaged vehicles overall. As a result, revenues and operating expenses related to volume will fluctuate accordingly on a quarterly basis. The fourth calendar quarter typically experiences lower used vehicle auction volume as well as additional costs associated with the holidays and winter weather.

Sources of Revenues and Expenses

Our revenue is derived from auction fees and related services at our whole car and salvage auctions, and from dealer financing fees and interest income at AFC. Although auction revenues primarily include the auction services and related fees, our related receivables and payables include the gross value of the vehicles sold.

Prior to January 1, 2010, AFC's net revenue consisted primarily of securitization income and interest and fee income less provisions for credit losses. Securitization income was primarily comprised of the gain on sale of finance receivables sold, but also included servicing income, discount accretion, and any change in the fair value of the retained interest in finance receivables sold. Accounting Standards Update 2009-16 amended ASC 860, *Transfers and Servicing*, and we adopted the guidance on January 1, 2010. As a result of adopting the guidance, our consolidated statement of income no longer reflects securitization income, but instead reports interest and fee income, provision for credit losses and other income associated with our securitized finance receivables, in the same line items in our statement of income as non-securitized receivables. Interest expense associated with the related obligation is now recorded below operating profit as "Interest expense" in our consolidated statement of income. Additionally, we no longer record a gain on sale for securitization activity since finance receivables securitized no longer receive gain on sale treatment.

Prior to 2011, certain AFC fees collected from customers were netted against cost of services, as well as certain selling, general and administrative expenses. Such fees included lot check fees, filing fees and postage fees, each of which are charged to and collected from AFC's customers. At December 31, 2011, these fees were included in revenue with the corresponding costs reflected in their respective expense categories, resulting in an increase to "Other revenue" as well as an increase to the related expenses for prior periods presented.

Our operating expenses consist of cost of services, selling, general and administrative and depreciation and amortization. Cost of services is composed of payroll and related costs, subcontract services, supplies, insurance, property taxes, utilities, maintenance and lease expense related to the auction sites and loan offices. Cost of services excludes depreciation and amortization. Selling, general and administrative expenses are composed of payroll and related costs, sales and marketing, information technology services and professional fees.

Results of Operations

Overview of Results of KAR Auction Services for the Years Ended December 31, 2011 and 2010:

(Dollars in millions except per share amounts)	Year Ended December 31,	
	2011	2010
Revenues		
ADESA	\$1,017.4	\$1,075.9
IAA	700.1	610.4
AFC	168.8	136.3
Total revenues	<u>1,886.3</u>	<u>1,822.6</u>
Cost of services*	<u>1,035.2</u>	<u>1,007.3</u>
Gross profit*	851.1	815.3
Selling, general and administrative	389.4	375.2
Depreciation and amortization	179.8	171.3
Operating profit	281.9	268.8
Interest expense	143.1	141.4
Other income, net	(4.7)	(2.1)
Loss on extinguishment of debt	53.5	32.7
Income before income taxes	90.0	96.8
Income taxes	17.8	27.2
Net income	<u>\$ 72.2</u>	<u>\$ 69.6</u>
Net income per share		
Basic	<u>\$ 0.53</u>	<u>\$ 0.52</u>
Diluted	<u>\$ 0.52</u>	<u>\$ 0.51</u>

* Exclusive of depreciation and amortization

For the year ended December 31, 2011, we had revenue of \$1,886.3 million compared with revenue of \$1,822.6 million for the year ended December 31, 2010, an increase of 3%. For a further discussion of revenues, gross profit and selling, general and administrative expenses, see the segment results discussions below.

Depreciation and Amortization

Depreciation and amortization increased \$8.5 million, or 5%, to \$179.8 million for the year ended December 31, 2011, compared with \$171.3 million for the year ended December 31, 2010. The increase was representative of increased amortization resulting from certain assets placed in service during 2010 and 2011. In addition, OPENLANE had \$3.8 million of depreciation and amortization in the fourth quarter of 2011.

Interest Expense

Interest expense increased \$1.7 million, or 1%, to \$143.1 million for the year ended December 31, 2011, compared with \$141.4 million for the year ended December 31, 2010. The increase in interest expense was primarily the result of the second quarter 2011 recognition of \$14.5 million in additional interest expense related to the settlement and termination of our \$650 million notional swap agreement, which was used to hedge interest payments on Old Term Loan B. Partially offsetting the increase was a decrease in interest expense as a result of \$143.3 million in prepayments on long-term

debt in the fourth quarter of 2010, the prepayments of \$450.0 million aggregate principal amount outstanding on our fixed senior notes and \$131.1 million aggregate principal amount outstanding on our senior subordinated notes, and the termination of our \$1,144.6 million Old Term Loan B in the second quarter of 2011.

Other Income

Other income was \$4.7 million for the year ended December 31, 2011, compared with \$2.1 million for the year ended December 31, 2010. In 2011, we reversed contingent consideration of approximately \$4.6 million related to certain prior year acquisitions based on revised forecasts which indicated the unit volumes required during the measurement period in order for the contingent consideration to become payable would not be met. This increase was partially offset by foreign currency transaction losses for the year ended December 31, 2011, compared with foreign currency transaction gains for the year ended December 31, 2010.

Loss on Extinguishment of Debt

In May 2011, we terminated our previous credit facility, dated as of April 20, 2007. In addition, in June 2011, we prepaid the \$450.0 million aggregate principal amount outstanding on our fixed senior notes and the \$131.1 million aggregate principal amount outstanding on our senior subordinated notes with proceeds received from New Term Loan B and cash on hand. In the second quarter of 2011, we recorded a \$24.5 million pretax charge representative of the write-off of certain unamortized debt issuance costs associated with our Old Term Loan B. In the second quarter of 2011, we also recorded a \$29.0 million pretax charge representative of the net premiums payable related to the repurchase of our fixed senior notes and the senior subordinated notes, the write-off of certain unamortized debt issuance costs associated with these notes, as well as certain expenses related to the prepayment of these notes.

In connection with our initial public offering in 2009, we conducted a cash tender offer for certain of our notes. The tender offer was oversubscribed and as such, in accordance with the identified priority levels, only a portion of our senior subordinated notes tendered were accepted for prepayment. In January 2010, we prepaid \$225.6 million principal amount of our senior subordinated notes with proceeds received from our initial public offering and the underwriters option to purchase additional shares. In the first quarter of 2010, we recorded a \$25.3 million pretax charge representative of the net premiums payable related to the repurchase of our senior subordinated notes, the write-off of certain unamortized debt issuance costs associated with our senior subordinated notes and certain expenses related to the tender offer.

In addition, in the fourth quarter of 2010, we conducted a cash tender offer for certain of our notes. The tender offer was oversubscribed and as such, in accordance with the identified priority levels, only a portion of our senior subordinated notes tendered were accepted for prepayment. In December 2010, we prepaid \$68.3 million principal amount of our senior subordinated notes with available cash and recorded a \$7.4 million pretax charge representative of the net premiums payable related to the repurchase of our senior subordinated notes, the write-off of certain unamortized debt issuance costs associated with our senior subordinated notes and certain expenses related to the tender offer.

Income Taxes

We had an effective tax rate of 19.8% for the year ended December 31, 2011, compared with 28.1% for the year ended December 31, 2010. During the year ended December 31, 2011, our effective tax rate of 19.8% benefited from the reversal of \$18.6 million in tax reserves for uncertain tax positions due to the expiration of certain statute of limitations. During the year ended December 31, 2010, our effective rate of 28.1% also benefited from the release of tax reserves for uncertain tax positions due to

the expiration of certain statute of limitations and the recognition of previously unrecognized deferred tax assets. Excluding the effect of these items in both years, our effective tax rates for the years ended December 31, 2011 and December 31, 2010 would have been 40.2% and 38.3%, respectively. The change in the tax rate, excluding the effect of discrete items, was primarily attributable to the differences in tax rates in state and foreign jurisdictions.

ADESA Results

(Dollars in millions)	Year Ended December 31,	
	2011	2010
ADESA revenue	\$1,017.4	\$1,075.9
Cost of services*	582.3	611.2
Gross profit*	435.1	464.7
Selling, general and administrative	219.6	211.9
Depreciation and amortization	88.1	86.9
Operating profit	\$ 127.4	\$ 165.9

* Exclusive of depreciation and amortization

Revenue

Revenue from ADESA decreased \$58.5 million, or 5%, to \$1,017.4 million for the year ended December 31, 2011, compared with \$1,075.9 million for the year ended December 31, 2010. The decrease in revenue was primarily a result of a 7% decrease in the number of vehicles sold, partially offset by a 2% increase in revenue per vehicle sold to approximately \$585 for the year ended December 31, 2011, compared to over \$570 for the year ended December 31, 2010.

The 2% increase in revenue per vehicle sold was attributable to incremental fee income related to selective fee increases, which resulted in increased ADESA revenue of approximately \$20.1 million. In addition, fluctuations in the Canadian exchange rate resulted in increased ADESA revenue of approximately \$9.6 million, partially offset by decreases in ancillary services, which resulted in decreased ADESA revenue of approximately \$6.5 million.

The total number of used vehicles sold at ADESA decreased 7% for the year ended December 31, 2011, compared with the year ended December 31, 2010, and resulted in a decrease in ADESA revenue of approximately \$81.7 million. Excluding OPENLANE, the total number of used vehicles sold at ADESA decreased 10% for the year ended December 31, 2011 compared with the year ended December 31, 2010. The decrease in volume sold was attributable to a decline in supplier inventory levels, partially offset by a 13% (excluding OPENLANE) increase in dealer consignment units sold in 2011 compared with 2010. Online sales volumes for ADESA in 2011 represented approximately 24% of the total vehicles sold by ADESA, compared with over 20% in 2010. Excluding OPENLANE units sold in the fourth quarter, online sales volumes for ADESA would have been approximately 22% in 2011.

The used vehicle conversion percentage, calculated as the number of vehicles sold as a percentage of the number of vehicles entered for sale at our used vehicle auctions, decreased to 60.7% (excluding OPENLANE) for the year ended December 31, 2011, compared with 65.0% for the year ended December 31, 2010. The decrease in conversion rates is representative of a change in the mix of vehicles sold toward more dealer consignment vehicles, which convert at a lower rate, as dealers have the option of returning vehicles to their stores for retail sale. For the year ended December 31, 2011, dealer consignment vehicles represented approximately 42% (excluding OPENLANE) of used vehicles sold at ADESA, an increase from approximately 33% for the year ended December 31, 2010.

Gross Profit

For the year ended December 31, 2011, gross profit for ADESA decreased \$29.6 million, or 6%, to \$435.1 million, compared with \$464.7 million for the year ended December 31, 2010. Gross profit for ADESA was 42.8% of revenue for the year ended December 31, 2011, compared with 43.2% of revenue for the year ended December 31, 2010. The decrease in gross profit as a percentage of revenue for the year ended December 31, 2011, compared with the year ended December 31, 2010 was primarily the result of the 7% decrease in the number of vehicles sold and a decrease in conversion rates. Lower conversion rates result in incremental labor associated with handling the same vehicles more than once.

Selling, General and Administrative

Selling, general and administrative expenses for the ADESA segment increased \$7.7 million, or 4%, to \$219.6 million for the year ended December 31, 2011, compared with \$211.9 million for the year ended December 31, 2010, primarily due to the acquisition of OPENLANE, which accounted for approximately \$10.8 million of the increase and fluctuations in the Canadian exchange rate, partially offset by decreases in compensation and incentive compensation, as well as a decrease in marketing costs and other miscellaneous expenses.

IAA Results

(Dollars in millions)	Year Ended December 31,	
	2011	2010
IAA revenue	\$700.1	\$610.4
Cost of services*	415.3	362.0
Gross profit*	284.8	248.4
Selling, general and administrative	82.3	78.9
Depreciation and amortization	65.8	58.9
Operating profit	<u>\$136.7</u>	<u>\$110.6</u>

* Exclusive of depreciation and amortization

Revenue

Revenue from IAA increased \$89.7 million, or 15%, to \$700.1 million for the year ended December 31, 2011, compared with \$610.4 million for the year ended December 31, 2010. The increase in revenue was a result of several factors, including an increase in vehicles sold of approximately 9% for the year ended December 31, 2011. In addition, there was an increase in fee revenue per unit due to an increase in average selling price for vehicles sold. An increase in the sales of purchased vehicles, in which the entire selling price of the vehicle is recorded as revenue, has also contributed to the growth in revenue for salvage vehicles sold for the year ended December 31, 2011. Purchased vehicles represented approximately 5% of total salvage vehicles sold. Online sales volumes for IAA for the years ended December 31, 2011 and 2010 represented approximately half of the total vehicles sold by IAA.

Gross Profit

For the year ended December 31, 2011, gross profit at IAA increased to \$284.8 million, or 40.7% of revenue, compared with \$248.4 million, or 40.7% of revenue, for the year ended December 31, 2010. The gross profit increase was primarily the result of the increase in revenue. The increase in cost of services was attributable to expenses associated with businesses acquired in the fourth quarter of 2010,

an increase in compensation expense, increases in yard and auction expenses specifically pertaining to reconditioning, processing and towing costs related to the increase in volume, as well as an increase in purchased vehicles.

Selling, General and Administrative

Selling, general and administrative expenses at IAA increased \$3.4 million, or 4%, to \$82.3 million for the year ended December 31, 2011, compared with \$78.9 million for the year ended December 31, 2010. The increase in selling, general and administrative expenses was attributable to increases in compensation expense, incentive-based compensation expense and professional fees related to information technology and marketing initiatives, partially offset by decreases in stock-based compensation expense, professional fees related to process improvement initiatives and severance costs.

AFC Results

	Year Ended December 31,	
	2011	2010
(Dollars in millions except volumes and per loan amounts)		
AFC revenue		
Interest and fee income	\$ 163.7	\$ 137.9
Other revenue	11.2	9.6
Provision for credit losses	(6.1)	(11.2)
Total AFC revenue	168.8	136.3
Cost of services*	37.6	34.1
Gross profit*	131.2	102.2
Selling, general and administrative	22.1	20.6
Depreciation and amortization	24.7	25.0
Operating profit	\$ 84.4	\$ 56.6
Loan transactions	1,064,891	935,578
Revenue per loan transaction	\$ 159	\$ 146

* Exclusive of depreciation and amortization

Note: Prior to 2011, certain AFC fees collected from customers were netted against cost of services, as well as certain selling, general and administrative expenses. Such fees included lot check fees, filing fees and postage fees, each of which are charged to and collected from AFC's customers. At December 31, 2011, these fees were included in revenue with the corresponding costs reflected in their respective expense categories, resulting in an increase to "Other revenue" as well as an increase to the related expenses for 2010. For the year ended December 31, 2010 "Other revenue" has been increased by \$7.6 million, "Cost of services" has been increased by \$5.6 million and "Selling, general and administrative" has been increased by \$2.0 million.

Revenue

For the year ended December 31, 2011, AFC revenue increased \$32.5 million, or 24%, to \$168.8 million, compared with \$136.3 million for the year ended December 31, 2010. The increase in revenue was the result of a 9% increase in revenue per loan transaction for the year ended December 31, 2011, compared with the same period in 2010, and a 14% increase in loan transactions to 1,064,891 for the year ended December 31, 2011. In addition, managed receivables increased to \$883.2 million at December 31, 2011 from \$771.6 million at December 31, 2010.

Revenue per loan transaction, which includes both loans paid off and loans curtailed, increased \$13, or 9%, primarily as a result of a decrease in credit losses and related provision, increases in the average portfolio duration and average loan value, and floorplan and other fee income.

Accounting Standards Update 2009-16 amended ASC 860, *Transfers and Servicing*, and we adopted the guidance on January 1, 2010. The guidance eliminated securitization income accounting and resulted in the recording of interest and fee income, provision for credit losses and interest expense for the finance receivable transactions under the revolving sale agreement. The impact of this guidance on revenue was a net \$1.4 million reduction of revenue for the first quarter of 2010. The elimination of the gain on sale treatment resulted in a reduction of revenue of \$2.8 million, while the reclassification of interest expense resulted in an offsetting \$1.4 million increase in revenue.

Gross Profit

For the year ended December 31, 2011, gross profit for the AFC segment increased \$29.0 million, or 28%, to \$131.2 million, compared with \$102.2 million for the year ended December 31, 2010, primarily as a result of a 24% increase in revenue, partially offset by a 10% increase in cost of services. The increase in cost of services was primarily the result of an increase in compensation expense associated with an increase in the number of employees, as well as an increase in lot audit expenses, partially offset by a decrease in collection expenses.

Selling, General and Administrative Expenses

Selling, general and administrative expenses at AFC increased \$1.5 million, or 7%, for the year ended December 31, 2011, compared with the year ended December 31, 2010. The increase was primarily the result of increases in compensation expense, travel costs, postage and promotion expenses, partially offset by decreases in professional fees and incentive compensation.

Holding Company Results

(Dollars in millions)	Year Ended December 31,	
	2011	2010
Selling, general and administrative	\$ 65.4	\$ 63.8
Depreciation and amortization	1.2	0.5
Operating loss	<u>\$ (66.6)</u>	<u>\$ (64.3)</u>

Selling, General and Administrative Expenses

For the year ended December 31, 2011, selling, general and administrative expenses at the holding company increased \$1.6 million, or 3%, to \$65.4 million, compared with \$63.8 million for the year ended December 31, 2010, primarily as a result of increases in compensation expense, professional fees and integration costs (primarily related to the Company's acquisition activity), partially offset by decreases in stock-based compensation expense, employee benefit costs, incentive compensation and other miscellaneous expenses. Excluding the increase in professional fees and integration costs associated with acquisitions of \$3.5 million, selling, general and administrative costs would have declined \$1.9 million in 2011 as compared with 2010.

Overview of Results of KAR Auction Services for the Years Ended December 31, 2010 and 2009:

(Dollars in millions except per share amounts)	Year Ended December 31,	
	2010	2009
Revenues

Net income per share		
Basic	\$ 0.52	\$ 0.21
Diluted	\$ 0.51	\$ 0.21

* Exclusive of depreciation and amortization

For the year ended December 31, 2010, we had revenue of \$1,822.6 million compared with revenue of \$1,735.5 million for the year ended December 31, 2009, an increase of 5%. For a further discussion of revenues, gross profit and selling, general and administrative expenses, see the segment results discussions below.

Depreciation and Amortization

Depreciation and amortization decreased \$1.1 million, or 1%, to \$171.3 million for the year ended December 31, 2010, compared with \$172.4 million for the year ended December 31, 2009. The decrease is representative of certain assets becoming fully depreciated, partially offset by an increase in 2010 capital spending compared to 2009, as well as an increase in depreciation related to acquired sites.

Interest Expense

Interest expense decreased \$31.2 million, or 18%, to \$141.4 million for the year ended December 31, 2010, compared with \$172.6 million for the year ended December 31, 2009. The decrease in interest expense was primarily the result of a \$250.0 million prepayment on Old Term Loan B in the fourth quarter of 2009, a \$225.6 million prepayment on the principal amount of the senior subordinated notes in January 2010, a \$28.3 million prepayment on Old Term Loan B in February 2010, a \$75.0 million prepayment on Old Term Loan B in November 2010 and a \$68.3 million prepayment on the principal amount of the senior subordinated notes in December 2010. Partially offsetting the decrease was an increase in interest expense that resulted from the adoption of Accounting Standards Update 2009-16 in 2010. Included in interest expense in 2010 is \$7.2 million in AFC interest related to

the securitized finance receivables. Prior to 2010, AFC interest expense was recorded as a reduction of AFC net revenue.

Other Income

Other income was \$2.1 million for the year ended December 31, 2010, compared with other income of \$11.6 million for the year ended December 31, 2009. The change in other income was primarily representative of smaller foreign currency transaction gains for the year ended December 31, 2010, compared to the year ended December 31, 2009.

Loss on Extinguishment of Debt

In connection with our initial public offering, we conducted a cash tender offer for certain of our notes. The tender offer was oversubscribed and as such, in accordance with the identified priority levels, only a portion of the senior subordinated notes tendered were accepted for prepayment. In January 2010, we prepaid \$225.6 million principal amount of the senior subordinated notes with proceeds received from the initial public offering and the underwriters option to purchase additional shares. In the first quarter of 2010, we recorded a \$25.3 million pretax charge representative of the net premiums payable related to the repurchase of the senior subordinated notes, the write-off of certain unamortized debt issuance costs associated with our senior subordinated notes and certain expenses related to the tender offer.

In addition, in the fourth quarter of 2010, we conducted a cash tender offer for certain of our notes. The tender offer was oversubscribed and as such, in accordance with the identified priority levels, only a portion of the senior subordinated notes tendered were accepted for prepayment. In December 2010, we prepaid \$68.3 million principal amount of the senior subordinated notes with available cash and recorded a \$7.4 million pretax charge representative of the net premiums payable related to the repurchase of the senior subordinated notes, the write-off of certain unamortized debt issuance costs associated with our senior subordinated notes and certain expenses related to the tender offer.

Income Taxes

Our effective tax rate was 28.1% for the year ended December 31, 2010 compared with 32.4% for the year ended December 31, 2009. Excluding the effect of the discrete items, our effective tax rates for the years ended December 31, 2010 and December 31, 2009 would have been 38.3% and 51.8%, respectively. The change in the tax rate, excluding the effect of discrete items, was primarily attributable to the reduction of expenses permanently nondeductible for tax purposes, the increase in consolidated pre-tax profits and lower tax rates in state and foreign jurisdictions.

ADESA Results

(Dollars in millions)	Year Ended December 31,	
	2010	2009
ADESA revenue	\$1,075.9	\$1,088.5
Cost of services*	611.2	615.4
Gross profit*	464.7	473.1
Selling, general and administrative	211.9	207.1
Depreciation and amortization	86.9	88.4
Operating profit	<u>\$ 165.9</u>	<u>\$ 177.6</u>

* Exclusive of depreciation and amortization

Revenue

Revenue from ADESA decreased \$12.6 million, or 1%, to \$1,075.9 million for the year ended December 31, 2010, compared with \$1,088.5 million for the year ended December 31, 2009. The decrease in revenue was primarily a result of a 7% decrease in the number of vehicles sold, partially offset by a 6% increase in revenue per vehicle sold to over \$570 for the year ended December 31, 2010, compared to approximately \$540 for the year ended December 31, 2009.

The 6% increase in revenue per vehicle sold was attributable to incremental fee income related to higher used vehicle values and selective fee increases which resulted in increased ADESA revenue of approximately \$27.4 million. In addition, fluctuations in the Canadian exchange rate resulted in increased ADESA revenue of approximately \$22.9 million, and increases in ancillary services, such as transportation and other services, resulted in increased ADESA revenue of approximately \$8.3 million.

The total number of used vehicles sold at ADESA decreased 7% for the year ended December 31, 2010, compared with the year ended December 31, 2009 and resulted in a decrease in ADESA revenue of approximately \$71.2 million. The decrease in volume sold was attributable to a decline in supplier inventory levels in 2010 compared to 2009. For the year ended December 31, 2010, as compared with the year ended December 31, 2009, we estimate that the decline in industry volumes was consistent with the decline experienced at ADESA. Online sales volumes for ADESA in 2010 represented over 20% of the total vehicles sold by ADESA.

The used vehicle conversion percentage, calculated as the number of vehicles sold as a percentage of the number of vehicles entered for sale at our used vehicle auctions, decreased to 65.0% for the year ended December 31, 2010, compared with 66.9% for the year ended December 31, 2009. The decrease in conversion rates is representative of a change in the mix of vehicles sold toward more dealer consignment vehicles, which convert at a lower rate. For the year ended December 31, 2010, dealer consignment vehicles represented approximately 33% of used vehicles sold at ADESA, an increase from 29% for the year ended December 31, 2009.

Gross Profit

For the year ended December 31, 2010, gross profit for ADESA decreased \$8.4 million, or 2%, to \$464.7 million, compared with \$473.1 million for the year ended December 31, 2009. Gross profit for ADESA was 43.2% of revenue for the year ended December 31, 2010, compared with 43.5% of revenue for the year ended December 31, 2009. The decrease in gross profit as a percentage of revenue for the year ended December 31, 2010, compared with the year ended December 31, 2009 was the result of an increase in ancillary services revenue, which has a lower gross profit than auction services revenue.

Selling, General and Administrative

Selling, general and administrative expenses for the ADESA segment increased \$4.8 million, or 2%, to \$211.9 million for the year ended December 31, 2010, compared with \$207.1 million for the year ended December 31, 2009, primarily due to an increase in stock-based compensation, fluctuations in the Canadian exchange rate, an increase in marketing costs, an increase for costs at acquired sites and a net increase in other miscellaneous expenses. These increases were partially offset by a decrease in incentive compensation and a decrease in professional fees.

IAA Results

(Dollars in millions)	Year Ended December 31,	
	2010	2009
IAA revenue	\$610.4	\$553.1
Cost of services*	362.0	352.1
Gross profit*	248.4	201.0
Selling, general and administrative	78.9	65.5
Depreciation and amortization	58.9	58.3
Operating profit	<u>\$110.6</u>	<u>\$ 77.2</u>

* Exclusive of depreciation and amortization

Revenue

Revenue from IAA increased \$57.3 million, or 10%, to \$610.4 million for the year ended December 31, 2010, compared with \$553.1 million for the year ended December 31, 2009. The increase in revenue was primarily a result of an increase in fee revenue due to an increase in average selling price for vehicles sold at auction, and to a lesser extent, revenues associated with acquired sites. For the year ended December 31, 2010, total salvage vehicles sold declined approximately 2%. Online sales volumes for IAA in 2010 represented approximately half of the total vehicles sold by IAA.

Gross Profit

For the year ended December 31, 2010, gross profit at IAA increased to \$248.4 million, or 40.7% of revenue, compared with \$201.0 million, or 36.3% of revenue, for the year ended December 31, 2009. The gross profit increase was primarily the result of the increase in fee revenue due to an increase in average selling price for vehicles sold at auction. Cost of services increased primarily as a result of increases in incentive compensation based on the performance of IAA, expenses associated with costs at acquired sites and increases in yard and auction expenses. These increases were partially offset by a reduction in tow costs.

Selling, General and Administrative

Selling, general and administrative expenses at IAA increased \$13.4 million, or 20%, to \$78.9 million for the year ended December 31, 2010, compared with \$65.5 million for the year ended December 31, 2009. The increase in selling, general and administrative expenses was attributable to increases in stock-based compensation and incentive compensation, as well as increased spending on professional fees and severance, both related to our process improvement initiatives which were launched in the first quarter of 2010.

AFC Results

	Year Ended December 31,	
	2010	2009
(Dollars in millions except volumes and per loan amounts)

Loan transactions	935,578	799,421
Revenue per loan transaction	\$ 146	\$ 117

* Exclusive of depreciation and amortization

Note: Prior to 2011, certain AFC fees collected from customers were netted against cost of services, as well as certain selling, general and administrative expenses. Such fees included lot check fees, filing fees and postage fees, each of which are charged to and collected from AFC's customers. At December 31, 2011, these fees were included in revenue with the corresponding costs reflected in their respective expense categories, resulting in an increase to "Other revenue" as well as an increase to the related expenses for 2010 and 2009. For the year ended December 31, 2010, "Other revenue" has been increased by \$7.6 million, "Cost of services" has been increased by \$5.6 million and "Selling, general and administrative" has been increased by \$2.0 million. For the year ended December 31, 2009, "Other revenue" has been increased by \$5.9 million, "Cost of services" has been increased by \$4.2 million and "Selling, general and administrative" has been increased by \$1.7 million.

Revenue

For the year ended December 31, 2010, AFC revenue increased \$42.4 million, or 45%, to \$136.3 million, compared with \$93.9 million for the year ended December 31, 2009. The increase in revenue was the result of a 25% increase in revenue per loan transaction for the year ended December 31, 2010, compared with the same period in 2009 and a 17% increase in loan transactions to 935,578 for the year ended December 31, 2010. In addition, managed receivables increased to \$771.6 million at December 31, 2010 from \$613.0 million at December 31, 2009.

Revenue per loan transaction, which includes both loans paid off and loans curtailed, increased \$29, or 25%, primarily as a result of a decrease in credit losses for both loans held and sold, an

increase in the average loan value, an increase in floorplan fee income, an increase in interest income and an increase in other income.

Accounting Standards Update 2009-16 amended ASC 860, *Transfers and Servicing*, and we adopted the new guidance on January 1, 2010. The new guidance eliminated securitization income accounting and resulted in the recording of interest and fee income and interest expense for the finance receivable transactions under the revolving sale agreement. The impact of this guidance on revenue was a net \$1.4 million reduction of revenue for the first quarter of 2010. The elimination of the gain on sale treatment resulted in a reduction of revenue of \$2.8 million, while the reclassification of interest expense resulted in an offsetting \$1.4 million increase in revenue. Interest expense related to the securitized finance receivables for the year ended December 31, 2010 was \$7.2 million and is included as "Interest expense" on the consolidated statement of income. Interest expense related to the securitized finance receivables for the year ended December 31, 2009 totaled \$4.7 million and was included in securitization income.

Gross Profit

For the year ended December 31, 2010, gross profit for the AFC segment increased \$42.3 million, or 71%, to \$102.2 million, compared with \$59.9 million for the year ended December 31, 2009, primarily as a result of a 45% increase in revenue.

Selling, General and Administrative Expenses

Selling, general and administrative expenses at AFC increased \$7.3 million, or 55%, for the year ended December 31, 2010, compared with the year ended December 31, 2009. The increase was primarily the result of increases in incentive compensation expense, salaries and related employee benefit costs, professional fees and stock-based compensation expense.

Holding Company Results

(Dollars in millions)	Year Ended December 31,	
	2010	2009
Selling, general and administrative	\$ 63.8	\$ 80.4
Depreciation and amortization	0.5	1.0
Operating loss	<u>\$(64.3)</u>	<u>\$(81.4)</u>

Selling, General and Administrative Expenses

For the year ended December 31, 2010, selling, general and administrative expenses at the holding company decreased \$16.6 million, or 21%, to \$63.8 million, compared with \$80.4 million for the year ended December 31, 2009, primarily as a result of the termination of our financial advisory fees paid to the Equity Sponsors. We paid the Equity Sponsors a total of \$14.0 million in 2009, including \$10.5 million of termination fees in connection with the termination of our ongoing financial advisory fees with each of them. Selling, general and administrative expenses also decreased as a result of a decrease in stock-based compensation expense related to the KAR LLC and Axle LLC operating units which are remeasured each reporting period to fair value. These decreases were partially offset by an increase in professional fees and other expenses.

LIQUIDITY AND CAPITAL RESOURCES

We believe that the significant indicators of liquidity for our business are cash on hand, cash flow from operations, working capital and amounts available under our credit facility. Our principal sources of liquidity consist of cash generated by operations and borrowings under our revolving credit facility.

(Dollars in millions)	December 31,	
	2011	2010
Cash and cash equivalents	\$ 97.4	\$119.1
Restricted cash	8.2	8.6
Working capital	177.0	287.9
Amounts available under credit facility*	181.1	250.0
Cash flow from operations	305.8	467.6

* There were related outstanding letters of credit totaling approximately \$28.5 million and \$29.4 million at December 31, 2011 and 2010, respectively, which reduce the amount available for borrowings under the respective credit facilities.

Working Capital

A substantial amount of our working capital is generated from the payments received for services provided. The majority of our working capital needs are short-term in nature, usually less than a week in duration. Due to the decentralized nature of the business, payments for most vehicles purchased are received at each auction and branch. Most of the financial institutions place a temporary hold on the availability of the funds deposited that generally can range up to two business days, resulting in cash in our accounts and on our balance sheet that is unavailable for use until it is made available by the various financial institutions. There are outstanding checks (book overdrafts) to sellers and vendors included in current liabilities. Because a portion of these outstanding checks for operations in the U.S. are drawn upon bank accounts at financial institutions other than the financial institutions that hold the cash, we cannot offset all the cash and the outstanding checks on our balance sheet.

Our available cash, which excludes cash in transit, was \$52.7 million at December 31, 2011. Of this amount, approximately \$26.8 million was held by foreign subsidiaries and considered to be permanently reinvested in our non-U.S. businesses. If the funds held by our foreign subsidiaries were to be repatriated, tax expense would need to be accrued at the U.S. statutory rate, net of any applicable foreign tax credits. Such foreign tax credits would substantially offset any U.S. taxes that would be due in the event cash held by our foreign subsidiaries was repatriated.

AFC offers short-term inventory-secured financing, also known as floorplan financing, to used vehicle dealers. Financing is primarily provided for terms of 30 to 60 days. AFC principally generates its funding through the sale of its receivables. The receivables sold pursuant to the securitization agreements are accounted for as secured borrowings. For further discussion of AFC's securitization arrangements, see "Securitization Facilities."

Credit Facilities

On May 19, 2011, we established a new \$1.7 billion, six-year senior secured term loan facility ("New Term Loan B") and a new \$250 million, five-year senior secured revolving credit facility, the terms of which are set forth in the Credit Agreement, dated as of May 19, 2011 (the "Credit Agreement"). Concurrently with our entry into the Credit Agreement, we terminated our previous credit facility, dated as of April 20, 2007 (as amended, the "2007 Credit Agreement"). On May 19, 2011, we paid all principal outstanding and interest due under the 2007 Credit Agreement. No early termination penalties were incurred by the Company in connection with the termination of the 2007

Credit Agreement; however, we incurred a non-cash loss on the extinguishment of Old Term Loan B of \$24.5 million representative of the write-off of certain unamortized debt issuance costs. In addition, we recognized \$14.5 million of additional interest expense to settle and terminate our \$650 million notional swap agreement, which was used to hedge interest payments on Old Term Loan B.

The new credit facility is available for letters of credit, working capital and general corporate purposes (including refinancing certain Existing Indebtedness (as defined in the Credit Agreement)). The Credit Agreement provides that with respect to the new revolving credit facility, up to \$75 million is available for letters of credit and up to \$75 million is available for swing line loans. The Credit Agreement also permits up to \$300 million of additional revolving or term loan commitments from one or more of the existing lenders or other lenders (with the consent of the administrative agent).

New Term Loan B was issued at a discount of \$8.5 million. The discount is being amortized to interest expense over the six-year term of the loan. New Term Loan B is payable in quarterly installments equal to 0.25% of the original aggregate principal amount. Payments commenced on September 30, 2011, and the balance is payable at maturity. The new credit facility is subject to mandatory prepayments and reduction in an amount equal to (i) the net proceeds of certain debt offerings, asset sales and certain insurance recovery events; and (ii) for any fiscal year ending on or after December 31, 2011, any Excess Cash Flow, as defined in the Credit Agreement.

New Term Loan B will bear interest at an adjusted LIBOR rate plus 3.75% (with an adjusted LIBOR rate floor of 1.25% per annum) and revolving loan borrowings at an adjusted LIBOR rate plus 3.50%; however, for specified types of borrowings, the Company may elect to make term loan borrowings at a Base Rate (as defined in the Credit Agreement) plus 2.75% and revolving loan borrowings at a Base Rate plus 2.50%. The rate on New Term Loan B was 5.0% at December 31, 2011. In addition, if the Company reduces its Consolidated Senior Secured Leverage Ratio (as defined in the Credit Agreement), which is based on a net debt calculation, to levels specified in the Credit Agreement, the applicable interest rate will step down by 25 basis points. The Company will also pay a commitment fee of 50 basis points, payable quarterly, on the average daily unused amount of the Credit Facility. The fee may step down to 37.5 basis points based on the Company's Consolidated Senior Secured Leverage Ratio as described above.

On December 31, 2011, \$1,691.5 million was outstanding on New Term Loan B and \$68.9 million was drawn on the new revolving credit facility. There were no borrowings under the old revolving credit facility at December 31, 2010. However, there were related outstanding letters of credit in the aggregate amount of \$28.5 million and \$29.4 million at December 31, 2011 and December 31, 2010, respectively, which reduce the amount available for borrowings under the respective credit facilities. The Company intends to repay the \$68.9 million of outstanding borrowings under the revolving credit facility within the next twelve months. In addition, our Canadian operations have a C\$8 million line of credit which was undrawn as of December 31, 2011. However, there were related letters of credit outstanding totaling approximately C\$2.2 million at December 31, 2011, which reduce credit available under the Canadian line of credit, but do not affect amounts available for borrowings under our new revolving credit facility.

The obligations of the Company under the Credit Facility are guaranteed by certain of our domestic subsidiaries (the "Subsidiary Guarantors") and are secured by substantially all of the assets of the Company and the Subsidiary Guarantors, including but not limited to: (a) pledges of and perfected first-priority security interests in 100% of the equity interests of certain of the Company's and the Subsidiary Guarantors' domestic subsidiaries and 65% of the equity interests of certain of the Company's and the Subsidiary Guarantors' first-tier foreign subsidiaries and (b) perfected first-priority security interests in substantially all other tangible and intangible assets of the Company and each Subsidiary Guarantor, subject to certain exceptions.

The Credit Agreement contains certain restrictive loan covenants, including, among others, a financial covenant requiring that a maximum consolidated senior secured leverage ratio be satisfied as of the last day of each fiscal quarter if revolving loans are outstanding, and covenants limiting our ability to incur indebtedness, grant liens, make acquisitions, consummate change of control transactions, dispose of assets, pay dividends, make capital expenditures, make investments and engage in certain transactions with affiliates. The leverage ratio covenant is based on consolidated Adjusted EBITDA which is EBITDA (earnings before interest expense, income taxes, depreciation and amortization) adjusted to exclude among other things (a) gains and losses from asset sales; (b) unrealized foreign currency translation gains and losses in respect of indebtedness; (c) certain non-recurring gains and losses; (d) stock option expense; (e) certain other noncash amounts included in the determination of net income; (f) management, monitoring, consulting and advisory fees paid to the equity sponsors; (g) charges and revenue reductions resulting from purchase accounting; (h) unrealized gains and losses on hedge agreements; (i) minority interest; (j) expenses associated with the consolidation of salvage operations; (k) consulting expenses incurred for cost reduction, operating restructuring and business improvement efforts; (l) expenses realized upon the termination of employees and the termination or cancellation of leases, software licenses or other contracts in connection with the operational restructuring and business improvement efforts; (m) expenses incurred in connection with permitted acquisitions; and (n) any impairment charges or write-offs of intangibles.

Certain covenants contained within the Credit Agreement are critical to an investor's understanding of our financial liquidity, as the failure to maintain compliance with these covenants could result in a default and allow our lenders to declare all amounts borrowed immediately due and payable. The maximum consolidated senior secured leverage ratio is required to be met when there are revolving loans outstanding under our Credit Agreement. The maximum consolidated senior secured leverage ratio cannot exceed 4.25 to 1.0 as of the last day of any fiscal quarter through September 30, 2012. Beginning with the quarter ending December 31, 2012, the ratio cannot exceed 4.0 to 1.0 and continues to decline throughout the remaining life of the credit facility until it reaches 2.5 to 1.0 at December 31, 2015. Our maximum consolidated senior secured leverage ratio was 3.6 to 1.0 at December 31, 2011.

In addition, the indenture governing our floating rate senior notes contains certain financial and operational restrictions that, similar to the Credit Agreement, limit our ability to pay dividends and other distributions, make certain acquisitions or investments, incur indebtedness, grant liens and sell assets. The covenants in the Credit Agreement and the indenture governing our floating rate senior notes affect our operating flexibility by, among other things, restricting our ability to incur expenses and indebtedness that could be used to grow the business, as well as to fund general corporate purposes. We were in compliance with the covenants in the Credit Agreement and the indenture governing our floating rate senior notes at December 31, 2011.

We believe our sources of liquidity from our cash and cash equivalents on hand, working capital, cash provided by operating activities, and availability under our credit facility are sufficient to meet our short and long-term operating needs for the foreseeable future. In addition, we believe the previously mentioned sources of liquidity will be sufficient to fund our capital requirements and debt service payments for the next twelve months.

Securitization Facilities

AFC sells the majority of its U.S. dollar denominated finance receivables on a revolving basis and without recourse to a wholly owned, bankruptcy remote, consolidated, special purpose subsidiary ("AFC Funding Corporation"), established for the purpose of purchasing AFC's finance receivables. A securitization agreement allows for the revolving sale by AFC Funding Corporation to a bank conduit facility of undivided interests in certain eligible finance receivables subject to committed liquidity.

On April 26, 2011, AFC and AFC Funding Corporation entered into the Fourth Amended and Restated Receivables Purchase Agreement (the “Receivables Purchase Agreement”). The Receivables Purchase Agreement increased AFC Funding’s U.S. committed liquidity from \$450 million to \$650 million and extended the facility’s maturity date from April 20, 2012 to June 30, 2014. In addition, the interest costs for amounts borrowed increased approximately 0.5% and certain of the covenants and termination events in the Receivables Purchase Agreement that are tied to the performance of the finance receivables portfolio were modified.

On May 24, 2011, Automotive Finance Canada, Inc. (“AFCI”) entered into an Amended and Restated Receivables Purchase Agreement (the “Canadian Receivables Purchase Agreement”). The Canadian Receivables Purchase Agreement increased AFCI’s Canadian committed liquidity from C\$75 million to C\$100 million and extended the facility’s maturity date from April 20, 2012 to June 30, 2014. AFCI’s committed liquidity is provided through a third party conduit (separate from the U.S. conduit).

ASU 2009-16 amended ASC 860, *Transfers and Servicing*, and we adopted the guidance on January 1, 2010. The guidance specifies that the finance receivable transactions on or subsequent to January 1, 2010 under our revolving sale agreement be included in our balance sheet. This resulted in an increase in assets and related obligations in 2010. In addition, the guidance eliminated securitization income accounting and resulted in the recording of fee and interest income and interest expense for the finance receivable transactions under the revolving sale agreement.

AFC managed total finance receivables of \$883.2 million and \$771.6 million at December 31, 2011 and December 31, 2010, respectively.

AFC’s allowance for losses was \$9.0 million and \$9.7 million at December 31, 2011 and December 31, 2010, respectively.

As of December 31, 2011 and December 31, 2010, \$877.6 million and \$763.9 million, respectively, of finance receivables and a cash reserve of 1 percent of finance receivables securitized serve as security for the \$610.3 million and \$520.1 million of obligations collateralized by finance receivables at December 31, 2011 and December 31, 2010, respectively. The amount of the cash reserve depends on circumstances which are set forth in the securitization agreements. After the occurrence of a termination event, as defined in the U.S. securitization agreement, the bank conduit facility may, and could, cause the stock of AFC Funding Corporation to be transferred to the bank conduit facility, though as a practical matter the bank conduit facility would look to the liquidation of the receivables under the transaction documents as their primary remedy.

Proceeds from the revolving sale of receivables to the bank conduit facility are used to fund new loans to customers. AFC, AFC Funding Corporation and AFCI must maintain certain financial covenants including, among others, limits on the amount of debt AFC and AFCI can incur, minimum levels of tangible net worth, and other covenants tied to the performance of the finance receivables portfolio. The securitization agreements also incorporate the financial covenants of our credit facility. At December 31, 2011, we were in compliance with the covenants in the securitization agreements.

EBITDA and Adjusted EBITDA

EBITDA and Adjusted EBITDA, as presented herein, are supplemental measures of our performance that are not required by, or presented in accordance with, generally accepted accounting principles in the United States, or GAAP. They are not measurements of our financial performance under GAAP and should not be considered substitutes for net income (loss) or any other performance measures derived in accordance with GAAP.

EBITDA is defined as net income (loss), plus interest expense net of interest income, income tax provision (benefit), depreciation and amortization. Adjusted EBITDA is EBITDA adjusted for the items of income and expense and expected incremental revenue and cost savings, as described above in the discussion of certain restrictive loan covenants under “Credit Facilities.”

Management believes that the inclusion of supplementary adjustments to EBITDA applied in presenting Adjusted EBITDA is appropriate to provide additional information to investors about one of the principal measures of performance used by our creditors. In addition, management uses Adjusted EBITDA to evaluate our performance and to evaluate results relative to incentive compensation targets. EBITDA and Adjusted EBITDA have limitations as analytical tools, and should not be considered in isolation or as a substitute for analysis of the results as reported under GAAP. These measures may not be comparable to similarly titled measures reported by other companies.

The following tables reconcile EBITDA and Adjusted EBITDA to net income (loss) for the periods presented:

(Dollars in millions)	Year Ended December 31, 2011				
	ADESA	IAA	AFC	Corporate	Consolidated
Net income (loss)	\$ 55.8	\$ 65.5	\$ 57.2	\$(106.3)	\$ 72.2
Add back:					
Income taxes	17.9	36.1	29.6	(65.8)	17.8
Interest expense, net of interest income	0.7	2.1	12.0	128.0	142.8
Depreciation and amortization	88.1	65.8	24.7	1.2	179.8
Intercompany	52.4	38.3	(14.4)	(76.3)	—
EBITDA	214.9	207.8	109.1	(119.2)	412.6
Adjustments	17.3	3.9	(7.2)	60.6	74.6
Adjusted EBITDA	<u>\$232.2</u>	<u>\$211.7</u>	<u>\$101.9</u>	<u>\$ (58.6)</u>	<u>\$487.2</u>

(Dollars in millions)	Year Ended December 31, 2010				
	ADESA	IAA	AFC	Corporate	Consolidated
Net income (loss)	\$ 80.1	\$ 44.7	\$ 38.4	\$(93.6)	\$ 69.6
Add back:					
Income taxes	43.6	26.7	21.1	(64.2)	27.2
Interest expense, net of interest income	0.9	2.3	7.2	130.9	141.3
Depreciation and amortization	86.9	58.9	25.0	0.5	171.3
Intercompany	42.3	38.2	(11.7)	(68.8)	—
EBITDA	253.8	170.8	80.0	(95.2)	409.4
Adjustments	16.0	15.2	(0.4)	35.0	65.8
Adjusted EBITDA	<u>\$269.8</u>	<u>\$186.0</u>	<u>\$ 79.6</u>	<u>\$ (60.2)</u>	<u>\$475.2</u>

Certain of our loan covenant calculations utilize financial results for the most recent four consecutive fiscal quarters. The following table reconciles EBITDA and Adjusted EBITDA to net income (loss) for the periods presented:

(Dollars in millions)	Three Months Ended				Twelve Months Ended
	March 31, 2011	June 30, 2011	September 30, 2011	December 31, 2011	December 31, 2011
Net income (loss)	\$ 39.8	\$(14.3)	\$ 32.2	\$ 14.5	\$ 72.2
Add back:					
Income taxes	1.0	(6.9)	14.7	9.0	17.8
Interest expense, net of interest income	33.2	49.6	29.3	30.7	142.8
Depreciation and amortization	44.1	43.6	43.8	48.3	179.8
EBITDA	118.1	72.0	120.0	102.5	412.6
Nonrecurring charges	2.8	16.2	5.8	5.2	30.0
Noncash charges	8.5	46.2	(7.5)	7.1	54.3
AFC interest expense	(2.1)	(2.3)	(2.6)	(2.7)	(9.7)
Adjusted EBITDA	<u>\$127.3</u>	<u>\$132.1</u>	<u>\$115.7</u>	<u>\$112.1</u>	<u>\$487.2</u>

Summary of Cash Flows

(Dollars in millions)	Year Ended December 31,	
	2011	2010
Net cash provided by (used by):		
Operating activities	\$ 305.8	\$ 467.6
Investing activities	(419.8)	(793.9)
Financing activities	93.0	81.0
Effect of exchange rate on cash	(0.7)	0.5
Net increase (decrease) in cash and cash equivalents	<u>\$ (21.7)</u>	<u>\$(244.8)</u>

Cash flow from operating activities was \$305.8 million for the year ended December 31, 2011, compared with \$467.6 million for the year ended December 31, 2010. The decrease in operating cash flow was primarily impacted by changes in operating assets and liabilities. The change in operating assets was driven by the reduction in retained interests in finance receivables sold and a reduction in finance receivables held for sale in 2010, which resulted from the adoption of ASU 2009-16.

Net cash used by investing activities was \$419.8 million for the year ended December 31, 2011, compared with \$793.9 million for the year ended December 31, 2010. The change in net cash used by investing activities was primarily the result of the 2010 net increase in finance receivables held for investment, which resulted from the adoption of ASU 2009-16. The guidance specifies that the finance receivable transactions on or subsequent to January 1, 2010 under our revolving sale agreement be included in our balance sheet. In addition, we spent \$165.9 million more on acquisitions and \$6.9 million more on capital items in 2011 compared with 2010. For a discussion of the Company's capital expenditures, see "Capital Expenditures" below.

Net cash provided by financing activities was \$93.0 million for the year ended December 31, 2011, compared with \$81.0 million for the year ended December 31, 2010. The change in net cash provided by financing activities was attributable to the \$520.1 million increase in obligations collateralized by finance receivables in 2010, which resulted from the adoption of ASU 2009-16 as discussed above, partially offset by payments on debt in 2010, primarily with proceeds from our initial public offering. In

addition, the change in net cash provided by financing activities was impacted by the 2011 extinguishment of the Old Term Loan B credit facility, as the proceeds from New Term Loan B, as well as cash on hand, were used to pay all principal outstanding and interest due under the 2007 Credit Agreement and to pay the principal and net premiums related to the repurchase of our fixed senior notes and our senior subordinated notes.

Capital Expenditures

Capital expenditures for the years ended December 31, 2011 and 2010 approximated \$85.8 million and \$78.9 million, respectively. Capital expenditures were funded primarily from internally generated funds. We continue to invest in our core information technology capabilities and capacity expansion. Capital expenditures are expected to be approximately \$90 million for fiscal year 2012. Anticipated expenditures are primarily attributable to ongoing information system projects, integration of OPENLANE and ADESA information systems, upkeep and improvements at existing vehicle auction facilities, improvements in information technology systems and infrastructure and expansion and relocation of existing auction sites that are at capacity. Future capital expenditures could vary substantially based on capital project timing and the initiation of new information systems projects to support our business strategies.

Acquisitions

In August 2011, ADESA entered into an Agreement and Plan of Merger (the “Merger Agreement”) with OPENLANE, Inc. (“OPENLANE”). In October 2011, we completed the acquisition of OPENLANE, which became a wholly owned subsidiary of ADESA. OPENLANE is a North American online automotive auction company that provides a market for online buyers and sellers of wholesale vehicles. OPENLANE offers its comprehensive remarketing solutions to auto manufacturers, captive finance companies, lease and daily rental companies, used vehicle dealers, financial institutions and wholesale auto auctions throughout the United States and Canada.

As a result of the merger and pursuant to the terms of the Merger Agreement, each outstanding share of OPENLANE common stock and preferred stock (other than those shares of common stock or preferred stock held by OPENLANE) was converted into the right to receive an amount in cash as set forth in the Merger Agreement. The value of the cash consideration payable in the merger was \$208.4 million plus approximately \$35 million for excess cash on OPENLANE’s balance sheet at the closing of the merger. We funded the cash consideration paid at closing with a combination of approximately \$98.4 million of existing cash on-hand and borrowings of approximately \$145 million from our revolving credit facility. We utilized approximately \$35 million of acquired cash to immediately repay a portion of the borrowings on the revolving credit facility. In addition, we entered into operating lease obligations related to various facilities through 2017. Initial annual lease payments for the various facilities are approximately \$1.6 million per year. Financial results for the acquisition have been included in our consolidated financial statements from the date of acquisition. In the fourth quarter of 2011, OPENLANE contributed revenue of \$16.4 million and had a net loss of \$2.7 million, or \$0.02 per diluted share.

During 2011, we completed the acquisitions of a company that auctions heavy machinery, a company that develops satellite-based, GPS technology for advanced vehicle tracking and a salvage facility. The purchase agreements included contingent payments related to financial results and business deployments subsequent to the purchase date. The purchased assets included fixed assets, software, inventory, accounts receivable and other intangible assets. Financial results for each acquisition have been included in our consolidated financial statements from the date of acquisition.

The aggregate purchase price for the businesses acquired in 2011, net of cash, was approximately \$214.0 million, which includes estimated contingent payments with a present value of \$0.4 million. The

maximum amount of undiscounted contingent payments related to these acquisitions could approximate \$0.4 million. The purchase price for the acquired businesses was allocated to acquired assets and liabilities based upon fair values, including \$94.7 million to intangible assets, representing the fair value of acquired customer relationships, tradenames, software and noncompete agreements, which are being amortized over their expected useful lives. The acquisitions resulted in aggregate goodwill of \$123.6 million. The financial impact of these acquisitions, including pro forma financial results, was immaterial to the Company's statement of operations.

Some of our acquisitions from prior years include contingent payments related to revenues or unit volumes of certain vehicles sold subsequent to the purchase dates. We made contingent payments in 2011, 2010 and 2009 totaling approximately \$1.8 million, \$2.0 million and \$1.6 million, respectively, pursuant to these agreements, which resulted in additional goodwill. In addition, in 2011, we reversed contingent consideration of approximately \$4.6 million related to certain prior year acquisitions based on revised forecasts which indicated the unit volumes required during the measurement period in order for the contingent consideration to become payable would not be met. The net \$4.6 million of contingent consideration adjustments were recorded to "Other (income) expense, net" in the consolidated statement of income.

Contractual Obligations

The table below sets forth a summary of our contractual debt and operating lease obligations as of December 31, 2011. Some of the figures included in this table are based on management's estimates and assumptions about these obligations, including their duration, the possibility of renewal and other factors. Because these estimates and assumptions are necessarily subjective, the obligations we may actually pay in future periods could vary from those reflected in the table. The following summarizes our contractual cash obligations as of December 31, 2011 (*in millions*):

Contractual Obligations	Payments Due by Period				
	Total	Less than 1 year	1 - 3 Years	4 - 5 Years	More than 5 Years
Long-term debt					
New \$250 million revolving credit facility(a) . .	\$ 68.9	\$ 68.9	\$ —	\$ —	\$ —
New term loan B(a)	1,691.5	17.0	34.0	34.0	1,606.5
Floating rate senior notes due 2014(a)	150.0	—	150.0	—	—
Capital lease obligations(b)	30.2	12.1	16.7	1.4	—
Interest payments relating to long-term debt(c) .	465.3	93.3	177.3	164.3	30.4
Postretirement benefit payments(d)	0.4	0.1	0.1	0.1	0.1
Operating leases(e)	882.8	82.1	149.6	131.0	520.1
Total contractual cash obligations	\$3,289.1	\$273.5	\$527.7	\$330.8	\$2,157.1

- (a) The table assumes the long-term debt is held to maturity.
- (b) We have entered into capital leases for furniture, fixtures, equipment and software. Future capital lease obligations would change if we entered into additional capital lease agreements.
- (c) Interest payments on long-term debt are projected based on the contractual rates of the debt securities. Interest rates for the variable rate debt instruments were held constant at current rates due to their unpredictable nature.
- (d) Estimated future benefit payments for certain health care and death benefits for the retired employees of Underwriters Salvage Company, or USC. IAA assumed the obligation in connection with the acquisition of the capital stock of USC in 1994.

- (e) Operating leases are entered into in the normal course of business. We lease some of our auction facilities, as well as other property and equipment under operating leases. Some lease agreements contain options to renew the lease or purchase the leased property. Future operating lease obligations would change if the renewal options were exercised and/or if we entered into additional operating lease agreements.

Critical Accounting Estimates

In preparing the financial statements in accordance with U.S. generally accepted accounting principles, management must often make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses and related disclosures at the date of the financial statements and during the reporting period. Some of those judgments can be subjective and complex. Consequently, actual results could differ from those estimates. Accounting measurements that management believes are most critical to the reported results of our operations and financial condition include: uncollectible receivables and allowance for credit losses and doubtful accounts, goodwill and long-lived assets, self-insurance programs, legal proceedings and other loss contingencies and income taxes.

In addition to the critical accounting estimates, there are other items used in the preparation of the consolidated financial statements that require estimation, but are not deemed critical. Changes in estimates used in these and other items could have a material impact on our financial statements.

We continually evaluate the accounting policies and estimates used to prepare the consolidated financial statements. In cases where management estimates are used, they are based on historical experience, information from third-party professionals, and various other assumptions believed to be reasonable. In addition, our most significant accounting policies are discussed in Note 2 and elsewhere in the Notes to the Consolidated Financial Statements for the year ended December 31, 2011, which are included in this Annual Report on Form 10-K.

Uncollectible Receivables and Allowance for Credit Losses and Doubtful Accounts

We maintain an allowance for credit losses and doubtful accounts for estimated losses resulting from the inability of customers to make required payments. The allowances for credit losses and doubtful accounts are based on management's evaluation of the receivables portfolio under current economic conditions, the volume of the portfolio, overall portfolio credit quality, review of specific collection matters and such other factors which, in management's judgment, deserve recognition in estimating losses. Specific collection matters can be impacted by the outcome of negotiations, litigation and bankruptcy proceedings.

Due to the nature of our business, substantially all trade receivables are due from vehicle dealers, salvage buyers, institutional customers and insurance companies. We generally have possession of vehicles or vehicle titles collateralizing a significant portion of these receivables. At the auction sites, risk is mitigated through a pre-auction registration process that includes verification of identification, bank accounts, dealer license status, acceptable credit history, buying history at other auctions and the written acceptance of all of the auction's policies and procedures.

AFC's allowance for credit losses includes an estimate of losses for finance receivables. AFC controls credit risk through credit approvals, credit limits, underwriting and collateral management monitoring procedures, which includes holding vehicle titles where permitted.

Goodwill and Long-Lived Assets

When we acquire businesses, the purchase price is allocated to tangible assets and liabilities and identifiable intangible assets acquired. Any residual purchase price is recorded as goodwill. The

allocation of the purchase price requires management to make significant estimates in determining the fair values of assets acquired and liabilities assumed, especially with respect to intangible assets. These estimates are based on historical experience and information obtained from the management of the acquired companies. These estimates can include, but are not limited to, the cash flows that an asset is expected to generate in the future, the appropriate weighted-average cost of capital, and the cost savings expected to be derived from acquiring an asset. These estimates are inherently uncertain and unpredictable. In addition, unanticipated events and circumstances may occur which may affect the accuracy or validity of such estimates.

In accordance with ASC 350, *Intangibles-Goodwill and Other*, we assess goodwill for impairment at least annually and whenever events or circumstances indicate that the carrying amount of the goodwill may be impaired. Important factors that could trigger an impairment review include significant under-performance relative to historical or projected future operating results; significant negative industry or economic trends; and our market valuation relative to our book value. In assessing goodwill, we must make assumptions regarding estimated future cash flows and earnings, changes in our business strategy and economic conditions affecting market valuations related to the fair values of our three reporting units (which consist of our three operating and reportable business segments: ADESA Auctions, IAA and AFC). In response to changes in industry and market conditions, we may be required to strategically realign our resources and consider restructuring, disposing of or otherwise exiting businesses, which could result in an impairment of goodwill.

The goodwill impairment test is a two-step test. Under the first step, the fair value of each reporting unit is compared with its carrying value (including goodwill). If the fair value of the reporting unit is less than its carrying value, an indication of goodwill impairment exists for the reporting unit and we must perform step two of the impairment test (measurement). Under step two, an impairment loss is recognized for any excess of the carrying amount of the reporting unit's goodwill over the implied fair value of that goodwill. The implied fair value of goodwill is determined by allocating the fair value of the reporting unit in a manner similar to a purchase price allocation, in accordance with ASC 805, *Business Combinations*. The residual fair value after this allocation is the implied fair value of the reporting unit goodwill. Fair value of the reporting unit is determined using a discounted cash flow analysis. If the fair value of the reporting unit exceeds its carrying value, step two does not need to be performed.

We review long-lived assets for possible impairment whenever circumstances indicate that their carrying amount may not be recoverable. If it is determined that the carrying amount of a long-lived asset exceeds the total amount of the estimated undiscounted future cash flows from that asset, we would recognize a loss to the extent that the carrying amount exceeds the fair value of the asset. Management judgment is involved in both deciding if testing for recovery is necessary and in estimating undiscounted cash flows. Our impairment analysis is based on the current business strategy, expected growth rates and estimated future economic conditions.

Self-Insurance Programs

We self-insure a portion of employee medical benefits under the terms of our employee health insurance program, as well as a portion of our automobile, general liability and workers' compensation claims. We have insurance coverage that limits the exposure on individual claims. We also have insurance coverage that limits the total exposure to overall automobile, general liability and workers' compensation claims. The cost of the insurance is expensed over the contract periods.

We record an accrual for the claims expense related to our employee medical benefits, automobile, general liability and workers' compensation claims based upon the expected amount of all such claims. Trends in healthcare costs could have a significant impact on anticipated claims. If actual claims are higher than anticipated, our accrual might be insufficient to cover the claims costs, which would have an adverse impact on the operating results in that period.

Legal Proceedings and Other Loss Contingencies

We are subject to the possibility of various legal proceedings and other loss contingencies, many involving litigation incidental to the business and a variety of environmental laws and regulations. Litigation and other loss contingencies are subject to inherent uncertainties and the outcomes of such matters are often very difficult to predict and generally are resolved over long periods of time. We consider the likelihood of loss or the incurrence of a liability, as well as the ability to reasonably estimate the amount of loss, in determining loss contingencies. Estimating probable losses requires the analysis of multiple possible outcomes that often are dependent on the judgment about potential actions by third parties. Contingencies are recorded in the consolidated financial statements, or otherwise disclosed, in accordance with ASC 450, *Contingencies*. We accrue for an estimated loss contingency when it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. Management regularly evaluates current information available to determine whether accrual amounts should be adjusted. If the amount of an actual loss is greater than the amount accrued, this could have an adverse impact on our operating results in that period. Legal fees are expensed as incurred.

Income Taxes

All income tax amounts reflect the use of the asset and liability method. Under this method, deferred tax assets and liabilities are determined based on the expected future tax consequences of temporary differences between the carrying amounts of assets and liabilities for financial and income tax reporting purposes.

We operate in multiple tax jurisdictions with different tax rates and must determine the appropriate allocation of income to each of these jurisdictions. In the normal course of business, we will undergo scheduled reviews by taxing authorities regarding the amount of taxes due. These reviews include questions regarding the timing and amount of deductions and the allocation of income among various tax jurisdictions. Tax reviews often require an extended period of time to resolve and may result in income tax adjustments if changes to the allocation are required between jurisdictions with different tax rates.

We record our tax provision based on existing laws, experience with previous settlement agreements, the status of current IRS (or other taxing authority) examinations and management's understanding of how the tax authorities view certain relevant industry and commercial matters. In accordance with ASC 740, *Income Taxes*, we recognize the effect of income tax positions only if those positions are more likely than not of being sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. We establish reserves when we believe that certain positions may not prevail if challenged by a taxing authority. We adjust these reserves in light of changing facts and circumstances.

New Accounting Standards

In September 2011, the Financial Accounting Standards Board ("FASB") issued ASU 2011-08, *Goodwill and Other (Topic 350)—Testing Goodwill for Impairment*. The new guidance permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a

reporting unit is less than its carrying amount before applying the two-step goodwill impairment model that is currently in place. If it is determined through the qualitative assessment that a reporting unit's fair value is more likely than not greater than its carrying value, the remaining impairment steps would be unnecessary. The qualitative assessment is optional, allowing companies to go directly to the quantitative assessment. The new guidance is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011; however, early adoption is permitted. We do not expect the adoption of ASU 2011-08 will have a material impact on the consolidated financial statements.

In June 2011, the FASB issued ASU 2011-05, *Comprehensive Income (Topic 220)—Presentation of Comprehensive Income*. The new guidance requires an entity to present the total of comprehensive income, the components of net income and the components of other comprehensive income, either in a single continuous statement of comprehensive income or in two separate but consecutive statements. ASU 2011-05 eliminates the option to present the components of other comprehensive income as part of the statement of equity. In December 2011, the FASB issued ASU 2011-12, *Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in ASU 2011-05*, to defer the effective date of the specific requirement to present items that are reclassified out of accumulated other comprehensive income to net income alongside their respective components of net income and other comprehensive income. All other provisions of ASU 2011-05 are effective for the first annual reporting period, and interim periods within those years, beginning after December 15, 2011, and should be applied retrospectively. We do not expect the adoption of ASU 2011-05 will have a material impact on the consolidated financial statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Foreign Currency

Our foreign currency exposure is limited and arises from transactions denominated in foreign currencies, particularly intercompany loans, as well as from translation of the results of operations from our Canadian and, to a much lesser extent, Mexican subsidiaries. However, fluctuations between U.S. and non-U.S. currency values may adversely affect our results of operations and financial position. In addition, there may be tax inefficiencies in repatriating cash from non-U.S. subsidiaries. To the extent such repatriation is necessary for us to meet our debt service or other obligations, these tax inefficiencies may adversely affect us. We have not entered into any foreign exchange contracts to hedge changes in the Canadian or Mexican exchange rates. Canadian currency translation positively affected net income by approximately \$1.9 million and \$5.0 million for the years ended December 31, 2011 and 2010, respectively. Currency exposure of our Mexican operations is not material to the results of operations.

Interest Rates

We are exposed to interest rate risk on borrowings. Accordingly, interest rate fluctuations affect the amount of interest expense we are obligated to pay. We use interest rate derivative agreements to manage the variability of cash flows to be paid due to interest rate movements on our variable rate debt. We have designated our interest rate derivatives as cash flow hedges. The earnings impact of the derivatives designated as cash flow hedges are recorded upon the recognition of the interest related to the hedged debt. Any ineffectiveness in the hedging relationships is recognized in current earnings. There was no significant ineffectiveness in the years ended December 31, 2011 or 2010.

In August 2011, we purchased three interest rate caps for an aggregate amount of approximately \$1.1 million with an aggregate notional amount of \$925 million to manage our exposure to interest rate movements on our variable rate New Term Loan B credit facility when one-month LIBOR exceeds 1.25%. The interest rate cap agreements each had an effective date of August 16, 2011 and each mature on August 16, 2013.

In May 2009, we entered into an interest rate swap agreement with a notional amount of \$650 million to manage our exposure to interest rate movements on our variable rate Old Term Loan B credit facility. The interest rate swap agreement had an effective date of June 30, 2009, was scheduled to mature on June 30, 2012 and effectively resulted in a fixed LIBOR interest rate of 2.19% on \$650 million of the Old Term Loan B credit facility. In connection with the extinguishment of Old Term Loan B in May 2011, we de-designated our interest rate swap and entered into a swap termination agreement. We paid \$14.5 million to settle and terminate the swap agreement.

The fair values of the interest rate derivatives are based on quoted market prices for similar instruments from commercial banks. As noted above, our interest rate swap agreement was terminated in May 2011, and our old interest rate cap agreement matured on June 30, 2011. At December 31, 2011, the aggregate fair value of the three interest rate caps was a \$1.0 million asset recorded in "Other assets" on the consolidated balance sheet. At December 31, 2010, the fair value of the interest rate swap was a \$16.6 million unrealized loss recorded in "Other accrued expenses" on the consolidated balance sheet, and the fair value of the old interest rate cap was a less than \$0.1 million asset recorded in "Other current assets" on the consolidated balance sheet. Unrealized gains or losses on the interest rate derivatives are included as a component of "Accumulated other comprehensive income." At December 31, 2011, there was a net unrealized gain totaling \$0.1 million, net of tax benefits of less than \$0.1 million. We were exposed to credit loss in the event of non-performance by the counterparties; however, non-performance is not anticipated. We only partially hedged our exposure to interest rate fluctuations on our old variable rate debt. A sensitivity analysis of the impact on our variable rate debt instruments to a hypothetical 100 basis point increase in short-term rates for the year ended December 31, 2011 would have resulted in an increase in interest expense of approximately \$5.0 million.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) under the Exchange Act. Our internal control over financial reporting is designed under the supervision of our principal executive officer and principal financial and accounting officer, and effected by our Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. GAAP and include those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect our transactions and the dispositions of our assets;
- Provide reasonable assurance that our transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. GAAP, and that our receipts and expenditures are being made only in accordance with authorizations of our management and Board of Directors; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Under the supervision and with the participation of our management, including our principal executive officer and principal financial and accounting officer, we assessed the effectiveness of our internal control over financial reporting as of December 31, 2011, using the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework. Based on our assessment, we have concluded that our internal control over financial reporting was effective as of December 31, 2011. During our assessment, we did not identify any material weaknesses in our internal control over financial reporting.

We have excluded OPENLANE, Inc. from our assessment of internal control over financial reporting as of December 31, 2011 because it was acquired on October 3, 2011. The total assets and total revenues of OPENLANE, Inc. represent 5.2% and 0.9%, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2011. We continue to integrate new acquisitions into corporate processes. No potential internal control changes due to new acquisitions would be considered material to, or are reasonably likely to materially affect, our internal control over financial reporting.

KPMG LLP, the independent registered public accounting firm that audited our consolidated financial statements for the year ended December 31, 2011, also audited the effectiveness of the Company's internal control over financial reporting as of December 31, 2011 as stated in their report included in Item 8, *Financial Statements and Supplementary Data*, of this Annual Report on Form 10-K.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
KAR Auction Services, Inc.:

We have audited the accompanying consolidated balance sheets of KAR Auction Services, Inc. and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of income, stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2011. We also have audited the Company's internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying management's report on internal control over financial reporting. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of KAR Auction Services, Inc. and subsidiaries as of December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the years in the three year period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles. Also in our opinion, KAR Auction Services, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control—Integrated Framework* issued by COSO.

As described in the accompanying management's report on internal control over financial reporting, management has excluded OPENLANE, Inc. from its assessment of internal control over financial reporting as of December 31, 2011 because it was acquired by KAR Auction Services, Inc. on October 3, 2011. We have also excluded OPENLANE, Inc. from our audit of internal control over financial reporting. Total assets and total revenues of OPENLANE, Inc. represent 5.2% and 0.9%, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2011.

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements
December 31, 2011, 2010 and 2009

Note 1—Organization and Other Matters

KAR Auction Services, Inc. was organized in the State of Delaware on November 9, 2006. We are a holding company that was organized for the purpose of consummating a merger with ADESA, Inc. and related transactions that resulted in ADESA and Insurance Auto Auction, Inc. becoming, directly or indirectly, subsidiaries of the Company. We had no operations prior to the merger transactions on April 20, 2007.

Defined Terms

Unless otherwise indicated, the following terms used herein shall have the following meanings:

- “we,” “us,” “our,” “KAR Auction Services” and “the Company” refer, collectively, to KAR Auction Services, Inc. and all of its subsidiaries unless the context otherwise requires;
- “ADESA” refers, collectively, to ADESA, Inc., a wholly owned subsidiary of KAR Auction Services, and its subsidiaries, including OPENLANE, Inc. (“OPENLANE”, a wholly owned subsidiary of ADESA and its subsidiaries);
- “AFC” refers, collectively, to Automotive Finance Corporation, a wholly owned subsidiary of ADESA and its related subsidiaries;
- “Axle LLC” refers to Axle Holdings II, LLC, which is owned by affiliates of certain of the Equity Sponsors (Kelso & Company and Parthenon), certain members or former members of IAA management and certain co-investors in connection with the acquisition of IAA in 2005. Axle LLC is the former ultimate parent company of IAA and is a holder of common equity interests in KAR LLC;
- “Credit Agreement” refers to the Credit Agreement, dated May 19, 2011, among KAR Auction Services, as the borrower, the several banks and other financial institutions or entities from time to time parties thereto and the administrative agent;
- “2007 Credit Agreement” refers to the previous Credit Agreement, dated April 20, 2007, among KAR Auction Services, as the borrower, KAR LLC, as guarantor, the several lenders from time to time parties thereto and the administrative agent, the joint bookrunners, the co-documentation agents, the syndication agent and the joint lead arrangers named therein, as amended on June 10, 2009, October 23, 2009 and November 11, 2010. The 2007 Credit Agreement was terminated concurrently with our entry into the Credit Agreement described above;
- “Credit Facility” refers to the \$1.7 billion, six-year senior secured term loan facility and the \$250 million, five-year senior secured revolving credit facility, the terms of which are set forth in the Credit Agreement;
- “Equity Sponsors” refers, collectively, to Kelso Investment Associates VII, L.P., GS Capital Partners VI, L.P., ValueAct Capital Master Fund, L.P. and Parthenon Investors II, L.P., which collectively own through their respective affiliates a majority of the equity of KAR Auction Services;
- “IAA” refers, collectively, to Insurance Auto Auctions, Inc., a wholly owned subsidiary of KAR Auction Services, and its subsidiaries; and

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 1—Organization and Other Matters (Continued)

- “KAR LLC” refers to KAR Holdings II, LLC, which is owned by affiliates of the Equity Sponsors and management of the Company.

Initial Public Offering

KAR Auction Services’ sold 25,000,000 shares of common stock in an initial public offering in December 2009. The offering resulted in gross proceeds of \$300 million, before underwriters’ discounts and offering expenses. In addition, in December 2009, the underwriters’ exercised a portion of their overallotment option, and as a result an additional 2,656,050 shares of common stock were sold for gross proceeds of \$31.9 million, before underwriters’ discounts. As a result of the initial public offering and the underwriters’ partial exercise of the overallotment option, we received net proceeds of \$310.3 million, after deducting underwriter discounts of \$19.1 million and additional offering-related expenses of \$2.5 million.

We used the \$310.3 million of net proceeds from the initial public offering and overallotment option, together with \$199.0 million of cash on hand, to (i) repay \$250.0 million of our former senior secured term loan (Old Term Loan B) in December 2009, (ii) to repay \$225.6 million of our 10% senior subordinated notes in January 2010, (iii) to pay \$18.0 million of net premiums payable related to the notes repurchase in January 2010, (iv) to pay \$5.2 million of amendment fees related to Old Term Loan B in December 2009, and (v) to pay \$10.5 million of termination fees in December 2009 to our Equity Sponsors in connection with the termination of our financial advisory agreements with each of them.

Business and Nature of Operations

As of December 31, 2011, we have a network of online whole car auctions and 69 ADESA whole car auction sites and 159 IAA salvage vehicle auction sites. Our auctions facilitate the sale of used and salvage vehicles through physical, online or hybrid auctions, and which permit internet buyers to participate in physical auctions. ADESA Auctions and IAA are leading, national providers of wholesale and salvage vehicle auctions and related vehicle remarketing services for the automotive industry in North America. Our online service offerings include OPENLANE, a leader in internet-based remarketing solutions, and allow us to offer vehicles for sale from any location. Remarketing services include a variety of activities designed to transfer used and salvage vehicles between sellers and buyers throughout the vehicle life cycle. ADESA Auctions and IAA facilitate the exchange of these vehicles through an auction marketplace, which aligns sellers and buyers. As an agent for customers, the Company generally does not take title to or ownership to vehicles sold at the auctions. Generally fees are earned from the seller and buyer on each successful auction transaction in addition to fees earned for ancillary services.

ADESA has the second largest used vehicle auction network in North America, based upon the number of used vehicles sold through auctions annually, and also provides services such as inbound and outbound logistics, reconditioning, vehicle inspection and certification, titling, administrative and salvage recovery services. ADESA is able to serve the diverse and multi-faceted needs of its customers through the wide range of services offered.

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 1—Organization and Other Matters (Continued)

IAA is one of the two largest providers of salvage vehicle auctions and related services in North America. The salvage auctions facilitate the remarketing of damaged vehicles that are designated as total losses by insurance companies, recovered stolen vehicles for which an insurance settlement with the vehicle owner has already been made and older model vehicles donated to charity or sold by dealers in salvage auctions. The salvage auction business specializes in providing services such as inbound and outbound logistics, inspections, evaluations, titling and settlement administrative services.

AFC is a leading provider of floorplan financing to independent used vehicle dealers and this financing was provided through 103 locations throughout North America at December 31, 2011. Floorplan financing supports independent used vehicle dealers in North America who purchase vehicles at ADESA, IAA, independent auctions and auctions affiliated with other auction networks.

Note 2—Summary of Significant Accounting Policies

Principles of Consolidation

The consolidated financial statements include the accounts of KAR Auction Services and all of its wholly owned subsidiaries. Significant intercompany transactions and balances have been eliminated.

Use of Estimates

The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make estimates based in part on assumptions about current, and for some estimates, future economic and market conditions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Although the current estimates contemplate current conditions and expected future changes, as appropriate, it is reasonably possible that future conditions could differ from these estimates, which could materially affect our results of operations and financial position. Among other effects, such changes could result in future impairments of goodwill, intangible assets and long-lived assets, incremental losses on finance receivables, additional allowances on accounts receivable and deferred tax assets and changes in self insurance reserves.

Business Segments

Our operations are grouped into three operating segments: ADESA Auctions, IAA and AFC. The three operating segments also serve as our reportable business segments. Operations are measured through detailed budgeting and monitoring of contributions to consolidated income by each business segment.

Derivative Instruments and Hedging Activity

We recognize all derivative financial instruments in the consolidated financial statements at fair value in accordance with ASC 815, *Derivatives and Hedging*. We currently use three interest rate caps that are designated and qualify as cash flow hedges to manage the variability of cash flows to be paid due to interest rate movements on our variable rate debt. We do not, however, enter into hedging contracts for trading or speculative purposes. The fair values of the interest rate derivatives are based on quoted

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 2—Summary of Significant Accounting Policies (Continued)

market prices for similar instruments from commercial banks. The fair value of the derivatives is recorded in “Other assets” or “Other liabilities” on the consolidated balance sheet based on the gain or loss position of the contracts and their remaining term. Changes in the fair value of the interest rate derivatives designated as cash flow hedges are recorded net of tax in “Other comprehensive income.” Gains and losses on the interest rate derivatives are subsequently included in earnings as an adjustment to interest expense in the same periods in which the related interest payment being hedged is recognized in earnings. We use the change in variable cash flows method to assess hedge effectiveness in accordance with ASC 815.

Foreign Currency Translation

Revenues and expenses denominated in foreign currencies are translated into U.S. dollars at average exchange rates in effect during the year. Assets and liabilities of foreign operations are translated using the exchange rates in effect at year end. Foreign currency transaction gains and losses are included in the consolidated statements of income within “Other (income) expense, net” and resulted in a loss of \$0.9 million for the year ended December 31, 2011 and a gain of \$1.1 million and \$9.2 million for the years ended December 31, 2010 and 2009, respectively. Adjustments arising from the translation of net assets located outside the U.S. (gains and losses) are shown as a component of “Accumulated other comprehensive income (loss).”

Cash Equivalents

All highly liquid investments with an original maturity of three months or less are considered to be cash equivalents. These investments are valued at cost, which approximates fair value.

Restricted Cash

AFC Funding Corporation, a wholly owned, bankruptcy remote, consolidated, special purpose subsidiary of AFC, is required to maintain a cash reserve of 1 percent of total receivables sold to the bank conduit facility as security for the receivables sold. Automotive Finance Canada, Inc. (“AFCI”) is also required to maintain a cash reserve of 1 percent of total receivables sold to its securitization facility. The amount of the cash reserve depends on circumstances which are set forth in the securitization agreements. AFC also maintains other cash reserves from time to time associated with its banking relationships. In addition, ADESA has cash reserves with a bank related to vendor purchases.

Receivables

Trade receivables include the unremitted purchase price of vehicles purchased by third parties at the auctions, fees to be collected from those buyers and amounts for services provided by us related to certain consigned vehicles in our possession. These amounts due with respect to the consigned vehicles are generally deducted from the sales proceeds upon the eventual auction or other disposition of the related vehicles.

Finance receivables include floorplan receivables created by financing dealer purchases of vehicles in exchange for a security interest in those vehicles and special purpose loans. Floorplan receivables become due at the earlier of the dealer subsequently selling the vehicle or a predetermined time period

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 2—Summary of Significant Accounting Policies (Continued)

(generally 30 to 60 days). Special purpose loans relate to loans that are either line of credit loans or working capital loans that can be either secured or unsecured based on the facts and circumstances of the specific loans.

Due to the nature of our business, substantially all trade and finance receivables are due from vehicle dealers, salvage buyers, institutional sellers and insurance companies. We have possession of vehicles or vehicle titles collateralizing a significant portion of the trade and finance receivables.

Trade receivables and finance receivables are reported net of an allowance for doubtful accounts and credit losses. The allowances for doubtful accounts and credit losses are based on management's evaluation of the receivables portfolio under current conditions, the volume of the portfolio, overall portfolio credit quality, review of specific collection issues and such other factors which in management's judgment deserve recognition in estimating losses. Prior to January 1, 2010, finance receivables held for sale were carried at lower of cost or fair value. Fair value was based upon estimates of future cash flows including estimates of anticipated credit losses. Estimated losses for receivables sold by AFC Funding Corporation to the bank conduit facility with recourse to AFC Funding Corporation (see Note 6) were recorded as an accrued expense.

Other Current Assets

Other current assets consist of inventories, prepaid expenses, taxes receivable and notes receivable. The inventories, which consist of vehicles, supplies, and parts are accounted for on the specific identification method, and are stated at the lower of cost or market.

Goodwill

Goodwill represents the excess of cost over fair value of identifiable net assets of businesses acquired. Goodwill is tested for impairment annually in the second quarter, or more frequently as impairment indicators arise. The goodwill impairment test is a two-step test. Under the first step, the fair value of each reporting unit is compared with its carrying value (including goodwill). If the fair value of the reporting unit is less than its carrying value, an indication of goodwill impairment exists for the reporting unit and we must perform step two of the impairment test (measurement). Under step two, an impairment loss is recognized for any excess of the carrying amount of the reporting unit's goodwill over the implied fair value of that goodwill. The implied fair value of goodwill is determined by allocating the fair value of the reporting unit in a manner similar to a purchase price allocation, in accordance with ASC 805, *Business Combinations*. The residual fair value after this allocation is the implied fair value of the reporting unit goodwill. Fair value of the reporting unit is determined using a discounted cash flow analysis. If the fair value of the reporting unit exceeds its carrying value, step two does not need to be performed.

Customer Relationships and Other Intangible Assets

Customer relationships are amortized on a straight-line basis over the life determined in the valuation of the particular acquisition. Other intangible assets generally consist of tradenames, computer software and non-compete agreements, and if amortized, are amortized using the straight-line method. Tradenames with indefinite lives are not amortized and tradenames that have been assigned a

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 2—Summary of Significant Accounting Policies (Continued)

useful life are amortized over their estimated useful lives. Costs incurred related to software developed or obtained for internal use are capitalized during the application development stage of software development and amortized over their estimated useful lives. The non-compete agreements are amortized over the life of the agreements. The lives of other intangible assets are re-evaluated periodically when facts and circumstances indicate that revised estimates of useful lives may be warranted.

Property and Equipment

Property and equipment are stated at historical cost less accumulated depreciation. Depreciation is computed using the straight-line method at rates intended to depreciate the costs of assets over their estimated useful lives. Upon retirement or sale of property and equipment, the cost of the disposed assets and related accumulated depreciation is removed from the accounts and any resulting gain or loss is credited or charged to selling, general and administrative expenses. Expenditures for normal repairs and maintenance are charged to expense as incurred. Additions and expenditures for improving or rebuilding existing assets that extend the useful life are capitalized. Leasehold improvements made either at the inception of the lease or during the lease term are amortized over the shorter of their economic lives or the lease term including any renewals that are reasonably assured.

Unamortized Debt Issuance Costs

Debt issuance costs reflect the expenditures incurred in conjunction with Term Loan B, the senior notes, the senior subordinated notes, the bank credit facility and the U.S. and Canadian receivables purchase agreements. The debt issuance costs are being amortized under the effective interest method over their respective lives to interest expense.

Other Assets

Other assets consist of below market leases, deposits and other long-term assets.

Long-Lived Assets

Management reviews our property and equipment, customer relationships and other intangible assets for impairment whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. The determination includes evaluation of factors such as current market value, future asset utilization, business climate, and future cash flows expected to result from the use of the related assets. If the carrying amount of a long-lived asset exceeds the total amount of the estimated undiscounted future cash flows from that asset, a loss is recognized in the period to the extent that the carrying amount exceeds the fair value of the asset. The impairment analysis is based on our current business strategy, expected growth rates and estimated future economic and regulatory conditions.

Accounts Payable

Accounts payable include amounts due sellers from the proceeds of the sale of their consigned vehicles less any fees, as well as outstanding checks to sellers and vendors. Book overdrafts,

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 2—Summary of Significant Accounting Policies (Continued)

representing outstanding checks in excess of funds on deposit, are recorded in “Accounts payable” and amounted to \$136.5 million and \$104.0 million at December 31, 2011 and 2010, respectively.

Environmental Liabilities

Accruals for environmental matters are recorded when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated, based on current law and existing technologies. These accruals are adjusted periodically as assessment and remediation efforts progress, or as additional technical or legal information becomes available. Accruals for environmental liabilities are included in “Other accrued expenses” at undiscounted amounts and exclude claims for recoveries from insurance or other third parties.

Revenue Recognition

ADESA Auction Services

Revenues and the related costs are recognized when the services are performed. Auction fees from sellers and buyers are recognized upon the sale of the vehicle through the auction process. Most of the vehicles that are sold through auctions are consigned to ADESA by the seller and held at ADESA’s facilities or third party locations. ADESA does not take title to these consigned vehicles and recognizes revenue when a service is performed as requested by the owner of the vehicle. ADESA does not record the gross selling price of the consigned vehicles sold at auction as revenue. Instead, ADESA records only its auction fees as revenue because it does not take title to the consigned vehicles, has no influence on the vehicle auction selling price agreed to by the seller and buyer at the auction and the fees that ADESA receives for its services are generally a fixed amount. Revenues from reconditioning, logistics, vehicle inspection and certification, titling, evaluation and salvage recovery services are generally recognized when the services are performed.

IAA Salvage Services

Revenues (including vehicle sales and fee income) are generally recognized at the date the vehicles are sold at auction. Revenue not recognized at the date the vehicles are sold at auction includes annual buyer registration fees, which are recognized on a straight-line basis, and certain buyer-related fees, which are recognized when payment is received.

AFC

AFC’s revenue is comprised of interest and fee income, provision for credit losses and other revenues associated with our finance receivables. Prior to January 1, 2010, AFC’s net revenue was

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 2—Summary of Significant Accounting Policies (Continued)

comprised primarily of securitization income and interest and fee income less provisions for credit losses. The following table summarizes the primary components of AFC's revenue:

<u>AFC Revenue (In millions)</u>	<u>Year Ended December 31,</u>		
	<u>2011</u>	<u>2010</u>	<u>2009</u>
Securitization income	\$ —	\$ —	\$41.7
Interest and fee income	163.7	137.9	48.1
Other revenue	11.2	9.6	6.2
Provision for credit losses	(6.1)	(11.2)	(2.1)
	<u>\$168.8</u>	<u>\$136.3</u>	<u>\$93.9</u>

Securitization income

AFC generally sells its U.S. dollar denominated finance receivables through a revolving private securitization structure. As of January 1, 2010, our consolidated statement of income no longer reflects securitization income as a result of adopting Accounting Standards Update 2009-16. Additionally, we no longer record a gain on sale for securitization activity since finance receivables securitized no longer receive gain on sale treatment. Prior to January 1, 2010, securitization income was primarily comprised of the gain on sale of finance receivables sold, but also included servicing income, discount accretion, and any change in the fair value of the retained interest in finance receivables sold. Gains and losses on the sale of receivables were recognized upon transfer to the bank conduit facility. Interest expense related to the revolving sale agreement which was included in securitization income prior to January 1, 2010, is now included in "Interest expense" on the consolidated statement of income.

Interest and fee income

Interest on finance receivables is recognized based on the number of days the vehicle remains financed. AFC ceases recognition of interest on finance receivables when the loans become delinquent, which is generally 31 days past due. Dealers are also charged a fee to floorplan a vehicle ("floorplan fee") and extend the terms of the receivable ("curtailment fee"). AFC fee income including floorplan and curtailment fees is recognized over the life of the finance receivable.

Other revenue

Previously, certain AFC fees collected from customers were netted against cost of services as well as certain selling, general and administrative expenses. Such fees included lot check fees, filing fees and postage fees, each of which are charged to and collected from AFC's customers. Beginning in 2011, these fees were included in revenue with the corresponding costs reflected in their respective expense categories resulting in an increase to "Other revenue" as well as the related expenses for all periods

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 2—Summary of Significant Accounting Policies (Continued)

presented. As a result, AFC’s revenue, cost of services and selling, general and administrative expenses were revised as follows:

	Year Ended December 31, 2010		Year Ended December 31, 2009	
	As Previously Reported	Revised	As Previously Reported	Revised
Revenue	\$128.7	\$136.3	\$88.0	\$93.9
Cost of services (exclusive of depreciation and amortization)	28.5	34.1	29.8	34.0
Selling, general and administrative	18.6	20.6	11.6	13.3

Loan origination costs

Loan origination costs incurred by AFC in originating floorplan receivables are capitalized at the origination of the customer contract. Such costs for receivables retained are amortized over the estimated life of the customer contract. Costs associated with receivables sold prior to January 1, 2010 were included as a reduction in revenue.

Income Taxes

We file federal, state and foreign income tax returns in accordance with the applicable rules of each jurisdiction. We account for income taxes under the asset and liability method in accordance with ASC 740, *Income Taxes*. The provision for income taxes includes federal, foreign, state and local income taxes currently payable, as well as deferred taxes. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable amounts in years in which those temporary differences are expected to be recovered or settled. If it is more likely than not that some portion or all of a deferred tax asset will not be realized, a valuation allowance is recognized.

In accordance with ASC 740, we recognize the effect of income tax positions only if those positions are more likely than not of being sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs.

Net Income per Share

Basic net income per share is computed by dividing net income by the weighted average common shares outstanding during the year. Diluted net income per share represents net income divided by the sum of the weighted average common shares outstanding plus potential dilutive instruments such as stock options. The effect of stock options on net income per share-diluted is determined through the application of the treasury stock method, whereby net proceeds received by the Company based on assumed exercises are hypothetically used to repurchase our common stock at the average market price during the period. Stock options that would have an anti-dilutive effect on net income per share are excluded from the calculations.

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 2—Summary of Significant Accounting Policies (Continued)

Accounting for Stock-Based Compensation

The Company accounts for stock-based compensation under ASC 718, *Compensation—Stock Compensation*. We recognize all stock-based compensation as expense in the financial statements and that cost is measured as the fair value of the award at the grant date for equity-classified awards, while liability-classified awards are remeasured each reporting period at fair value. We also consider estimated forfeitures in determining compensation expense. Additionally, in accordance with ASC 718, cash flows resulting from tax deductions from the exercise of stock options in excess of recognized compensation cost (excess tax benefits) are classified as financing cash flows.

New Accounting Standards

In June 2011, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2011-05, *Comprehensive Income (Topic 220)—Presentation of Comprehensive Income*. The new guidance requires an entity to present the total of comprehensive income, the components of net income and the components of other comprehensive income, either in a single continuous statement of comprehensive income or in two separate but consecutive statements. ASU 2011-05 eliminates the option to present the components of other comprehensive income as part of the statement of equity. In December 2011, the FASB issued ASU 2011-12, *Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in ASU 2011-05*, to defer the effective date of the specific requirement to present items that are reclassified out of accumulated other comprehensive income to net income alongside their respective components of net income and other comprehensive income. All other provisions of ASU 2011-05 are effective for the first annual reporting period, and interim periods within those years, beginning after December 15, 2011, and should be applied retrospectively. We do not expect the adoption of ASU 2011-05 will have a material impact on the consolidated financial statements.

Reclassifications and Revisions

Certain prior year amounts in the consolidated financial statements have been reclassified or revised to conform to the current year presentation.

Note 3—Acquisitions

2011 Acquisitions

In August 2011, ADESA entered into an Agreement and Plan of Merger (the “Merger Agreement”) with OPENLANE. In October 2011, we completed the acquisition of OPENLANE, which became a wholly owned subsidiary of ADESA. OPENLANE is a North American online automotive auction company that provides a market for online buyers and sellers of wholesale vehicles. OPENLANE offers its comprehensive remarketing solutions to auto manufacturers, captive finance companies, lease and daily rental companies, used vehicle dealers, financial institutions and wholesale auto auctions throughout the United States and Canada.

As a result of the merger and pursuant to the terms of the Merger Agreement, each outstanding share of OPENLANE common stock and preferred stock (other than those shares of common stock or preferred stock held by OPENLANE) was converted into the right to receive an amount in cash as set

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 3—Acquisitions (Continued)

forth in the Merger Agreement. The value of the cash consideration payable in the merger was \$208.4 million plus approximately \$35 million for excess cash on OPENLANE's balance sheet at the closing of the merger. We funded the cash consideration paid at closing with a combination of approximately \$98.4 million of existing cash on-hand and borrowings of approximately \$145 million from our revolving credit facility. We utilized approximately \$35 million of acquired cash to immediately repay a portion of the borrowings on the revolving credit facility. In addition, we entered into operating lease obligations related to various facilities through 2017. Initial annual lease payments for the various facilities are approximately \$1.6 million per year. Financial results for the acquisition have been included in our consolidated financial statements from the date of acquisition. In the fourth quarter of 2011, OPENLANE contributed revenue of \$16.4 million and had a net loss of \$2.7 million, or \$0.02 per diluted share.

During 2011, we completed the acquisitions of a company that auctions heavy machinery, a company that develops satellite-based, GPS technology for advanced vehicle tracking and a salvage facility. The purchase agreements included contingent payments related to financial results and business deployments subsequent to the purchase date. The purchased assets included fixed assets, software, inventory, accounts receivable and other intangible assets. Financial results for each acquisition have been included in our consolidated financial statements from the date of acquisition.

The aggregate purchase price for the businesses acquired in 2011, net of cash, was approximately \$214.0 million, which includes estimated contingent payments with a present value of \$0.4 million. The maximum amount of undiscounted contingent payments related to these acquisitions could approximate \$0.4 million. The purchase price for the acquired businesses was allocated to acquired assets and liabilities based upon fair values, including \$94.7 million to intangible assets, representing the fair value of acquired customer relationships, tradenames, software and noncompete agreements, which are being amortized over their expected useful lives. The acquisitions resulted in aggregate goodwill of \$123.6 million. The financial impact of these acquisitions, including pro forma financial results, was immaterial to the Company's statement of operations.

Some of our acquisitions from prior years include contingent payments related to revenues or unit volumes of certain vehicles sold subsequent to the purchase dates. We made contingent payments in 2011, 2010 and 2009 totaling approximately \$1.8 million, \$2.0 million and \$1.6 million, respectively, pursuant to these agreements, which resulted in additional goodwill. In addition, in 2011, we reversed contingent consideration of approximately \$4.6 million related to certain prior year acquisitions based on revised forecasts which indicated the unit volumes required during the measurement period in order for the contingent consideration to become payable would not be met. The net \$4.6 million of contingent consideration adjustments were recorded to "Other (income) expense, net" in the consolidated statement of income.

2010 Acquisitions

During the fourth quarter of 2010 the Company completed the acquisition of six used vehicle auctions, two processors of charity donation vehicles which are primarily sold through salvage operations, a loan servicing company focused on servicing loans made by automobile lenders and a company focused on remarketing repossessed vehicles for credit unions. The various purchase agreements included contingent payments related to revenues or unit volumes subsequent to the

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 3—Acquisitions (Continued)

purchase dates. The purchased assets included land, buildings, accounts receivable, operating equipment, customer relationships and other intangible assets. In addition, we entered into operating lease obligations related to certain facilities with initial annual lease payments aggregating approximately \$0.8 million. Financial results for each acquisition have been included in our consolidated financial statements from the date of acquisition.

The aggregate purchase price for the businesses acquired in 2010 was approximately \$59.4 million, which includes estimated contingent payments with a present value of \$10.7 million. The maximum amount of undiscounted contingent payments related to these acquisitions could approximate \$11.1 million. The purchase price for the acquired businesses was allocated to acquired assets and liabilities based upon fair values, including \$27.9 million to intangible assets, representing the fair value of acquired customer relationships, tradenames and noncompete agreements which are being amortized over their expected useful lives. The acquisitions resulted in aggregate goodwill of \$26.2 million. The financial impact of these acquisitions, including pro forma financial results, was immaterial to the Company's balance sheet and statement of income.

Note 4—Stock-Based Compensation Plans

Our stock-based compensation expense includes expense associated with KAR Auction Services, Inc. service and exit option awards, KAR LLC operating unit awards and Axle LLC operating unit awards. We have classified the KAR LLC and Axle LLC operating units as liability awards. In February 2009, our board took certain actions related to our stock-based compensation plans which resulted in all outstanding option awards being classified as liability awards prospectively. On December 10, 2009, in conjunction with the initial public offering, our board rescinded its actions from February 2009 which resulted in all service options being classified as equity awards. In addition, the exit options were modified which resulted in all exit options becoming equity classified. The main difference between a liability-classified award and an equity-classified award is that liability-classified awards are remeasured each reporting period at fair value. The modifications are discussed in more detail below.

The compensation cost that was charged against income for all stock-based compensation plans was \$17.0 million, \$19.8 million and \$16.4 million for the years ended December 31, 2011, 2010 and 2009, respectively, and the total income tax benefit recognized in the consolidated statement of income for options was approximately \$6.1 million, \$6.6 million and \$3.0 million for the years ended December 31, 2011, 2010 and 2009, respectively. We did not capitalize any stock-based compensation cost in the years ended December 31, 2011, 2010 or 2009. The following table summarizes our stock-based compensation expense by type of award (*in millions*):

	<u>Year Ended December 31,</u>		
	<u>2011</u>	<u>2010</u>	<u>2009</u>
Service options	\$ 1.2	\$ 0.3	\$ 7.8
Exit options	15.9	18.0	0.2
KAR LLC profit interests	0.3	1.6	4.2
Axle LLC profit interests	(0.4)	(0.1)	4.2
Total	<u>\$17.0</u>	<u>\$19.8</u>	<u>\$16.4</u>

KAR Auction Services, Inc.

Note 4—Stock-Based Compensation Plans (Continued)

Axle Holdings, Inc. Stock Incentive Plan

Prior to the merger transactions, IAA was a subsidiary of Axle Holdings, Inc. (“Axle Holdings”), which in turn was a subsidiary of Axle LLC. Axle Holdings maintained the Axle Holdings, Inc. Stock Incentive Plan to provide equity incentive benefits to the IAA employees. Under the Axle Holdings plan, service options and exit options were awarded. The service options vested in three equal annual installments from the grant date based upon service with Axle Holdings and its subsidiaries. The exit options vested upon a change in equity control of Axle LLC. In connection with the completion of the merger transactions, approximately 5.8 million options (service and exit) to purchase shares of Axle Holdings, Inc. stock were converted into approximately 2.3 million options (service and exit) to purchase shares of KAR Auction Services; these converted options have the same terms and conditions as were applicable to the options to purchase shares of Axle Holdings, Inc. The fair value of the exchanged options for which service had been provided approximated \$8.9 million and was included as part of the merger price. The converted options are included in the KAR Auction Services, Inc. service option table and exit option table below.

Prior to December 10, 2009, compensation cost was recognized using the straight-line attribution method over the requisite service period for the unvested service options exchanged at the date of the merger. As the ultimate exercisability of the exit options exchanged was contingent upon an event (specifically, a change of control), the compensation expense related to the exchanged exit options was not expected to be recognized until such an event was consummated. However, on December 10, 2009, in conjunction with the initial public offering, all outstanding service options became fully vested and exercisable. In addition, the vesting criteria and exercisability of the exit options were modified. Our board amended the terms of all exit options to substitute the existing criteria governing the exercisability of the exit options with criteria governing exercisability based on the price per share of our common stock. Accordingly, rather than vest upon the achievement of certain specified

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 4—Stock-Based Compensation Plans (Continued)

performance goals at the time of an exit event, the exit options originally granted under the Axle Holdings, Inc. Stock Incentive Plan vest as follows:

<u>Amount Vested</u>	<u>Conditions to Vesting</u>
25% of exit options shall vest and become exercisable if	(i) the fair market value of Company common stock exceeds \$16.01*
An additional 25% of exit options shall vest and become exercisable if	(i) the fair market value of Company common stock exceeds \$19.21*
An additional 25% of exit options shall vest and become exercisable if	(i) the fair market value of Company common stock exceeds \$22.41*
An additional 25% of exit options shall vest and become exercisable if	(i) the fair market value of Company common stock exceeds \$25.62*

* Additional conditions to vesting: (ii) the price of the Company’s common stock on the last trading day of a 90 consecutive trading day period must be greater than or equal to 85% of \$16.01, \$19.21, \$22.41 or \$25.62, respectively; and (iii) the option holder is a director, officer, employee, consultant or agent of the Company or any of its subsidiaries on the date on which the conditions set forth in (i) and (ii) above are satisfied.

For purposes of determining the conditions to vesting, the “fair market value” of any share of Company common stock, on any date of determination, shall be the average for 90 consecutive trading days prior to such date of determination of the last sales price for a share of Company common stock on the principal securities exchange on which the Company common stock is then listed.

In May 2011, the vesting criteria for the first 25% of the exit options was met and as such 25% of the outstanding exit options became exercisable.

Axle LLC Profit Interests

Axle LLC also maintained two types of profit interests, operating units and value units, which are held by certain designated employees of IAA. Upon an exit event as defined by the Axle LLC operating agreement, holders of the profit interests will receive a cash distribution from Axle LLC. The service requirement for the operating units was fulfilled during 2008 and as such the operating units are fully vested. The value units vest upon a change in equity control of Axle LLC. The number of value units eligible for distribution will be determined based on the strike price and certain performance hurdles based on the Equity Sponsors and other investors’ achievement of certain multiples on their original indirect equity investment in Axle Holdings subject to a minimum internal rate of return at the time of distribution. A total of 191,152 operating units and 382,304 value units are maintained by

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 4—Stock-Based Compensation Plans (Continued)

Axle LLC and there were no changes to the terms and conditions of the units as a result of the merger transactions.

The operating units are accounted for as liability awards and as such, compensation expense related to the operating units is recognized using the graded-vesting attribution method. For the years ended December 31, 2011 and 2010, \$0.4 million and \$0.1 million, respectively, of compensation expense for the Axle LLC operating units was reversed as the fair value of the operating units declined. Compensation expense for the year ended December 31, 2009 was \$4.2 million. As of December 31, 2011, the Axle LLC operating units were fully vested.

The Company has not recorded compensation expense related to the value units and none will be recognized on the value units until it becomes probable that an exit event (specifically, a change in control) will occur.

KAR Auction Services, Inc. 2009 Omnibus Stock and Incentive Plan

We adopted the KAR Auction Services, Inc. 2009 Omnibus and Stock Incentive Plan (“Omnibus Plan”) in December 2009. The Omnibus Plan is intended to provide equity or cash based awards to our employees. The maximum number of shares that may be issued pursuant to awards under the Omnibus Plan is approximately 6.5 million. The Omnibus Plan provides for the grant of options, restricted stock, stock appreciation rights, other stock-based awards and cash based awards.

In 2011, we granted approximately 1.3 million service options with a weighted average exercise price of \$15.05 per share under the Omnibus Plan, and in 2010 we granted approximately 0.5 million service options with a weighted average exercise price of \$12.90 per share. In addition, in 2010 we granted approximately 0.7 million exit options with an exercise price per share of \$13.46 under the Omnibus Plan. The service and exit options have a ten year life and the service options vest in four equal annual installments, commencing on the first anniversary of the respective grant dates. The exit options contain the same vesting criteria as those noted below under the KAR Auctions Services, Inc. Stock Incentive Plan.

KAR Auction Services, Inc. Stock Incentive Plan

The Company adopted the KAR Auction Services, Inc. Stock Incentive Plan (“the Plan”) in May 2007. The Plan was intended to provide equity incentive benefits to the Company’s employees. The maximum number of shares that were to be issued pursuant to awards under the Plan was approximately 7.9 million. The Plan provided for the grant of incentive stock options and non-qualified stock options and restricted stock. Awards granted since the adoption of the Plan were non-qualified stock options, and no further grants will be awarded under the Plan.

The Plan provided two types of stock options: service-related options, which were to vest ratably in four annual installments from the date of grant based upon the passage of time, and performance-related “exit” options, which were generally to become exercisable upon a change in equity control of KAR LLC. Under the exit options, in addition to the change in equity control requirement, the number of options that vest were to be determined based on the strike price and certain performance hurdles based on the Equity Sponsors and other investors’ achievement of certain multiples on their original indirect equity investment in KAR Auction Services subject to a minimum internal rate of return at the

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 4—Stock-Based Compensation Plans (Continued)

time of change in equity control. All vesting criteria was subject to continued employment with KAR LLC or affiliates thereof. Options were to be granted under the Plan at an exercise price of not less than the fair market value of a share of KAR Auction Services common stock on the date of grant and have a contractual life of ten years. In the event of a change in control, any unvested options were to become fully vested and cashed out. In August 2007, we granted approximately 1.6 million service options and 4.9 million exit options, with an exercise price of \$10 per share, under the Plan. In 2008, we granted approximately 0.2 million service options and 0.6 million exit options, with a weighted average exercise price of \$16.47 per share. In 2009, we granted 0.2 million service options and 0.5 million exit options, with an exercise price of \$10 per share.

On December 10, 2009, in conjunction with the initial public offering, all outstanding service options became fully vested and exercisable. In addition, the vesting criteria and exercisability of the exit options was modified. The board amended the terms of all exit options to substitute the existing criteria governing the exercisability of the exit options with criteria governing exercisability based on the price per share of our common stock. Accordingly, rather than vest upon the achievement of certain specified performance goals at the time of an exit event, the exit options granted under the KAR Auction Services, Inc. Stock Incentive Plan vest as follows:

<u>Amount Vested</u>	<u>Conditions to Vesting</u>
25% of exit options shall vest and become exercisable if	(i) the fair market value of Company common stock exceeds \$20.00*
An additional 25% of exit options shall vest and become exercisable if	(i) the fair market value of Company common stock exceeds \$25.00*
An additional 25% of exit options shall vest and become exercisable if	(i) the fair market value of Company common stock exceeds \$30.00*
An additional 25% of exit options shall vest and become exercisable if	(i) the fair market value of Company common stock exceeds \$35.00*

* Additional conditions to vesting: (ii) the price of the Company’s common stock on the last trading day of a 90 consecutive trading day period must be greater than or equal to 85% of \$20.00, \$25.00, \$30.00 or \$35.00, respectively; and (iii) the option holder is a director, officer, employee, consultant or agent of the Company or any of its subsidiaries on the date on which the conditions set forth in (i) and (ii) above are satisfied.

For purposes of determining the conditions to vesting, the “fair market value” of any share of Company common stock, on any date of determination, shall be the average for 90 consecutive trading days prior to such date of determination of the last sales price for a share of Company common stock on the principal securities exchange on which the Company common stock is then listed.

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)

Note 4—Stock-Based Compensation Plans (Continued)

The following table summarizes service option activity under the Omnibus Plan and the Plan for the year ended December 31, 2011:

<u>Service Options</u>	<u>Number</u>	<u>Weighted Average Exercise Price</u>	<u>Weighted Average Remaining Contractual Term</u>	<u>Aggregate Intrinsic Value (in millions)</u>
Outstanding at January 1, 2011	2,736,473	\$ 9.61		
Granted	1,263,676	15.05		
Exercised	(729,273)	7.56		
Forfeited	(12,042)	12.34		
Cancelled	(1,241)	13.32		
Outstanding at December 31, 2011	<u>3,257,593</u>	<u>\$12.17</u>	<u>7.4 years</u>	<u>\$7.0</u>
Exercisable at December 31, 2011	<u>1,632,301</u>	<u>\$ 9.78</u>	<u>5.5 years</u>	<u>\$6.5</u>

The intrinsic value presented in the table above represents the amount by which the market value of the underlying stock exceeds the exercise price of the option at December 31, 2011. The intrinsic value changes continuously based on the fair value of our stock. The market value is based on KAR Auction Services' closing stock price of \$13.50 on December 30, 2011. The total intrinsic value of service options exercised during the year ended December 31, 2011 was \$7.2 million. The fair value of all vested and exercisable service options at December 31, 2011, 2010 and 2009 was \$22.0 million, \$30.9 million and \$44.5 million, respectively.

We recognized compensation expense for the service options of approximately \$1.2 million and \$0.3 million for the years ended December 31, 2011 and 2010, respectively. In accordance with ASC 718, we determined the fair value of all outstanding service options in 2009, at the date of the modification (December 10, 2009), using the Black-Scholes option pricing model. The fair value of the modified service options was approximately \$19.6 million. We recognized compensation expense for the service options of approximately \$7.8 million for the year ended December 31, 2009. Since the service options became fully vested in December 2009, we recorded the difference between the modified fair value of the awards and the cumulative compensation expense previously recognized. As of December 31, 2011, there was approximately \$6.4 million of unrecognized compensation expense related to nonvested service options.

With the exception of the period of time between February 2009 and December 10, 2009, service options have been accounted for as equity awards and, as such, compensation expense was measured based on the fair value of the award at the date of grant and recognized over the four year service period, using the straight-line attribution method. The weighted average fair value of the service options granted was \$4.69 per share, \$4.07 per share and \$3.22 per share for the years ended December 31, 2011, 2010 and 2009, respectively. The weighted average fair value of all service options modified on December 10, 2009 was \$6.09 per share. The fair value of service options granted, as well

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 4—Stock-Based Compensation Plans (Continued)

as service options modified on December 10, 2009, was estimated on the date of grant using the Black-Scholes option pricing model and the following assumptions:

<u>Assumptions</u>	<u>2011</u>	<u>2010</u>	<u>2009</u>
Risk-free interest rate	0.625% - 1.69%	0.805% - 1.81%	0.32% - 2.205%
Expected life	4 years	4 years	1 - 5 years
Expected volatility	38.0%	38.0%	38.0%
Dividend yield	0%	0%	0%

Risk-free interest rate—This is the yield on U.S. Treasury Securities posted at the date of grant (or date of modification) having a term equal to the expected life of the option. An increase in the risk-free interest rate will increase compensation expense.

Expected life—years—This is the period of time over which the options granted are expected to remain outstanding. Options granted by KAR Auction Services had a maximum term of ten years. An increase in the expected life will increase compensation expense.

Expected volatility—Actual changes in the market value of stock are used to calculate the volatility assumption. Based on the Company’s limited time as a publicly traded company, the expected volatility used was determined based on a combination of historical volatility, the volatility of selected comparable companies and other relevant factors. An increase in the expected volatility will increase compensation expense.

Dividend yield—This is the annual rate of dividends per share over the exercise price of the option. An increase in the dividend yield will decrease compensation expense.

The following table summarizes exit option activity under the Omnibus Plan and the Plan for the year ended December 31, 2011:

<u>Exit Options</u>	<u>Number</u>	<u>Weighted Average Exercise Price</u>	<u>Weighted Average Remaining Contractual Term</u>	<u>Aggregate Intrinsic Value (in millions)</u>
Outstanding at January 1, 2011	6,490,207	\$10.50		
Granted	—	N/A		
Exercised	(33,671)	6.79		
Forfeited	(153,150)	11.80		
Cancelled	—	N/A		
Outstanding at December 31, 2011	<u>6,303,386</u>	<u>\$10.49</u>	<u>6.0 years</u>	<u>\$20.1</u>
Exercisable at December 31, 2011	<u>117,381</u>	<u>\$ 6.69</u>	<u>3.9 years</u>	<u>\$ 0.8</u>

The intrinsic value presented in the table above represents the amount by which the market value of the underlying stock exceeds the exercise price of the option at December 31, 2011. The intrinsic value changes continuously based on the fair value of our stock. The market value is based on KAR Auction Services’ closing stock price of \$13.50 on December 30, 2011. The total intrinsic value of exit

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 4—Stock-Based Compensation Plans (Continued)

options exercised during the year ended December 31, 2011 was \$0.4 million. The fair value of all vested and exercisable exit options at December 31, 2011 was \$1.6 million.

The requisite service period and the fair value of the exit options granted in 2010 and at the date of the modification were developed in consultation with independent valuation specialists. The weighted average fair value of exit options granted in 2010 was \$7.89 per share. The weighted average fair value of all exit options modified on December 10, 2009 was \$6.96 per share, and the fair value of the modified exit options was approximately \$10.4 million. The time horizons over which our stock price is projected to achieve the market conditions noted in the above tables ranges from 1.2 years to 3.9 years. As a result, compensation expense will be recognized over the derived service periods ranging from 1.2 years to 3.9 years. We recognized compensation expense for these exit options of approximately \$15.9 million, \$18.0 million and \$0.2 million for the years ended December 31, 2011, 2010 and 2009, respectively. As of December 31, 2011, there was approximately \$10.7 million of total unrecognized compensation expense related to the nonvested exit options.

KAR LLC Profit Interests

Prior to December 10, 2009, KAR LLC owned 100% of the outstanding shares of KAR Auction Services. The KAR LLC operating agreement provides for profit interests in KAR LLC to be granted and held by certain designated employees of the Company. Upon an exit event as defined by the KAR LLC operating agreement, and at any other time determined by the board, holders of the profit interests will receive a cash distribution from KAR LLC.

Two types of profit interests were created by the KAR LLC operating agreement: (1) operating units, which vest in four equal installments commencing on the first anniversary of the grant date based upon service, and (2) value units, which are eligible for distributions upon attaining certain performance hurdles. The service requirement for the operating units was fulfilled during 2011 and as such the operating units are fully vested. The number of value units eligible for distributions will be determined based on the strike price and certain performance hurdles based on the Equity Sponsors and other investors' achievement of certain multiples on their original indirect equity investment in KAR Auction Services subject to an internal rate of return minimum at the time of distribution.

There were approximately 0.1 million operating units awarded and 0.4 million value units awarded to employees of the Company in June 2007 with a strike price equal to \$100 for the profit interests. The following table summarizes the KAR LLC profit interests activity for the year ended December 31, 2011:

<u>Profit Interests:</u>	<u>Operating Units</u>	<u>Value Units</u>
Outstanding at January 1, 2011	121,046	363,139
Granted	—	—
Forfeited	—	—
Outstanding at December 31, 2011	<u>121,046</u>	<u>363,139</u>

The grant date fair value of the operating units and value units was \$36.90 and \$45.21, respectively. The fair value of each operating unit was estimated on the date of grant using the Black-

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 4—Stock-Based Compensation Plans (Continued)

Scholes option pricing model. The fair value of each value unit was estimated on the date of grant using a lattice-based valuation model.

The compensation expense of KAR LLC, which is for the benefit of Company employees, will result in a capital contribution from KAR LLC to the Company and compensation expense for the Company. Compensation expense related to the operating units is recognized using the straight-line attribution method and resulted in \$0.3 million, \$1.6 million and \$4.2 million for the years ended December 31, 2011, 2010 and 2009, respectively. As of December 31, 2011, the KAR LLC operating units were fully vested.

The Company has not recorded compensation expense related to the value units and none will be recognized until it becomes probable that the performance conditions associated with the value units will be achieved.

KAR Auction Services, Inc. Employee Stock Purchase Plan

Our board of directors and stockholders adopted the KAR Auction Services, Inc. Employee Stock Purchase Plan (“ESPP”) in December 2009 and the ESPP was implemented in the second quarter of 2010. A maximum of 1,000,000 shares of our common stock have been reserved for issuance under the ESPP and at December 31, 2011, 883,656 shares remain available for purchase under the ESPP. The ESPP provides for one month offering periods with a 15% discount from the fair market value of a share on the date of purchase. In accordance with ASC 718, *Compensation—Stock Compensation*, the entire 15% purchase discount is recorded as compensation expense. A participant’s combined payroll deductions and cash payments in the ESPP may not exceed \$25,000 per year.

Note 5—Net Income Per Share

The following table sets forth the computation of net income per share (*in millions except per share amounts*):

	Year Ended December 31,		
	2011	2010	2009
Net income	<u>\$ 72.2</u>	<u>\$ 69.6</u>	<u>\$ 23.2</u>
Weighted average common shares outstanding	<u>136.0</u>	<u>134.9</u>	<u>108.0</u>
Effect of dilutive stock options	<u>1.8</u>	<u>1.0</u>	<u>0.1</u>
Weighted average common shares outstanding and potential common shares	<u>137.8</u>	<u>135.9</u>	<u>108.1</u>
Net income per share			
Basic	<u>\$ 0.53</u>	<u>\$ 0.52</u>	<u>\$ 0.21</u>
Diluted	<u>\$ 0.52</u>	<u>\$ 0.51</u>	<u>\$ 0.21</u>

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 5—Net Income Per Share (Continued)

Basic net income per share was calculated by dividing net income by the weighted-average number of outstanding common shares for the period. Diluted net income per share was calculated consistent with basic net income per share including the effect of dilutive unissued common shares related to our stock-based employee compensation program. The effect of stock options on net income per share-diluted is determined through the application of the treasury stock method, whereby proceeds received by the Company based on assumed exercises are hypothetically used to repurchase our common stock at the average market price during the period. Stock options that would have an anti-dilutive effect on net income per share are excluded from the calculations. Approximately 0.9 million, 0.6 million and 0.6 million options were excluded from the calculation of diluted net income per share for the years ended December 31, 2011, 2010 and 2009, respectively. Total options outstanding at December 31, 2011, 2010 and 2009 were 9.6 million, 9.2 million and 9.2 million, respectively.

Note 6—Allowance for Credit Losses and Doubtful Accounts

The following is a summary of the changes in the allowance for credit losses related to finance receivables (*in millions*):

	Year Ended December 31,		
	2011	2010	2009
Allowance for Credit Losses			
Balance at beginning of period	\$ 9.7	\$ 5.9	\$ 6.3
Provision for credit losses	6.1	11.2	1.8
Recoveries	4.5	4.0	0.4
Less charge-offs	(11.3)	(11.4)	(2.8)
Other	—	—	0.2
Balance at end of period	\$ 9.0	\$ 9.7	\$ 5.9

AFC's allowance for credit losses includes estimated losses for finance receivables currently held on the balance sheet of AFC and its subsidiaries as well as an allowance for any further deterioration in the finance receivables after they were repurchased from the bank conduit facility in 2009. Additionally, an accrued liability of \$2.4 million for the estimated losses for loans sold by AFC Funding was recorded at December 31, 2009. These loans were sold to a bank conduit facility with recourse to AFC Funding and came back on the balance sheet of AFC Funding at fair value when they became ineligible under the terms of the collateral arrangement with the bank conduit facility. The allowance for credit loss activity for 2009 does not include the losses incurred when receivables repurchased from the bank conduit facility were recorded at fair value as they came back on our balance sheet, which is discussed further in Note 7.

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 6—Allowance for Credit Losses and Doubtful Accounts (Continued)

The following is a summary of changes in the allowance for doubtful accounts related to trade receivables (*in millions*):

	Year Ended December 31,		
	2011	2010	2009
Allowance for Doubtful Accounts			
Balance at beginning of period	\$ 6.3	\$ 6.9	\$10.8
Provision for credit losses	2.2	2.6	1.1
Less net charge-offs	(2.1)	(3.2)	(5.0)
Balance at end of period	<u>\$ 6.4</u>	<u>\$ 6.3</u>	<u>\$ 6.9</u>

Recoveries of trade receivables were netted with charge-offs, as they were not material. Changes in the Canadian exchange rate did not have a material effect on the allowance for doubtful accounts.

Note 7—Finance Receivables and Obligations Collateralized by Finance Receivables

AFC sells the majority of its U.S. dollar denominated finance receivables on a revolving basis and without recourse to a wholly owned, bankruptcy remote, consolidated, special purpose subsidiary (“AFC Funding Corporation”), established for the purpose of purchasing AFC’s finance receivables. A securitization agreement allows for the revolving sale by AFC Funding Corporation to a bank conduit facility of undivided interests in certain eligible finance receivables subject to committed liquidity.

On April 26, 2011, AFC and AFC Funding Corporation entered into the Fourth Amended and Restated Receivables Purchase Agreement (the “Receivables Purchase Agreement”). The Receivables Purchase Agreement increased AFC Funding’s U.S. committed liquidity from \$450 million to \$650 million and extended the facility’s maturity date from April 20, 2012 to June 30, 2014. In addition, the interest costs for amounts borrowed increased approximately 0.5% and certain of the covenants and termination events in the Receivables Purchase Agreement that are tied to the performance of the finance receivables portfolio were modified.

On May 24, 2011, Automotive Finance Canada, Inc. (“AFCI”) entered into an Amended and Restated Receivables Purchase Agreement (the “Canadian Receivables Purchase Agreement”). The Canadian Receivables Purchase Agreement increased AFCI’s Canadian committed liquidity from C\$75 million to C\$100 million and extended the facility’s maturity date from April 20, 2012 to June 30, 2014. AFCI’s committed liquidity is provided through a third party conduit (separate from the U.S. conduit). The receivables sold pursuant to both the U.S. and Canadian securitization agreements are accounted for as secured borrowings.

The following tables present quantitative information about delinquencies, credit losses less recoveries (“net credit losses”) and components of securitized financial assets and other related assets

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)

Note 7—Finance Receivables and Obligations Collateralized by Finance Receivables (Continued)

managed. For purposes of this illustration, delinquent receivables are defined as receivables 31 days or more past due.

<u>(in millions)</u>	<u>December 31, 2011</u>		<u>Net Credit Losses During 2011</u>
	<u>Principal Amount of:</u>		
	<u>Receivables</u>	<u>Receivables Delinquent</u>	
Floorplan receivables	\$877.6	\$3.3	\$6.8
Special purpose loans	5.6	0.3	—
Total receivables managed	<u>\$883.2</u>	<u>\$3.6</u>	<u>\$6.8</u>

<u>(in millions)</u>	<u>December 31, 2010</u>		<u>Net Credit Losses During 2010</u>
	<u>Principal Amount of:</u>		
	<u>Receivables</u>	<u>Receivables Delinquent</u>	
Floorplan receivables	\$765.0	\$4.8	\$7.4
Special purpose loans	6.6	0.8	—
Total receivables managed	<u>\$771.6</u>	<u>\$5.6</u>	<u>\$7.4</u>

The net credit losses for receivables held and sold approximated \$25.4 million for the year ended December 31, 2009.

AFC's allowance for losses was \$9.0 million and \$9.7 million at December 31, 2011 and December 31, 2010, respectively.

As of December 31, 2011 and 2010, \$877.6 million and \$763.9 million, respectively, of finance receivables and a cash reserve of 1 percent of finance receivables securitized served as security for the \$610.3 million and \$520.1 million of obligations collateralized by finance receivables at December 31, 2011 and 2010, respectively. The amount of the cash reserve depends on circumstances which are set forth in the securitization agreements.

Proceeds from the revolving sale of receivables to the bank conduit facility are used to fund new loans to customers. AFC, AFC Funding Corporation and AFCI must maintain certain financial covenants including, among others, limits on the amount of debt AFC and AFCI can incur, minimum levels of tangible net worth, and other covenants tied to the performance of the finance receivables portfolio. The securitization agreements also incorporate the financial covenants of our credit facility. At December 31, 2011, we were in compliance with the covenants in the securitization agreements.

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 7—Finance Receivables and Obligations Collateralized by Finance Receivables (Continued)

The following table summarizes certain cash flows received from and paid to the special purpose subsidiaries (*in millions*):

	Year Ended December 31,		
	2011	2010	2009
Proceeds from sales of finance receivables	N/A	N/A	\$3,215.1
Servicing fees received	N/A	N/A	10.4
Proceeds received on retained interests in finance receivables sold	N/A	\$89.8	84.5

Prior to January 1, 2010, retained interests in finance receivables sold were classified as trading securities pursuant to ASC 320, Investments—*Debt and Equity Securities*, and carried at estimated fair value with gains and losses recognized in the consolidated statement of income. Fair value was based upon estimates of future cash flows, using assumptions that market participants would use to value such investments, including estimates of anticipated credit losses over the life of the finance receivables sold. The cash flows were discounted using a market discount rate. Our retained interests in finance receivables sold included a nominal interest only strip and amounted to \$89.8 million at December 31, 2009. Sensitivities associated with our retained interests were insignificant at all periods presented due to the short-term nature of the asset.

Accounting Standards Update 2009-16 amended ASC 860, *Transfers and Servicing*, and we adopted the guidance on January 1, 2010. The guidance specifies that the finance receivable transactions on or subsequent to January 1, 2010 under our revolving sale agreement be included in our balance sheet. This resulted in an increase in assets and related obligations in 2010. Obligations collateralized by finance receivables were \$520.1 million at December 31, 2010. In addition, the guidance eliminated securitization income accounting and resulted in the recording of fee and interest income and interest expense for the finance receivable transactions under the revolving sale agreement.

Note 8—Goodwill and Other Intangible Assets

Goodwill consisted of the following (*in millions*):

	ADESA Auctions	IAA	AFC	Total
Balance at December 31, 2009	\$826.6	\$505.2	\$196.3	\$1,528.1
Increase for acquisition activity	8.8	16.4	0.6	25.8
Other	0.2	—	—	0.2
Balance at December 31, 2010	\$835.6	\$521.6	\$196.9	\$1,554.1
Increase for acquisition activity	123.6	1.8	—	125.4
Other	—	—	—	—
Balance at December 31, 2011	<u>\$959.2</u>	<u>\$523.4</u>	<u>\$196.9</u>	<u>\$1,679.5</u>

Goodwill represents the excess cost over fair value of identifiable net assets of businesses acquired. At December 31, 2010, there was \$1,554.1 million of goodwill recorded on our consolidated balance

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 8—Goodwill and Other Intangible Assets (Continued)

sheet that was recorded as a result of the merger transactions, post merger acquisitions and contingent consideration related to prior year acquisitions. Goodwill increased in 2010 primarily as a result of current year acquisitions and contingent consideration related to prior year acquisitions. The goodwill resulting from the businesses acquired in 2010 is expected to be deductible for tax purposes. Goodwill increased in 2011 primarily as a result of current year acquisitions and contingent consideration related to prior year acquisitions. Most of the goodwill resulting from the businesses acquired in 2011 is not expected to be deductible for tax purposes.

A summary of customer relationships is as follows (*in millions*):

	Useful Lives (in years)	December 31, 2011			December 31, 2010		
		Gross Carrying Amount	Accumulated Amortization	Carrying Value	Gross Carrying Amount	Accumulated Amortization	Carrying Value
Customer relationships	11 - 19	\$1,019.8	\$(325.8)	\$694.0	\$966.9	\$(254.3)	\$712.6

The decrease in customer relationships in 2011 was primarily related to the amortization of existing customer relationships and changes in the Canadian exchange rate, partially offset by an increase in customer relationships recorded in conjunction with 2011 acquisitions.

A summary of other intangibles is as follows (*in millions*):

	Useful Lives (in years)	December 31, 2011			December 31, 2010		
		Gross Carrying Amount	Accumulated Amortization	Carrying Value	Gross Carrying Amount	Accumulated Amortization	Carrying Value
Tradenames	2 - Indefinite	\$197.1	\$ (2.5)	\$194.6	\$189.6	\$ —	\$189.6
Computer software & technology	3 - 7	223.9	(118.8)	105.1	159.9	(81.7)	78.2
Covenants not to compete	1 - 5	24.4	(18.2)	6.2	18.3	(16.3)	2.0
Total		\$445.4	\$(139.5)	\$305.9	\$367.8	\$(98.0)	\$269.8

Other intangibles increased in 2011 primarily as a result of computer software additions and acquisitions.

We have acquired software by undertaking capital lease obligations. The software under the capital leases is amortized in a manner consistent with our policy for owned intangibles. The assets included above under the capital leases are summarized below (*in millions*):

Classes of Property	December 31,	
	2011	2010
Computer software	\$ 2.7	\$—
Accumulated amortization	(0.5)	—
Capital lease assets	\$ 2.2	\$—

Amortization expense for customer relationships and other intangibles was \$108.1 million, \$100.3 million and \$90.1 million for the years ended December 31, 2011, 2010 and 2009, respectively. Estimated amortization expense for the next five years is \$114.0 million for 2012, \$100.0 million for 2013, \$94.5 million for 2014, \$85.4 million for 2015 and \$80.3 million for 2016.

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 9—Property and Equipment

Property and equipment consisted of the following (*in millions*):

	Useful Lives (in years)	December 31,	
		2011	2010
Land		\$ 260.7	\$ 262.3
Buildings	3 - 40	224.8	220.3
Land improvements	1 - 20	130.4	126.2
Building and leasehold improvements	1 - 33	193.1	171.0
Furniture, fixtures and equipment	1 - 10	199.8	169.7
Vehicles	1 - 6	6.8	7.5
Construction in progress		33.5	23.3
		<u>1,049.1</u>	<u>980.3</u>
Accumulated depreciation		<u>(362.4)</u>	<u>(299.8)</u>
Property and equipment, net		<u>\$ 686.7</u>	<u>\$ 680.5</u>

Depreciation expense for the years ended December 31, 2011, 2010 and 2009 was \$71.7 million, \$71.0 million and \$82.3 million, respectively.

We have acquired furniture, fixtures and equipment by undertaking capital lease obligations. Assets held under the capital leases are depreciated in a manner consistent with our depreciation policy for owned assets. The assets included above under the capital leases are summarized below (*in millions*):

Classes of Property	December 31,	
	2011	2010
Furniture, fixtures and equipment	\$ 38.0	\$ 23.3
Accumulated depreciation	<u>(13.4)</u>	<u>(8.6)</u>
Capital lease assets	<u>\$ 24.6</u>	<u>\$ 14.7</u>

Note 10—Self Insurance and Retained Loss Reserves

We self-insure our employee medical benefits, as well as a portion of our automobile, general liability and workers' compensation claims. We have insurance coverage that limits the exposure on individual claims. We also have insurance coverage that limits the total exposure to overall automobile, general liability and workers' compensation claims. The cost of the insurance is expensed over the contract periods. We record an accrual for the claims expense related to our employee medical benefits, automobile, general liability and workers' compensation claims based upon the expected amount of all such claims. Accrued medical benefits and workers' compensation expenses are included in "Accrued employee benefits and compensation expenses" while accrued automobile and general liability expenses are included in "Other accrued expenses."

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 10—Self Insurance and Retained Loss Reserves (Continued)

The following is a summary of the changes in the reserves for self-insurance and the retained losses (*in millions*):

	Year Ended December 31,	
	2011	2010
Balance at beginning of period	\$ 27.1	\$ 26.1
Net payments	(49.2)	(46.9)
Expense	46.1	47.9
Balance at end of period	\$ 24.0	\$ 27.1

Individual stop-loss coverage for medical benefits was \$0.3 million in 2011 and \$0.2 million in 2010. There was no aggregate policy limit for medical benefits for the Company in either year. The retention for automobile, general liability and workers' compensation claims was \$0.5 million for both the 2011 and 2010 policy years. The aggregate policy limits for the combined automobile, general liability and workers' compensation program was \$20.0 million for both the 2011 and 2010 policy years.

Note 11—Long-Term Debt

Long-term debt consisted of the following (*in millions*):

	Interest Rate	Maturity	December 31,	
			2011	2010
Old Term Loan B	LIBOR + 2.75%	October 19, 2013	\$ —	\$1,144.6
New Term Loan B	Adjusted LIBOR + 3.75%	May 18, 2017	1,691.5	—
Old \$250 million revolving credit facility	LIBOR + 2.75%	April 19, 2013	—	—
New \$250 million revolving credit facility	Adjusted LIBOR + 3.50%	May 18, 2016	68.9	—
Floating rate senior notes	LIBOR + 4.00%	May 01, 2014	150.0	150.0
Senior notes	8.75%	May 01, 2014	—	450.0
Senior subordinated notes	10%	May 01, 2015	—	131.1
Canadian line of credit	CAD Prime + 1.5%		—	—
Total debt			1,910.4	1,875.7
Unamortized debt discount			(7.6)	—
Current portion of long-term debt			(85.9)	—
Long-term debt			\$1,816.9	\$1,875.7

The weighted average interest rate on our variable rate debt was 4.9% and 3.2% at December 31, 2011 and 2010, respectively, and the weighted average interest rate on all borrowings was 4.9% and 5.0% at December 31, 2011 and 2010, respectively.

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 11—Long-Term Debt (Continued)

Credit Facilities

On May 19, 2011, we established a new \$1.7 billion, six-year senior secured term loan facility (New Term Loan B in the table above) and a new \$250 million, five-year senior secured revolving credit facility (New \$250 million revolving credit facility in the table above), the terms of which are set forth in the Credit Agreement, dated as of May 19, 2011. Concurrently with our entry into the Credit Agreement, we terminated our previous credit facility, dated as of April 20, 2007 (as amended, the “2007 Credit Agreement”). On May 19, 2011, we paid all principal outstanding and interest due under the 2007 Credit Agreement. No early termination penalties were incurred by the Company in connection with the termination of the 2007 Credit Agreement; however, we incurred a non-cash loss on the extinguishment of the term loan under the 2007 Credit Agreement (Old Term Loan B in the table above) of \$24.5 million representative of the write-off of certain unamortized debt issuance costs.

The new Credit Facility is available for letters of credit, working capital and general corporate purposes (including refinancing certain Existing Indebtedness (as defined in the Credit Agreement)). The Credit Agreement provides that with respect to the new revolving Credit Facility, up to \$75 million is available for letters of credit and up to \$75 million is available for swing line loans. The Credit Agreement also permits up to \$300 million of additional revolving or term loan commitments from one or more of the existing lenders or other lenders (with the consent of the administrative agent).

New Term Loan B was issued at a discount of \$8.5 million. The discount is being amortized to interest expense over the six-year term of the loan. New Term Loan B is payable in quarterly installments equal to 0.25% of the original aggregate principal amount. Payments commenced on September 30, 2011, and the balance is payable at maturity. The Credit Facility is subject to mandatory prepayments and reduction in an amount equal to (i) the net proceeds of certain debt offerings, asset sales and certain insurance recovery events; and (ii) for any fiscal year ending on or after December 31, 2011, any Excess Cash Flow, as defined in the Credit Agreement.

The obligations of the Company under the Credit Facility are guaranteed by certain of our domestic subsidiaries (the “Subsidiary Guarantors”) and are secured by substantially all of the assets of the Company and the Subsidiary Guarantors, including but not limited to: (a) pledges of and perfected first-priority security interests in 100% of the equity interests of certain of the Company’s and the Subsidiary Guarantors’ domestic subsidiaries and 65% of the equity interests of certain of the Company’s and the Subsidiary Guarantors’ first-tier foreign subsidiaries and (b) perfected first-priority security interests in substantially all other tangible and intangible assets of the Company and each Subsidiary Guarantor, subject to certain exceptions. The Credit Agreement contains affirmative and negative covenants that we believe are usual and customary for a senior secured credit agreement. The negative covenants include, among other things, limitations on capital expenditures, asset sales, mergers and acquisitions, indebtedness, liens, dividends, investments and transactions with our affiliates. The Credit Agreement also requires us to maintain a maximum leverage ratio, provided there are revolving loans outstanding. We were in compliance with the covenants in the Credit Agreement at December 31, 2011.

New Term Loan B bears interest at an adjusted LIBOR rate plus 3.75% (with an adjusted LIBOR rate floor of 1.25% per annum) and revolving loan borrowings at an adjusted LIBOR rate plus 3.50%; however, for specified types of borrowings, the Company may elect to make term loan borrowings at a

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 11—Long-Term Debt (Continued)

Base Rate (as defined in the Credit Agreement) plus 2.75% and revolving loan borrowings at a Base Rate plus 2.50%. The rate on New Term Loan B was 5.0% at December 31, 2011. In addition, if the Company reduces its Consolidated Senior Secured Leverage Ratio (as defined in the Credit Agreement), which is based on a net debt calculation, to levels specified in the Credit Agreement, the applicable interest rate will step down by 25 basis points. The Company will also pay a commitment fee of 50 basis points, payable quarterly, on the average daily unused amount of the Credit Facility. The fee may step down to 37.5 basis points based on the Company's Consolidated Senior Secured Leverage Ratio as described above.

On December 31, 2011, \$68.9 million was drawn on the new revolving credit facility, leaving \$181.1 million available under the credit facility. There were no borrowings under the old revolving credit facility at December 31, 2010. In addition, we had related outstanding letters of credit in the aggregate amount of \$28.5 million and \$29.4 million at December 31, 2011 and December 31, 2010, respectively, which reduce the amount available for borrowings under the respective credit facilities. The \$68.9 million of outstanding borrowings under the revolving credit facility have been classified as current debt as the Company intends to repay the outstanding borrowings within the next twelve months.

Senior Notes

In 2007 we issued \$450.0 million of 8¾% senior notes and \$150.0 million of floating rate senior notes, both of which were due May 1, 2014. In addition, we issued \$425.0 million of 10% senior subordinated notes due May 1, 2015. The floating rate notes were non-callable for two years, after which they became callable at a premium declining ratably to par at the end of year four. Interest on the floating rate notes is payable quarterly in arrears and commenced on August 1, 2007. The fixed rate notes were non-callable for three years, after which they were callable at a premium declining ratably to par at the end of year six. Interest on both the fixed rate notes and the senior subordinated notes was payable semi-annually in arrears, and commenced on November 1, 2007.

In connection with our initial public offering, we conducted a cash tender offer for certain of the notes described above. The tender offer was oversubscribed and as such, in accordance with the identified priority levels, only a portion of the 10% senior subordinated notes were accepted for prepayment. In January 2010, we prepaid \$225.6 million principal amount of the 10% senior subordinated notes with proceeds received from our initial public offering and the underwriters option to purchase additional shares. We incurred a loss on the extinguishment of the notes of \$25.3 million in the first quarter of 2010.

In the fourth quarter of 2010, we conducted another cash tender offer for certain of the notes described above. The tender offer was oversubscribed and as such, in accordance with the identified priority levels, only a portion of the 10% senior subordinated notes were accepted for prepayment. In December 2010, we prepaid \$68.3 million principal amount of the 10% senior subordinated notes with available cash. We incurred a loss on the extinguishment of the notes of \$7.4 million in the fourth quarter of 2010.

In June 2011, we prepaid \$450.0 million principal amount of the 8¾% senior notes and the remaining \$131.1 million principal balance of the 10% senior subordinated notes with proceeds received from New Term Loan B and cash on hand. We incurred a loss on the extinguishment of the

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 11—Long-Term Debt (Continued)

notes of \$29.0 million in the second quarter of 2011 representative of the net premiums payable related to the repurchase of the notes and the write-off of certain unamortized debt issuance costs.

The remaining \$150.0 million floating rate senior notes contain covenants that among other things, limit the issuance of additional indebtedness, the incurrence of liens, the repurchase of stock, making certain investments, the payment of dividends or other distributions, distributions from certain subsidiaries, the sale of assets and subsidiary stock, transactions with affiliates and consolidations, mergers and transfers of assets. All of these limitations and prohibitions, however, are subject to a number of important qualifications set forth in the indenture.

Canadian Line of Credit

In 2010, we increased the line of credit available to ADESA Canada from C\$4 million to C\$8 million. The line of credit bears interest at a rate equal to the Canadian prime rate plus 150 basis points. There were no borrowings under the Canadian line of credit at December 31, 2011 or 2010. There were related letters of credit outstanding totaling approximately C\$2.2 million at December 31, 2011 and C\$1.8 million at December 31, 2010, which reduce credit available under the Canadian line of credit, but do not affect amounts available for borrowings under our revolving credit facility. The line of credit is guaranteed by certain ADESA Canada companies.

Future Principal Payments

At December 31, 2011 aggregate future principal payments on long-term debt are as follows (*in millions*):

2012	\$ 85.9
2013	17.0
2014	167.0
2015	17.0
2016	17.0
Thereafter	<u>1,606.5</u>
	<u>\$1,910.4</u>

Note 12—Financial Instruments

Our derivative activities are initiated within the guidelines of documented corporate risk management policies. We do not enter into any derivative transactions for speculative or trading purposes.

Interest Rate Risk Management

We are exposed to interest rate risk on our variable rate borrowings. Accordingly, interest rate fluctuations affect the amount of interest expense we are obligated to pay. In August 2011, we purchased three interest rate caps for an aggregate amount of approximately \$1.1 million with an aggregate notional amount of \$925 million to manage our exposure to interest rate movements on our

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 12—Financial Instruments (Continued)

variable rate New Term Loan B credit facility when one-month LIBOR exceeds 1.25%. The interest rate cap agreements each had an effective date of August 16, 2011 and each mature on August 16, 2013. The unamortized portion of the \$1.1 million investment is recorded in “Other assets” on the consolidated balance sheet and is being amortized over the remaining life of the interest rate caps to interest expense. We are exposed to credit loss in the event of non-performance by the counterparties; however, non-performance is not anticipated.

In May 2009, we entered into an interest rate swap agreement with a notional amount of \$650 million to manage our exposure to interest rate movements on our variable rate Old Term Loan B credit facility. The interest rate swap agreement had an effective date of June 30, 2009, was scheduled to mature on June 30, 2012 and effectively resulted in a fixed LIBOR interest rate of 2.19% on \$650 million of the Old Term Loan B credit facility. In connection with the extinguishment of Old Term Loan B in May 2011, we de-designated our interest rate swap and entered into a swap termination agreement. We paid \$14.5 million to settle and terminate the swap. As a result, the \$14.5 million was reclassified from other comprehensive income to interest expense.

In May 2009, we also purchased an interest rate cap for \$1.3 million with a notional amount of \$250 million to manage our exposure to interest rate movements on our variable rate Old Term Loan B credit facility when one-month LIBOR exceeded 2.5%. The interest rate cap related to a portion of the old variable rate debt that was not covered by our interest rate swap agreement. The interest rate cap agreement had an effective date of June 30, 2009 and matured on June 30, 2011. The \$1.3 million investment was amortized over the life of the interest rate cap to interest expense.

ASC 815 requires companies to recognize all derivative instruments as either assets or liabilities at fair value in the balance sheet. In accordance with ASC 815, we designated our interest rate derivatives as cash flow hedges. The fair values of the interest rate derivatives are based on quoted market prices for similar instruments from a commercial bank. The following table presents the fair value of our interest rate derivatives included in the consolidated balance sheets for the periods presented (*in millions*):

Derivatives Designated as Hedging Instruments Under ASC 815	Asset Derivatives				Liability Derivatives			
	December 31, 2011		December 31, 2010		December 31, 2011		December 31, 2010	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Aggregate \$925 million notional interest rate caps (new)	Other assets	\$ 1.0	Other assets	N/A	Other accrued expenses	\$ —	Other accrued expenses	N/A
\$650 million notional interest rate swap	Other assets	N/A	Other assets	\$ —	Other accrued expenses	N/A	Other accrued expenses	\$16.6
\$250 million notional interest rate cap (old)	Other current assets	N/A	Other current assets	\$ —	Other accrued expenses	N/A	Other accrued expenses	\$ —

The earnings impact of the interest rate derivatives designated as cash flow hedges is recorded upon the recognition of the interest related to the hedged debt. Any ineffectiveness in the hedging relationships is recognized in current earnings. There was no significant ineffectiveness in 2011, 2010 or 2009. Unrealized gains or losses on the interest rate derivatives are included as a component of “Accumulated other comprehensive income.” At December 31, 2011, there was a net unrealized gain totaling \$0.1 million, net of tax benefits of less than \$0.1 million. At December 31, 2010, there was a

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 12—Financial Instruments (Continued)

net unrealized loss totaling \$10.5 million, net of tax benefits of \$6.4 million. The following table presents the effect of the interest rate derivatives on our statement of equity and consolidated statements of income for the periods presented (*in millions*):

Derivatives in ASC 815 Cash Flow Hedging Relationships	Amount of Gain / (Loss) Recognized in OCI on Derivative (Effective Portion)		Location of Gain / (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)	Amount of Gain / (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)

\$250 million notional interest rate cap (old)	\$0.3	\$ 0.1	N/A	\$ —	\$ —

Concentrations of Credit Risk

Financial instruments that potentially subject us to credit risk consist principally of interest-bearing investments, finance receivables, trade receivables and interest rate derivatives. We maintain cash and cash equivalents, short-term investments, and certain other financial instruments with various major financial institutions. We perform periodic evaluations of the relative credit standing of these financial institutions and companies and limit the amount of credit exposure with any one institution. Cash and cash equivalents include interest-bearing investments with maturities of three months or less. Due to the nature of our business, substantially all trade and finance receivables are due from vehicle dealers, salvage buyers, institutional sellers and insurance companies. We have possession of vehicles or vehicle titles collateralizing a significant portion of the trade and finance receivables. The risk associated with this concentration is limited due to the large number of accounts and their geographic dispersion. We monitor the creditworthiness of customers to which we grant credit terms in the normal course of business. In the event of nonperformance by counterparties to financial instruments we are exposed to credit-related losses, but management believes this credit risk is limited by periodically reviewing the creditworthiness of the counterparties to the transactions.

Financial Instruments

The carrying amounts of trade receivables, finance receivables, other current assets, accounts payable, accrued expenses and borrowings under our short-term revolving line of credit facilities approximate fair value because of the short-term nature of those instruments.

The fair value of our notes receivable is determined by calculating the present value of expected future cash receipts associated with these instruments. The discount rate used is equivalent to the current rate offered to us for notes of similar maturities. As of December 31, 2011, the fair value of our notes receivable approximated the carrying value.

As of December 31, 2011 and 2010, the estimated fair value of our long-term debt amounted to \$1,831.0 million and \$1,885.4 million, respectively. The estimates of fair value are based on the market prices for our publicly-traded debt as of December 31, 2011 and 2010. The estimates presented on long-term financial instruments are not necessarily indicative of the amounts that would be realized in a current market exchange.

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 13—Leasing Agreements

We lease property, computer equipment and software, automobiles, trucks and trailers, pursuant to operating lease agreements with terms expiring through 2031. Some of the leases contain renewal provisions upon the expiration of the initial lease term, as well as fair market value purchase provisions. In accordance with ASC 840, *Leases*, rental expense is being recognized ratably over the lease period, including those leases containing escalation clauses. The deferred portion of the rent, for the leases containing escalation clauses, is included in “Other liabilities” on the consolidated balance sheet.

We also lease furniture, fixtures and equipment under capital leases. The economic substance of the leases is that we are financing the purchase of furniture, fixtures and equipment through leases and, accordingly, they are recorded as assets and liabilities. The capital lease liabilities are included in “Other accrued expenses” and “Other liabilities” on the consolidated balance sheet. Depreciation expense includes the amortization of assets held under capital leases. Total future minimum lease payments for non-cancellable operating and capital leases with terms in excess of one year (excluding renewal periods) as of December 31, 2011 are as follows (*in millions*):

	<u>Operating Leases</u>	<u>Capital Leases</u>
2012	\$ 82.1	\$12.1
2013	76.4	10.0
2014	73.2	6.7
2015	68.2	1.1
2016	62.8	0.3
Thereafter	<u>520.1</u>	<u>—</u>
	<u>\$882.8</u>	<u>\$30.2</u>
Less: interest portion of capital leases		<u>2.9</u>
Total		<u>\$27.3</u>

Total lease expense for the years ended December 31, 2011, 2010 and 2009 was \$90.0 million, \$88.0 million and \$86.5 million, respectively.

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 14—Income Taxes

The components of our income before income taxes and the provision for income taxes are as follows (*in millions*):

	<u>Year Ended December 31,</u>		
	<u>2011</u>	<u>2010</u>	<u>2009</u>
Income (loss) before income taxes:			
Domestic	\$ 26.0	\$31.8	\$(11.7)
Foreign	64.0	65.0	46.0
Total	<u>\$ 90.0</u>	<u>\$96.8</u>	<u>\$ 34.3</u>
Income tax expense (benefit):			
Current:			
Federal	\$(13.5)	\$(0.3)	\$ (2.8)
Foreign	26.4	24.6	20.0
State	8.4	5.2	2.7
Total current provision	<u>21.3</u>	<u>29.5</u>	<u>19.9</u>
Deferred:			
Federal	4.3	7.8	(2.2)
Foreign	(4.4)	(4.5)	(6.3)
State	(3.4)	(5.6)	(0.3)
Total deferred provision	<u>(3.5)</u>	<u>(2.3)</u>	<u>(8.8)</u>
Income tax expense	<u>\$ 17.8</u>	<u>\$27.2</u>	<u>\$ 11.1</u>

The provision for income taxes was different from the U.S. federal statutory rate applied to income before taxes, and is reconciled as follows:

	<u>Year Ended December 31,</u>		
	<u>2011</u>	<u>2010</u>	<u>2009</u>
Statutory rate	35.0%	35.0%	35.0%
State and local income taxes, net	1.2%	2.6%	6.9%
Reserves for tax exposures	(18.5)%	(0.7)%	(13.8)%
State NOL valuation allowance reversal	—	(3.9)%	—
International operations	0.5%	(5.1)%	(5.6)%
Stock-based compensation	—	0.5%	8.6%
Meals and entertainment	0.9%	0.9%	2.1%
Other, net	0.7%	(1.2)%	(0.8)%
Effective rate	<u>19.8%</u>	<u>28.1%</u>	<u>32.4%</u>

During 2011, the effective rate benefited from the reversal of \$18.6 million in tax reserves for uncertain tax positions due to the expiration of certain statute of limitations. During 2010, the effective rate benefited from lower tax rates in state and foreign jurisdictions, the release of tax reserves for uncertain tax positions due to the expiration of certain statute of limitations and the recognition of

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 14—Income Taxes (Continued)

previously unrecognized deferred tax assets. During 2009, the effective tax rate benefited from lower tax rates in foreign jurisdictions and the release of tax reserves for uncertain tax positions due to the expiration of certain statute of limitations. The benefit was partially offset by the impact of nondeductible stock compensation expense.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. We believe that it is more likely than not that results of future operations will generate sufficient taxable income to realize the deferred tax assets.

Deferred tax assets (liabilities) are comprised of the following at December 31 (*in millions*):

	<u>2011</u>	<u>2010</u>
Gross deferred tax assets:		
Allowances for trade and finance receivables	\$ 5.9	\$ 6.0
Accruals and liabilities	32.2	31.8
Employee benefits and compensation	32.1	26.4
Interest rate swap	(0.1)	6.4
Net operating loss carryforwards	47.8	18.7
Investment basis difference	2.1	3.0
Foreign tax credit	2.0	2.7
Other	<u>2.7</u>	<u>3.6</u>
Total deferred tax assets	<u>124.7</u>	<u>98.6</u>
Deferred tax asset valuation allowance	<u>(13.2)</u>	<u>(9.1)</u>
Total	<u>111.5</u>	<u>89.5</u>
Gross deferred tax liabilities:		
Property and equipment	(31.0)	(21.3)
Goodwill and intangible assets	(365.8)	(353.7)
Other	<u>(1.1)</u>	<u>—</u>
Total	<u>(397.9)</u>	<u>(375.0)</u>
Net deferred tax liabilities	<u>\$(286.4)</u>	<u>\$(285.5)</u>

The gross tax benefit from state and federal net operating loss carryforwards expire as follows (*in millions*):

2012	\$ 0.4
2013	0.7
2014	0.7
2015	1.5
2016	0.6
2017 to 2031	<u>43.9</u>
	<u>\$47.8</u>

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 14—Income Taxes (Continued)

Undistributed earnings of our foreign subsidiaries were approximately \$154.5 million at December 31, 2011. Because these amounts have been or will be permanently reinvested in properties and working capital, we have not recorded the deferred taxes associated with these earnings. If the undistributed earnings of foreign subsidiaries were to be remitted, tax expense would need to be recognized at the U.S. statutory rate, net of any applicable foreign tax credits. It is not practical for us to determine the additional tax that would be incurred upon remittance of these earnings.

We made federal income tax payments, net of federal income tax refunds, of \$0.3 million and \$5.3 million in 2011 and 2010, respectively. We received federal income tax refunds, net of federal income tax payments, of \$2.8 million in 2009. State and foreign income taxes paid by us, net of refunds, totaled \$36.2 million, \$31.0 million and \$21.6 million in 2011, 2010 and 2009, respectively.

We apply the provisions of ASC 740, *Income Taxes*. ASC 740 clarifies the accounting and reporting for uncertainty in income taxes recognized in an enterprise's financial statements. These provisions prescribe a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of uncertain tax positions taken or expected to be taken on income tax returns.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (*in millions*):

	December 31,	
	2011	2010
Balance at beginning of period	\$ 25.9	\$26.4
Increase in tax positions related to acquisitions	8.6	—
Increase in prior year tax positions	1.1	1.4
Decrease in prior year tax positions	(0.2)	(0.7)
Increase in current year tax positions	1.3	1.3
Settlements	(0.7)	(0.2)
Lapse in statute of limitations	(18.6)	(2.3)
Balance at end of period	\$ 17.4	\$25.9

The total amount of unrecognized tax benefits that, if recognized, would affect our effective tax rate was \$9.5 million and \$25.9 million at December 31, 2011 and 2010, respectively.

We record interest and penalties associated with the uncertain tax positions within our provision for income taxes on the income statement. We had reserves totaling \$4.2 million, \$3.4 million and \$3.4 million in 2011, 2010 and 2009, respectively, associated with interest and penalties, net of tax.

The provision for income taxes involves management judgment regarding interpretation of relevant facts and laws in the jurisdictions in which the Company operates. Future changes in applicable laws, projected levels of taxable income and tax planning could change the effective tax rate and tax balances recorded by us. In addition, U.S. and non-U.S. tax authorities periodically review income tax returns filed by us and can raise issues regarding our filing positions, timing and amount of income or deductions and the allocation of income among the jurisdictions in which we operate. A significant period of time may elapse between the filing of an income tax return and the ultimate resolution of an issue raised by a revenue authority with respect to that return. In the normal course of business we are

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 14—Income Taxes (Continued)

subject to examination by taxing authorities in the U.S., Canada, Australia and Mexico. In general, the examination of our material tax returns is completed for the years prior to 2005.

Based on the potential outcome of the Company's tax examinations and the expiration of the statute of limitations for specific jurisdictions, it is reasonably possible that the currently remaining unrecognized tax benefits will change within the next 12 months. The associated net tax impact on the reserve balance is estimated to be in the range of a \$0 to \$1 million decrease.

Note 15—Employee Benefit Plans

401(k) Plan

We maintain a defined contribution 401(k) plan that covers substantially all U.S. employees. Participants are generally allowed to make non-forfeitable contributions up to the annual IRS limits. Throughout 2009 we matched 100 percent of the amounts contributed by each individual participant up to 4 percent of the participant's compensation. Effective January 1, 2010, the matching policy was amended, and as a result the Company matched 50 percent of participant contributions up to 4%. Effective January 1, 2012, we will begin to match 100 percent of the amounts contributed by each individual participant up to 4 percent of the participant's compensation. Participants are 100 percent vested in the Company's contributions. For the years ended December 31, 2011, 2010 and 2009 we contributed \$3.4 million, \$3.2 million and \$6.6 million, respectively.

Postretirement Benefits

IAA assumed the obligation for certain health care and death benefits for the retired employees of Underwriters Salvage Company ("USC") in connection with the acquisition of the capital stock of USC in 1994.

We apply the applicable provisions of ASC 715, *Compensation—Retirement Benefits*. The guidance requires employers to recognize the over funded or under funded status of a defined benefit postretirement plan as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income. ASC 715 also requires an employer to measure the funded status of a plan as of the date of its year-end statement of financial position, with limited exceptions.

The net liability recognized in the balance sheet at December 31, 2011 and 2010 was \$0.4 million and \$0.5 million, respectively. The amounts recognized as a charge against accumulated other comprehensive income in 2011 and 2010 were \$0.3 million and \$0.4 million, respectively.

Effective January 20, 1994, the date of the USC acquisition, IAA discontinued future participation for active employees. The contribution for 2012 is not expected to exceed \$0.1 million.

Note 16—Commitments and Contingencies

We are involved in litigation and disputes arising in the ordinary course of business, such as actions related to injuries; property damage; handling, storage or disposal of vehicles; environmental laws and regulations; and other litigation incidental to the business such as employment matters and dealer disputes. Management considers the likelihood of loss or the incurrence of a liability, as well as the

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 16—Commitments and Contingencies (Continued)

ability to reasonably estimate the amount of loss, in determining loss contingencies. We accrue an estimated loss contingency when it is probable that a liability has been incurred and the amount of loss (or range of possible losses) can be reasonably estimated. Management regularly evaluates current information available to determine whether accrual amounts should be adjusted. Accruals for contingencies including litigation and environmental matters are included in “Other accrued expenses” at undiscounted amounts and exclude claims for recoveries from insurance or other third parties. These accruals are adjusted periodically as assessment and remediation efforts progress, or as additional technical or legal information becomes available. If the amount of an actual loss is greater than the amount accrued, this could have an adverse impact on our operating results in that period. Legal fees are expensed as incurred.

We have accrued, as appropriate, for environmental remediation costs anticipated to be incurred at certain of our auction facilities. Liabilities for environmental matters included in “Other accrued expenses” were \$0.1 million and \$0.8 million at December 31, 2011 and December 31, 2010, respectively. No amounts have been accrued as receivables for potential reimbursement or recoveries to offset this liability.

We store a significant number of vehicles owned by various customers that are consigned to us to be auctioned. We are contingently liable for each consigned vehicle until the eventual sale or other disposition, subject to certain natural disaster exceptions. Individual stop loss and aggregate insurance coverage is maintained on the consigned vehicles. These consigned vehicles are not included in the consolidated balance sheets.

In the normal course of business, we also enter into various other guarantees and indemnities in our relationships with suppliers, service providers, customers and others. These guarantees and indemnifications do not materially impact our financial condition or results of operations, but indemnifications associated with our actions generally have no dollar limitations and currently cannot be quantified.

As noted above, we are involved in litigation and disputes arising in the ordinary course of business, such as actions related to injuries; property damage; handling, storage or disposal of vehicles; environmental laws and regulations; and other litigation incidental to the business such as employment matters and dealer disputes. Such litigation is generally not, in the opinion of management, likely to have a material adverse effect on our financial condition, results of operations or cash flows. Legal and regulatory proceedings which could be material are discussed below.

IAA—Lower Duwamish Waterway

On March 25, 2008, the United States Environmental Protection Agency, or EPA, issued a General Notice of Potential Liability (the “General Notice”) pursuant to Section 107(a), and a Request for Information pursuant to Section 104(e) of the Comprehensive Environmental Response, Compensation, and Liability Act, or “CERCLA” to IAA for a Superfund site known as the Lower Duwamish Waterway (“LDW”) Superfund Site in Seattle, Washington. IAA operates a branch on property it leases in Tukwila, Washington, which is located adjacent to the LDW. At this time, the EPA has not demanded that IAA pay any funds or take any action apart from responding to the Section 104(e) Information Request. The EPA has advised IAA that, to date, it has sent out approximately 60 general notice letters

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 16—Commitments and Contingencies (Continued)

to other parties, and has sent Section 104(e) Requests to more than 250 other parties. A remedial investigation has been conducted for this site by some of the potentially responsible parties, who have also commenced a feasibility study pursuant to CERCLA. IAA is aware that certain authorities plan to bring Natural Resource Damage claims against potentially responsible parties. In the General Notice, the EPA informed IAA that it may be a potentially responsible party based on presently available information. At this time, the Company does not have adequate information to determine IAA's responsibility for contamination at this site, if any, or to estimate IAA's loss as a result of this potential liability.

In addition, the Washington State Department of Ecology is working with the EPA in relation to the LDW, primarily to investigate and address sources of potential contamination contributing to the LDW. IAA, the current Tukwila property owner and the former Tukwila property owner are currently in discussion with the Washington State Department of Ecology concerning possible source control obligations, including an investigation of the water and soils entering the stormwater system, an analysis of the source of any contamination identified within the system and possible repairs and upgrades to the stormwater capture and filtration system. In 2011, IAA submitted results of its stormwater system investigation to comply with the Washington State Department of Ecology source control requirements. Additional source control obligations, if any, are not expected to have a material impact on future recurring operating costs.

Note 17—Comprehensive Income

The components of comprehensive income are as follows (*in millions*):

	Year Ended December 31,		
	2011	2010	2009
Net income	\$72.2	\$69.6	\$23.2
Other comprehensive income (loss), net of tax			
Foreign currency translation gain (loss)	(9.0)	12.0	36.4
Unrealized gain (loss) on interest rate derivatives	1.6	(4.8)	4.6
Early termination of swap agreement	9.0	—	—
Unrealized loss on postretirement benefit obligation	—	(0.1)	(0.1)
Comprehensive income	<u>\$73.8</u>	<u>\$76.7</u>	<u>\$64.1</u>

The composition of "Accumulated other comprehensive income" at December 31, 2011, net of related tax effects, consisted of the net unrealized gain on the interest rate derivatives of \$0.1 million, a \$0.2 million unrealized gain on post-retirement benefit obligation and a foreign currency translation gain of \$27.8 million. The composition of "Accumulated other comprehensive income" at December 31, 2010, net of related tax effects, consisted of the net unrealized loss on the interest rate derivatives of \$10.5 million, a \$0.2 million unrealized gain on post-retirement benefit obligation and a foreign currency translation gain of \$36.8 million.

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 18—Fair Value Measurements

We apply ASC 820, *Fair Value Measurements and Disclosures*, to our financial assets and liabilities. ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. The standard establishes a fair value hierarchy, which prioritizes the inputs used in measuring fair value into three broad levels:

- Level 1—Quoted prices in active markets for identical assets or liabilities.
- Level 2—Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities in active markets; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities, such as models or other valuation methodologies.
- Level 3—Unobservable inputs that are based on our assumptions, are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect our own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include instruments for which the determination of fair value requires significant management judgment or estimation.

The following tables summarize our financial assets and liabilities measured at fair value on a recurring basis in accordance with ASC 820 (*in millions*):

<u>Description</u>	<u>December 31, 2011</u>	<u>Quoted Prices in Active Markets for Identical Assets (Level 1)</u>	<u>Significant Other Observable Inputs (Level 2)</u>	<u>Significant Unobservable Inputs (Level 3)</u>
Assets:				
Interest rate caps	\$ 1.0	\$ —	\$ 1.0	\$ —
Liabilities:				
Interest rate swap	N/A	N/A	N/A	N/A
<u>Description</u>	<u>December 31, 2010</u>	<u>Quoted Prices in Active Markets for Identical Assets (Level 1)</u>	<u>Significant Other Observable Inputs (Level 2)</u>	<u>Significant Unobservable Inputs (Level 3)</u>
Liabilities:				
Interest rate swap	\$16.6	\$—	\$16.6	\$—

Interest Rate Caps—Under the three interest rate cap agreements purchased in August 2011, we receive interest on a notional amount when one-month LIBOR exceeds 1.25%. These agreements effectively hedge a portion of the New Term Loan B credit facility. The fair value of the interest rate caps is based on quoted market prices for similar instruments from commercial banks.

Interest Rate Swap—Under the interest rate swap agreement, we paid a fixed LIBOR rate on a notional amount and received a variable LIBOR rate which effectively hedged a portion of the Old

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 18—Fair Value Measurements (Continued)

Term Loan B credit facility. The fair value of the interest rate swap was based on quoted market prices for similar instruments from a commercial bank.

Note 19—Related Party Transactions

Financial Advisory Agreements

The Equity Sponsors own the controlling interest in KAR LLC. Under the terms of the financial advisory agreements between the Equity Sponsors and KAR Auction Services, upon completion of the merger and contribution, we (1) paid the Equity Sponsors a total fee of \$34.7 million and (2) commenced paying an annual financial advisory fee of \$3.5 million, payable quarterly in advance to the Equity Sponsors (with the first such fee, prorated for the remainder of the then current quarter, paid at the closing of the merger), for services to be provided by each of the Equity Sponsors to us. In addition, we pay the Equity Sponsors travel expenses related to KAR Auction Services, pursuant to the terms contained in the financial advisory agreements. In connection with our initial public offering, we entered into a termination letter agreement with each of our Equity Sponsors (or their affiliates) pursuant to which the parties agreed to terminate the ongoing financial advisory fees described above. Pursuant to the terms of each such termination agreement, we paid the Equity Sponsors (or their affiliates) an aggregate fee of \$10.5 million at the consummation of the initial public offering in December 2009. We paid the Equity Sponsors approximately \$0.1 million and \$0.2 million for travel expenses for the years ended December 31, 2011 and 2010, respectively, and \$14.2 million related to the financial advisory fee and travel expenses for the year ended December 31, 2009.

Additionally, the financial advisory agreements provide that KAR Auction Services indemnify the Equity Sponsors and their respective officers, directors, partners, employees, agents and control persons (as such term is used in the Securities Act and the rules and regulations thereunder) against any and all claims, losses and expenses as incurred arising in connection with the merger and the transactions contemplated by the merger agreement (including the financing of the merger).

Towing and Transportation Services

In the ordinary course of business, we have received towing, transportation and recovery services from companies which are controlled by our chairman. Amounts paid to these companies were approximately \$0.1 million, \$1.1 million and \$1.6 million for the years ended December 31, 2011, 2010 and 2009, respectively. The transportation services were provided at terms consistent with those of other providers of similar services.

Note 20—Segment Information

ASC 280, *Segment Reporting*, requires reporting of segment information that is consistent with the manner in which the chief operating decision maker operates and views the Company. Our operations are grouped into three operating segments: ADESA Auctions, IAA and AFC, which also serve as our reportable business segments. None of our operating segments have been aggregated in our segment reporting. These reportable business segments offer different services and have fundamental differences in their operations.

KAR Auction Services, Inc.
Notes to Consolidated Financial Statements (Continued)
December 31, 2011, 2010 and 2009

Note 20—Segment Information (Continued)

ADESA Auctions encompasses all physical and online wholesale auctions throughout North America (U.S., Canada and Mexico). ADESA Auctions relates to used vehicle remarketing, including auction services, remarketing, or make ready services and all are interrelated, synergistic elements along the auto remarketing chain.

IAA encompasses all salvage auctions throughout North America (U.S. and Canada). IAA provides insurance companies and other vehicle suppliers cost-effective salvage processing solutions, including selling total loss and recovered theft vehicles. As such, IAA relates to total loss vehicle remarketing, including auction services, remarketing, or make ready services. All are interrelated, synergistic elements along the total loss vehicle remarketing chain.

AFC is primarily engaged in the business of providing short-term, inventory-secured financing to independent, used vehicle dealers. AFC also includes other businesses and ventures that AFC may enter into, focusing on providing independent used vehicle dealer customers with other related services and products. AFC conducts business primarily at or near wholesale used vehicle auctions in the U.S. and Canada.

The holding company is maintained separately from the three reportable segments and includes expenses associated with the corporate office, such as salaries, benefits, and travel costs for the corporate management team, certain human resources, information technology and accounting costs, and certain insurance, treasury, legal and risk management costs. Holding company interest expense includes the interest expense incurred on the corporate debt structure. Intercompany charges relate primarily to interest on intercompany debt or receivables and certain information technology costs allocated by the holding company.

Note 22—Supplemental Guarantor Information

Our obligations related to the floating rate senior notes are guaranteed on a full, unconditional, joint and several basis by certain direct and indirect present and future domestic subsidiaries (the “Guarantor Subsidiaries”). AFC Funding Corporation and all of our foreign subsidiaries are not guarantors (the “Non-Guarantor Subsidiaries”). The following financial information sets forth, on a condensed consolidating basis, the balance sheets, statements of income and statements of cash flows for the periods indicated for KAR Auction Services, the Guarantor Subsidiaries, the Non-Guarantor Subsidiaries and the eliminations to arrive at KAR Auction Services on a consolidated basis.

The condensed consolidating financial statements are provided as an alternative to filing separate financial statements of the Guarantor Subsidiaries. The condensed consolidating financial statements should be read in conjunction with our consolidated financial statements and notes thereto.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this Annual Report on Form 10-K, we carried out an evaluation under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as defined in Exchange Act Rules 13a-15(e) and 15d-15(e). Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that our disclosure controls and procedures were effective.

Internal Control over Financial Reporting

Management's report on our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) and the related report of KPMG LLP, our independent registered public accounting firm, are included in Item 8, Financial Statements and Supplementary Data under the headings Management's Report on Internal Control over Financial Reporting and Report of Independent Registered Public Accounting Firm, respectively, and are incorporated herein by reference.

Changes in Internal Control over Financial Reporting

There has been no change in our internal control over financial reporting during the quarter ended December 31, 2011, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

Employment Agreement with James P. Hallett

On February 27, 2012, KAR Auction Services, Inc. (the "Company") approved the terms of an employment agreement with James P. Hallett (the "Employment Agreement"), the Company's Chief Executive Officer. The employment period will continue until terminated pursuant to the terms of the Employment Agreement.

Pursuant to the Employment Agreement, Mr. Hallett is entitled to an annual base salary of \$816,000, and will be eligible to participate in The KAR Auction Services, Inc. Annual Incentive Plan and any other incentive programs (including equity-based incentive programs) available to executives of the Company. Mr. Hallett will also be entitled to an automobile allowance of at least \$25,000 a year and will also receive standard benefits available to executives of the Company.

In the event of Mr. Hallett's termination of employment by the Company without "cause" or by Mr. Hallett for "good reason," (each as defined in the Employment Agreement), Mr. Hallett will be entitled to receive, in addition to accrued benefits, cash severance equal to two times the sum of his (i) base salary and (ii) target bonus for the year in which termination occurs (which, for this purpose, will not be less than 100% of Mr. Hallett's base salary), payable in a lump sum. Mr. Hallett will also be entitled to a pro-rata bonus and payment of premiums attributable to maintaining his insurance coverage under COBRA for 18 months (subject to offset for subsequent employment). In addition, Mr. Hallett will be able to retain all of his Operating Units and Value Units. If any excise tax would be due under Section 4999 of the Code for any payments to Mr. Hallett, he will be entitled to a gross-up payment for the amount of such excise tax; provided, however, that if a reduction in the payments to

Mr. Hallett of less 10% of the original amount of such payments would avoid such an excise tax, the payments shall be so reduced.

In the event that Mr. Hallett retires and provided such retirement is announced at least 12 months prior to his termination date and takes effect no earlier than the third anniversary of the effective date of the Employment Agreement, Mr. Hallett will be entitled to a pro-rata bonus and will be able to retain all of his Operating Units and Value Units.

Mr. Hallett will be subject to post-termination non-competition and non-solicitation covenants and standard confidentiality provisions. The non-competition and non-solicitation provisions will expire 24 months following termination and shall not be applicable upon a termination due to retirement.

A copy of the Employment Agreement is attached hereto as Exhibit 10.15 and is incorporated herein by reference. The foregoing description is qualified in its entirety by reference to the full text of such exhibit.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Information relating to our directors and nominees will be included in our Definitive Proxy Statement for our 2012 Annual Meeting of Stockholders and such information will be incorporated by reference herein. Our executive officers as of February 17, 2012, are as follows:

Brian T. Clingen, 52, Chairman of the Board. Mr. Clingen has been our Chairman of the Board since April 2007. Mr. Clingen also served as our Chief Executive Officer between April 2007 and September 2009. Mr. Clingen has served as a managing partner of BP Capital Management since 1998. Established in 1998, BP Capital Management manages private equity investments principally in the service and finance sectors. Prior to founding BP Capital Management, Mr. Clingen was Chief Financial Officer of Universal Outdoor between 1988 and 1996. Kelso invested in Universal Outdoor in 1993.

James P. Hallett, 58, Chief Executive Officer and Director. Mr. Hallett has been our Chief Executive Officer since September 2009. Mr. Hallett was President and Chief Executive Officer of ADESA between April 2007 and September 2009. Mr. Hallett previously served in the following positions between August 1996 and May 2005: Executive Vice President of ADESA, Inc. from May 2004 to May 2005; President of ADESA Corporation, LLC from March 2004 to May 2005; President of ADESA Corporation between August 1996 and October 2001 and again between January 2003 and March 2004; Chief Executive Officer of ADESA Corporation from August 1996 to July 2003; ADESA Corporation's Chairman from October 2001 to July 2003; Chairman, President and Chief Executive Officer of ALLETE Automotive Services, Inc. from January 2001 to January 2003 and Executive Vice President from August 1996 to May 2004. Mr. Hallett left ADESA in May 2005 and thereafter served as President of the Columbus Fair Auto Auction.

Thomas J. Caruso, 52, President and Chief Executive Officer of ADESA. Mr. Caruso has been President and Chief Executive Officer of ADESA since September 2009. Mr. Caruso was Chief Operating Officer of ADESA from May 2008 to September 2009. Mr. Caruso also served as Executive Vice President of ADESA from April 2007 to May 2008 and Regional Vice President of ADESA from January 2000 to April 2007. From November 1992 to January 2000 Mr. Caruso served as General Manager of ADESA Boston.

Thomas C. O'Brien, 58, Chief Executive Officer of IAA and Director. Mr. O'Brien became Chief Executive Officer of IAA in November 2000. Mr. O'Brien also served as President of IAA from November 2000 to June 2011. Prior to joining IAA, Mr. O'Brien served as President of Thomas O'Brien & Associates from 1999 to 2000, Executive Vice President of Safelite Glass

Corporation from 1998 to 1999, Executive Vice President of Vistar, Inc. from 1996 to 1997 and President of U.S.A. Glass, Inc. from 1992 to 1996. Mr. O'Brien is also a director of the Core Logic Corporation.

Donald S. Gottwald, 45, President and Chief Executive Officer of AFC. Mr. Gottwald has been President and Chief Executive Officer of AFC since January 2009. Previously, Mr. Gottwald served in the role of Executive Vice President of Dealer Business for HSBC Auto Finance from December 2005 to October 2008. Prior to working at HSBC Auto Finance, Mr. Gottwald served in several roles of increased responsibility with GMAC Financial Services from June 1993 to December 2005, including Managing Director of Saab Financial Services Corp. and Managing Director of American Suzuki Financial Services. Mr. Gottwald has been active in the American Financial Services Association and has served on the association's board of directors.

Peter J. Kelly, 43, President and Chief Executive Officer of OPENLANE. Mr. Kelly has been President and Chief Executive Officer of OPENLANE since February 2011. Previously, Mr. Kelly was President and Chief Financial Officer of OPENLANE from February 2010 to February 2011. Prior to that, Mr. Kelly was Chief Financial Officer of OPENLANE from May 2008 to February 2010. Mr. Kelly was a co-founder of OPENLANE in 1999 and served in a number of executive roles at OPENLANE from 1999 to 2008.

Eric M. Loughmiller, 52, Executive Vice President and Chief Financial Officer. Mr. Loughmiller has been Executive Vice President and Chief Financial Officer since April 2007. Previously, from 2001 to 2006, Mr. Loughmiller was the Vice President and Chief Financial Officer of ThoughtWorks, Inc., an information technology consulting firm. Prior to that, Mr. Loughmiller served as Executive Vice President and Chief Financial Officer of May & Speh, Inc. from 1996 to 1998 until May & Speh was acquired by Axiom Corporation. Mr. Loughmiller was the finance leader of the Outsourcing Division of Axiom Corporation from 1998 to 2000. Prior to joining May & Speh, Mr. Loughmiller was an audit partner with PricewaterhouseCoopers LLP, an independent registered public accounting firm. Mr. Loughmiller is a certified public accountant.

Rebecca C. Polak, 41, Executive Vice President, General Counsel and Secretary. Ms. Polak has been Executive Vice President, General Counsel and Secretary since April 2007. Ms. Polak previously served as the Assistant General Counsel and Assistant Secretary of ADESA from February 2005 to April 2007. Prior to joining ADESA, Ms. Polak practiced corporate and securities law with Krieg DeVault in Indianapolis from 2000 to 2005 and with Haynes and Boone in Dallas from 1995 to 1999.

Benjamin Skuy, 49, Executive Vice President of International Markets and Strategic Initiatives. Mr. Skuy has been Executive Vice President of International Markets and Strategic Initiatives since September 2009. Mr. Skuy previously served in the following positions between July 1999 and September 2009: Executive Vice President of International Markets and Managing Director of ADESA Canada from January 2008 to September 2009; Managing Director and Chief Operating Officer of ADESA Canada from July 2006 to January 2008; Chief Operating Officer of ADESA Canada from January 2002 to July 2006; and Chief Financial Officer of ADESA Canada from July 1999 to January 2002. Prior to joining ADESA, Mr. Skuy served as Assistant Vice President at Manulife Financial from June 1998 to July 1999. From August 1990 to May 1998 he served as Senior Manager at The Bank of Nova Scotia.

David Vignes, 49, Executive Vice President of Enterprise Optimization. Mr. Vignes has been Executive Vice President of Enterprise Optimization since September 2009. Previously, Mr. Vignes served as Senior Vice President of Operations and Strategic Improvement of ADESA from July 2007 to August 2009. Prior to joining ADESA, Mr. Vignes served as Senior Vice President at Steiner + Associates, a real estate development company, from April 2004 to June 2007. From 1991 to

2004, Mr. Vignes held several executive positions in finance and operations with Disney Corporation companies, such as Disneyland Paris, Walt Disney World Orlando and the Disney cruise line.

Warren W. Byrd, 49, Executive Vice President of Corporate Development and Real Estate.

Mr. Byrd has been Executive Vice President of Corporate Development and Real Estate since June 2010. Mr. Byrd previously served as the Executive Vice President of Corporate Development of ADESA from April 2007 to June 2010. From April 2004 to April 2007, Mr. Byrd was the Chief Operating Officer of ServNet Auction Group, a trade co-operative of over 20 independent auto auctions in the U.S. Mr. Byrd previously served in the following positions between September 1994 and November 2003: President of ADESA Impact, a salvage auction subsidiary of ADESA, between February 2002 and November 2003; Senior Vice President and Chief Information Officer of ADESA between May 2001 and February 2002; Vice President of Corporate Development of ADESA between January 1999 and May 2001; General Counsel of ADESA between August 1996 and January 1999; and Legal Counsel of ADESA between September 1994 and August 1996. Prior to joining ADESA, Mr. Byrd practiced law with McHale, Cook and Welch in Indianapolis from May 1989 to September 1994.

Section 16(a) Beneficial Ownership Reporting Compliance

The information required by this item is incorporated by reference herein from our Definitive Proxy Statement for our 2012 Annual Meeting of Stockholders to be filed with the SEC as set forth under the caption “Documents Incorporated by Reference.”

Code of Business Conduct and Ethics

We have adopted the Code of Business Conduct and Ethics that applies to all of our employees, officers and directors, including those officers responsible for financial reporting. In addition, we have adopted the Code of Ethics for Principal Executive and Senior Financial Officers that applies to the Company’s principal executive officer, principal financial and accounting officer and such other persons who are designated by our board of directors. Both codes are available on our Web site at www.karauctionservices.com and available in print to any stockholder who requests it. Information on, or accessible through, our Web site is not part of this Form 10-K. We expect that any amendments to these codes, or any waivers of their requirements, will be disclosed on our website.

Controlled Company Exception

KAR LLC controls a majority of the voting power of our outstanding common stock. The Equity Sponsors and management indirectly own through their investment in KAR LLC approximately 78% of our common stock. As a result, we are a “controlled company” within the meaning of the NYSE corporate governance standards. Under the NYSE rules, a company of which more than 50% of the voting power is held by an individual, group or another company is a “controlled company” and may elect not to comply with certain NYSE corporate governance standards, including:

- the requirement that a majority of the Board of Directors consist of independent directors;
- the requirement that we have a nominating/corporate governance committee that is composed entirely of independent directors with a written charter addressing the committee’s purpose and responsibilities;
- the requirement that we have a compensation committee that is composed entirely of independent directors with a written charter addressing the committee’s purpose and responsibilities; and
- the requirement for an annual performance evaluation of the nominating/corporate governance and compensation committees.

Item 11. Executive Compensation

The information required by this Item 11 is incorporated by reference herein from our Definitive Proxy Statement for our 2012 Annual Meeting of Stockholders to be filed with the SEC as set forth under the caption “Documents Incorporated by Reference.”

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by Item 403 of Regulation S-K will be included in our Definitive Proxy Statement for our 2012 Annual Meeting and such information will be incorporated by reference herein.

Equity Compensation Plan Information

The following table sets forth the aggregate information of our equity compensation plans in effect as of December 31, 2011.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights(1)	Weighted-average exercise price of outstanding options, warrants and rights(2)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in first column)
Equity compensation plans approved by security holder(s)	9,560,979	\$11.08	4,046,979
Equity compensation plans not approved by security holders	—	—	—
Total	9,560,979	\$11.08	4,046,979

(1) Includes (a) service and exit options issued under the KAR Auction Services, Inc. 2009 Omnibus Stock and Incentive Plan, (b) service and exit options issued under the KAR Auction Services, Inc. Stock Incentive Plan and (c) service and exit options carried over from the Axle Holdings, Inc. Stock Incentive Plan at the time of the merger on April 20, 2007.

(2) Awards issued post-merger by KAR Auction Services, Inc. have exercise prices ranging from \$10.00 to \$18.80. Axle Holdings, Inc. options that were carried over at the merger date have exercise prices ranging from \$3.14 to \$8.52.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this Item 13 is incorporated by reference herein from our Definitive Proxy Statement for our 2012 Annual Meeting of Stockholders to be filed with the SEC as set forth under the caption “Documents Incorporated by Reference.”

Item 14. Principal Accounting Fees and Services

The information required by this Item 14 is incorporated by reference herein from our Definitive Proxy Statement for our 2012 Annual Meeting of Stockholders to be filed with the SEC as set forth under the caption “Documents Incorporated by Reference.”

PART IV

Item 15. Exhibits, Financial Statement Schedules

- a) The following documents have been filed as part of this report or, where noted, incorporated by reference:
- 1) Financial Statements—the consolidated financial statements of KAR Auction Services, Inc. and its consolidated subsidiaries are filed as part of this report under Item 8.
 - 2) Financial Statement Schedules—all schedules have been omitted because the matter or conditions are not present or the information required to be set forth therein is included in the consolidated financial statements and related notes thereto.
 - 3) Exhibits—the exhibit list in the Exhibit Index is incorporated herein by reference as the list of exhibits required as part of this report.

In reviewing the agreements included as exhibits to this Form 10-K, please remember they are included to provide you with information regarding their terms and are not intended to provide any other factual or disclosure information about KAR Auction Services, ADESA, IAA or other parties to the agreements.

The agreements included or incorporated by reference as exhibits to this Annual Report on Form 10-K contain representations and warranties by each of the parties to the applicable agreement. These representations and warranties were made solely for the benefit of the other parties to the applicable agreement and (i) were not intended to be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate; (ii) may have been qualified in such agreement by disclosures that were made to the other party in connection with the negotiation of the applicable agreement; (iii) may apply contract standards of “materiality” that are different from “materiality” under the applicable securities laws; and (iv) were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement.

The Company acknowledges that, notwithstanding the inclusion of the foregoing cautionary statements, it is responsible for considering whether additional specific disclosures of material information regarding material contractual provisions are required to make the statements in this Annual Report not misleading. Additional information about KAR Auction Services may be found elsewhere in this Annual Report on Form 10-K and KAR Auction Services’ other public filings, which are available without charge through the SEC’s website at <http://www.sec.gov>. See Item 1, “Business—Available Information.”

KAR Auction Services, Inc.
Statement of Computation of Ratio of Earnings to Fixed Charges
(In millions, except ratios)

	For the Years Ended December 31,		
	<u>2011</u>	<u>2010</u>	<u>2009</u>
Income before income taxes	<u>\$ 90.0</u>	<u>\$ 96.8</u>	<u>\$ 34.3</u>
Fixed charges(1)			
Interest expense	143.1	141.4	172.6
Interest component of all rentals	30.0	29.3	28.8
Total fixed charges	173.1	170.7	201.4
Earnings before income taxes and fixed charges	\$263.1	<u>\$267.5</u>	<u>\$235.7</u>
Ratio of earnings to fixed charges	1.5	<u>1.6</u>	<u>1.2</u>

(1) Fixed charges represent interest and the interest component of all rentals. We use a reasonable approximation of the interest factor related to operating leases in calculating the interest component of all rentals.

Consent of Independent Registered Public Accounting Firm

The Board of Directors
KAR Auction Services, Inc.:

We consent to the incorporation by reference in registration statements (No. 333-164032 and No. 333-168523) on Form S-8 of KAR Auction Services, Inc., of our report dated February 28, 2012, with respect to the consolidated balance sheets of KAR Auction Services, Inc. and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of income, stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2011, and the effectiveness of internal control over financial reporting as of December 31, 2011, which report appears in the December 31, 2011 annual report on Form 10-K of KAR Auction Services, Inc.

/s/ KPMG LLP

Indianapolis, Indiana
February 28, 2012

**Certification of Chief Executive Officer
Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002**

I, James P. Hallett, certify that:

- 1) I have reviewed this Annual Report on Form 10-K of KAR Auction Services, Inc.;
- 2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4) The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5) The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**Certification of Chief Financial Officer
Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002**

I, Eric M. Loughmiller, certify that:

- 1) I have reviewed this Annual Report on Form 10-K of KAR Auction Services, Inc.;
- 2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4) The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5) The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
